Grade: 6th

Developing the Forest

My name is Emma Wakefield, I am in 6th grade, and I go to Whale Pass School. My idea about developing the forest is to build a pool in Whale Pass. Some residents in Whale Pass might be opposed to this idea because of the consequences, and they could be over populating, disturbing animal habitats, and safety.

Over populating is a complaint from the elders from the town. They have lived here very long and would like to keep the town secluded. I don't think over populating is as huge of issue as the lack of entertainment and parks. In the entire town there is only one source of entertainment, and it is our library. Safety could be a problem with having a pool, but both of my parents are part of the EMS squad and the squad is very efficient and should take care of the people that could get injured at the pool. At the pool we will also have lifeguards. There will be pool maintenance and at the pool we have safety tools required for the lifeguards.

Given these points I think a pool in Whale Pass is a great idea. You can't stop the influx of people but you can give them

entertainment for those who are here. We have an excellent EMS team that will provide great care for possible injuries. Destroying animal habitats is a problem but Tongass National Forest is the biggest forest in the U.S. and we only want to use a small fraction of it I think building a pool in Whale Pass is a great idea and I hope you think so to! ☺
