WAYS WE ARE IMPROVING NATIONAL FORESTS IN ALABAMA

OUR INTEGRATED APPROACH TO HEALTHIER NATIONAL FORESTS

1 FIRE MANAGEMENT

"Using Good Fire and Fighting Bad Fire"

Fire is a significant force in the forest environment. The Forest Service is responsible for monitoring good fire (controlled burns) and managing efforts to contain unexpected fires.

2 LANDS AND MINERALS MANAGEMENT

"Working Together to Care for the Land"

The Lands and Minerals Program secures and protects the public's rights, title, value and interests in its national forests and authorizes a variety of uses to meet the needs of present and future generations.

3 ECOSYSTEM MANAGEMENT

"Contributing Pure Water, Air and Stable Soil"

We recognize the importance of pure water, air and soil as the foundation of ecosystem management. Our commitment is to use management practices that help maintain or enhance the quality of water, soil productivity and air in each of our forests.

4 WILDLIFE, PLANT AND FISHERIES MANAGEMENT

"Protecting Wild and Sensitive Resources"

The goal of the Wildlife and Rare Species program is to maintain the biological diversity of all our plant and animal communities. We help ensure populations of game species. We also recover threatened species, while managing the risks of non-native invasive species.

5 RECREATION MANAGEMENT

"Creating Outdoor Recreational Opportunities"

The Forest Service manages recreation sites and trails throughout Alabama's national forests. The public can enjoy group picnic shelters, developed campgrounds, fishing ponds, sandy-white beaches and numerous trails designated for hiking, horse-back riding, mountain biking and off-road vehicles. The Recreation Fee Demonstration Program allows recreation user fees to be kept by the forest and applied directly back to the site to cover operating expenses and maintenance.

6 ENGINEERING PROGRAM

"Maintaining A Safe, Sustainable and Reliable Infrastructure"

Managing the infrastructure of the National Forests in Alabama is the core function and responsibility of our engineering team. From design to inspection, engineers ensure that the growing needs and the changing uses of our forest roads are successfully met thru environmentally and financially sustainable practices.

7 HERITAGE PROGRAM

"Preserving the Past for the Future"

The purpose of the Heritage Program is to protect important heritage resources, share the values of these resources with the public and contribute technical advice and information to forest managers.

8 ADMINISTRATIVE OPERATIONS

"The Business of Managing National Forests"

National Forests in Alabama's administrative operations provide leadership in public affairs and community relations, customer support services, law enforcement, and financial management activities that include budget and finance, acquisition management, grants and agreements.
