Hi my name Jaiden and I am a student at Naukati school. The reason that I am writing this paper to you is because I want you to look at my project for taking it into consideration of building it. In the following paragraphs I will list the pros and cons of why you should adopt my plans for a nature area.

The first thing I am going to tell you are the pros of making my nature area. Countless times I have been hanging out with friends with absolutely nothing to do. How amazing would it be to have a nature area filled with awesome activities. There can be a place to ride your A.T.V and have a gorgeous place to walk. This place does not only have to be for kids, adults of all age can come and enjoy the area as well. This area would also be an amazing field trip destination for schools. The class can walk on the trail and read information plaques that tell all about the history of the trail and the island.

The few cons of my plan are that I would not like people ruining the wildlife by misusing the A.T.V. In order to fix this problem a person would have to have a driver licence to drive a A.T.V and guards can be built to stop the A.T.V from going off course. Another problem that can happen is littering. To help prevent this there would be frequent garbage cans and a fine for littering.

Another good reason for you to allow my idea to be built is that a once useless space would now be a giant tourist attraction. People from all around the world that come to southeast Alaska, would be delighted to come to our island to take a nice walk, or go on a horseback ride, or just come and take in the beauty of this island.

My final reason that you should take my idea into consideration is that the kids throughout this island would be involved in the construction of the area. The park can incorporate kid's drawings as a decoration. Kids can also volunteer at the park by cleaning up. Working the pay shack, or even watch to make sure no one vandalizes the park as a community service project.

I hope that you people at the forest service will take my plan into building. I would be overjoyed with the news of my idea being put into action. My class and I put a lot of hard work and effort into into planning and graphing our designs. Thank you for reading my essay and I hope you put my idea into action.

Sincerely,

Jaiden
