

SHOOTING CAN CAUSE WILDFIRE

Find a Safe Backdrop

Shoot in areas free of dry vegetation and areas that limit ricochets.

Exploding Targets

Exploding targets can cause wildfire.

Use Safe Targets

Shooting steel targets or rocks may throw sparks.

Incendiary or Tracer Ammunition

Rounds that "burn" can easily ignite dry vegetation.

Ammunition Type Matters

Steel core and FMJ rounds have the highest potential to start fires.

Report all fires.

CALL 9-1-1

ONE LESS SPARK ONE LESS WILDFIRE
