

A Century of Science: Mountain Pine Beetles in the Black Hills

What do we know? What does this mean for current and future management?

Please Join Us for a Presentation and Discussion

You are invited to participate in two exciting opportunities to engage with leading researchers and managers working in the Black Hills! Join us to learn about recent research efforts to synthesize 100 years of knowledge on mountain pine beetles in the Black Hills of SD and WY.

Tuesday, October 25 at the Mystic Ranger District Office (8221 S. Hwy 16, Rapid City, SD 57702)

11:00—11:30: Dr. Russell Graham, lead scientist, presents report highlights

11:30—12:00: Media interviews with lead scientists and forest managers in the Black Hills

1:00—3:00: Technical science delivery session and management discussion

Wednesday, October 26 at the Black Hills Experimental Forest

9:00—12:00: Field trip with scientists and land managers to the Black Hills Experimental Forest to see research sites and learn more about on-the-ground bark beetle control and restoration efforts

(Event is open to the all interested parties—including the public and media)

Available Now! [Mountain pine beetles: A century of knowledge, control attempts, and impacts central to the Black Hills.](#) RMRS-GTR-353. Graham, Russell T.; Asherin, Lance A.; Battaglia, Michael A.; Jain, Theresa B.; Mata, Stephen A. 2016

Event sponsored by the U.S. Forest Service Rocky Mountain
Research Station and Black Hills National Forest
