

VEHICLES CAN CAUSE WILDFIRE

Safe Towing

Dragging chains will throw sparks. Use appropriate safety measures on hitch and chains.

Hot Components

Some parts under your vehicle can get very hot. Do not drive over dry vegetation.

Nothing Dragging

Make sure nothing is hanging and dragging on the ground.

Check Your Brakes

Worn breaks cause metal on metal contact throwing sparks.

Be Wheel Safe

Check tire pressure. Wheel rim to road/rock contact will throw sparks.

Report all Fire

CALL 9-1-1

ONE LESS SPARK ONE LESS WILDFIRE
