Southern Region of the USDA Forest Service Waives Campground Fees on National Forests

ATLANTA (September 11, 2018) – The Southern Region of the USDA Forest Service is immediately waiving fees and making all open campgrounds available for individuals displaced by the recent storm.

Like several areas along the Gulf Coast, many National Forests were impacted by the recent storm. Some of the region's campgrounds are closed due to the inclement weather.

Please call ahead or check websites to determine what is open and available. Also, individuals requesting campsites need to check in with campground hosts at each site.

For more information on campgrounds in the Southern Region, please visit the respective forest's website:
