LENGTH: 1.3 Miles
SEASON: Year Round
LEVEL OF USE: Light
ELEVATION: 2,400’ – 2,800’
CONNECTING TRAILS: Taylor Creek #1142

Trail Information: The Big Pine Access Spur is a connecting trail from Big Pine Trail and Big Pine Campground to Taylor Creek Trail. It winds through a mixture of old and young conifers, and offers views of the Briggs Valley.

Big Pine Access Spur #1142A is somewhat steep in places, but would be a nice cut off for a bicycle ride. One section gets narrow with steep banks and long drop-offs into the canyon, but has a beautiful view of the Briggs Valley area.

Getting There: From I-5, take the Merlin-Galice Road west for approximately 12 miles. Turn left on Forest Service Road 25, and travel an additional 12 miles to the Big Pine Campground area. While the Big Pine Campground is closed due to hazard trees, the Big Pine Access Spur trail is located on the left of Forest Road 25, and no entry into the campground is necessary.

Considerations: Prepare for your hike! Carry plenty of water, as there is no water along this trail.

As this is a multi-user trail, so please prepare to yield to other user groups.
