Re: White Mountain National Forest proposed Closure Order #R9-22-18-01

The White Mountain National Forest has proposed implementing a closure order for a portion of the Crawford Path hiking trail going through extensive reconstruction.

The purpose of the closure is for public safety. Specifically, this trail project will require large quantities of trail work supplies and equipment, as well as trail workers, in the trail treadway, making pedestrian passage unsafe. All of the rock material being used for the project will be delivered utilizing sling-load air operations along the entire length of the project area.

Further, the fragile alpine habitat cannot withstand any level of travel outside of the existing trail treadway. For safety and ecological concerns, the trail must be closed to the public without exception during reconstruction.

The proposed closure area includes the Crawford Path (Appalachian Trail) between the north and south intersections with the Mt Monroe Loop Trail.

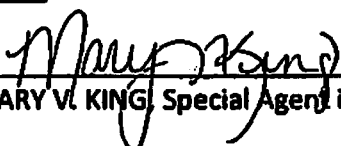

The order and supporting documentation is attached. I recommend approval of this order for implementation. Please advise if you have any questions or require further information to complete your review.

I have reviewed the proposed orders for the White Mountain National Forest and decided the following:

Return the order to the Forest for continued implementation

Return the order to the Forest due to insufficient documentation

Forward to OGC for additional legal review
