

ENTICE

WORKSHOP

Wetland Wonders: Explore the Organisms of Illinois' Wetland Ecosystems

October 18, 2016

Cache River Visitors' Center, Cypress

9:00 a.m. – 3:00 p.m.

We'll make a splash as we explore the fascinating organisms that live in Illinois' wetlands. We'll learn about their life history and identification and will put the skills to practice as we visit a wetland. Hands-on activities will be conducted, and you'll receive supplemental educational resources. Although targeted to teachers of grades four through eight, other educators are welcome to register and attend the workshop but may need to adapt the materials as appropriate. Professional Development Hours are available. This workshop is part of the ENTICE (Environment and Nature Training Institute for Conservation Education) program from the Illinois Department of Natural Resources. Register at <https://www.enticeworkshops.com>.
