**Subject:** Forest Order 10-17-09 – Young’s – Prescott Fire Area Closure 

**From:** Michael A. Green, Acting Forest Supervisor

I am issuing a Forest Order for public safety to close the area threatened by wildfire as a result of the Young’s and Prescott Fires burning east of the Smith River National Recreation Area, Gasquet Ranger District on the Six Rivers National Forest, as described in the attached Forest Order No. 10-17-09 and displayed on the attached map.

Order No. 10-17-09 is necessary to promote public safety within the area of the Young’s- Prescott Fire Closure Area. It is my decision to issue this Forest Order to provide for public safety, while the Young’s and Prescott Fires are actively burning with no containment. Although ignition occurred in remote portions of the Siskiyou Wilderness Area, prevailing winds fueled by dense vegetation is continuing to increase its size, with flame fronts burning in a westerly direction approaching the Smith River National Recreation Area, Gasquet Ranger District on the Six Rivers National Forest. Because the remote, steep, rugged terrain poses a threat to firefighter safety, the team is using a confinement strategy to manage the Young’s Fire. The Prescott Fire, west of Happy Camp, is part of the Eclipse Complex on the Klamath National Forest. A small portion of the fire’s western edge has crossed the forest boundary south of Jedediah Mountain and is now in the Smith River National Recreation area on the Six Rivers National Forest.

There is limited road access to this area, creating the potential for visitors to become trapped in the event of blowups and fire runs, as fire behavior is unpredictable and can pose a serious threat to individuals who are near an uncontrolled fire without constant radio communications addressing fire movement and spread. In addition to the area closure, I am closing roads, trails, and trailheads that provide main access to the area to keep the recreating public out of the fire’s potential pathway, thereby reducing risk to the public of injury or death. The National Forest System roads and trails within the Young’s- Prescott Fire Closure Area will also be closed as firefighters are monitoring conditions and for spot fire ignition, which can pose a hazard to the public.

The Order will remain in effect until the Young’s and Prescott Fires are suppressed.

Public scoping was conducted. Public safety announcements and information about the fire and access to the area is being shared with the public at the Gasquet Ranger District’s Information Center.

I have concluded that this decision may be categorically excluded from documentation in an Environmental Impact Statement (EIS) or Environmental Assessment (EA) under the National Environmental Policy Act. This action falls within the category identified in 36 CFR 220.6(d)(1) – prohibitions to provide short-term resource protection or to protect public health and safety –

and does not require documentation in a decision memo, decision notice or record of decision. I have determined that there are no extraordinary circumstances associated with this temporary closure. Implementation of my decisions may begin immediately.
