Deweyville	55°57'15"N 133°14'25"W (Trailhead on Road)	Trail	0.17	Improvement	<ul style="list-style-type: none"> Improve trail to facilitate kayak launch area. Pullout for parking approximately 100 yards north of trail head. Trail head needs to be re-established, altered when road was fixed. Currently have to access from berm along roadside. Marked, but not well defined. Tread defined, but in poor shape. Puncheon needs to be replaced, tread should be gravelled. Need to assess trail segments for kayak transportation (e.g., turns and drops). Try to maintain existing route as much as possible. Explore option to route trail directly from pull-out. Improvement	<ul style="list-style-type: none"> Trail from shoreline to falls and spur trail to day-use area need reconditioning. The primary trail has several sections of old "boardwalk" that require repair or replacement. Sections of bare ground tread should be bordered and gravelled to enhance the experience and maintain trail integrity. There are points where roots are exposed across trail, bypass or bridge (e.g., steps). Steps at the end of the trail that lead down to pool need to be rebuilt; these are necessary to prevent damage to the stream bank. Should be able to maintain existing route (estimate 80% +/-) Objective - make trail barrier free. 	<ul style="list-style-type: none"> Botany Soils Archaeology Wildlife Fish (steps at pool) Hydrology (steps at pool) 	<ul style="list-style-type: none"> General public and OR&G use.
