Inventory Criteria

Chapter 70 of the Forest Service Land Management Planning Handbook 1909.12 outlines criteria for what should and should not be included in the inventoried areas. There are two broad categories of criteria:

1. Size- areas under 5000 acres are generally not included in the inventory, unless adjacent to an existing wilderness.
2. Roads and improvements or constructed features – roads from the Motor Vehicle Use Map (MVUM) and the most substantially noticeable features on the landscape are generally not included in the inventory, while less significant and any remaining ones will be considered in evaluation (step 2).
