

Black Hills National Forest Wyoming 2016_17

Appendix A Restricted Area

Order #BKF 141-2016, Map 2 of 2

Approximately 66 miles of marked and groomed trails are located on the Black Hills National Forest in Wyoming through a cooperative agreement between the U.S. Forest Service Wyoming Division of State Parks and Historical Sites, State of WY and WY Trails. Parking areas which serve this trail system are signed, plowed, and have many sanitary facilities, maps, and information available. During the designated snowmobile season, the groomed trail system is officially closed to wheeled vehicles.

Some plowed roads and areas are closed to snowmobiles to prevent conflicts with logging traffic, wildlife winter range, and cross country ski trails. These areas and roads are shown on this map and/or marked on the ground.

There may be additional restrictions on the occupancy and use of the National Forest. These restrictions may pertain to campfires, camping, parking, possession of animals, etc. To avoid an inconvenience, you are encouraged to contact a local Forest Service office for current information.
