Date: April 23, 2019

Dear Interested Party,

Your input is being sought on the proposed Jack's Project Plan of Operations (Plan). This letter will provide you with information on the Purpose and Need for the proposed action and a request for your comments.

Background

According to the Roadrunners Prospector's Club Inc.'s (RRPC) website, the club was founded in 1982 as a non-profit, volunteer-staffed, family oriented club dedicated to gold mining in the state of Arizona. Members have access to thousands of acres of gold producing claims located throughout the state and keep the gold they find. In addition, the club sponsors monthly group outings where members can work claims, learn new techniques, and socialize.

On June 9, 2014, the RRPC, submitted the revised Jack's Project Plan to the Prescott National Forest for approval. The Plan was reviewed by the Forest Service for completeness, and later determined that it contained sufficient information to begin the environmental evaluation. RRPC originally submitted four separate plans between 2007 and 2009, and have been operating under an existing Plan for other claims within the Prescott National Forest, Bradshaw Ranger District, for over 20 years. The Forest Service determined that the proposed activities in the existing and new plans were similar enough to be addressed in one plan to update the environmental analyses on the older claims and include the proposed ones at the same time under one plan.

Proposed Action

This is a 20-year, placer mining project within 11 new and 82 existing mining claims (93 claims in total). The oldest claims date back as far as mid 1980s up to now. Operations would include: up to 10 club members (operators) per claim conducting dredging and other placer activities (such as panning and metal detecting), vehicular access via system and non-system roads, foot traffic on proposed overland travel routes, club gatherings, camping and other incidental operations. Operations will be year round, but temporary closures and reduction in operations would coincide with seasonal weather variations and timing restrictions. Each operator may work up to 10 hours per day. Frequency of operations varies from claim to claim.

Occupancy of operating areas would be restricted to camping structures where there will be one campsite per operator. Camping would not exceed 14 days within a 30-day period. During operations, the proponent would comply with all Forest Service regulations. Club outings will involve a maximum of 30 operators with a maximum of 15 operators conducting mining activities.

Up to 3-4 inch suction dredges, dry washers, sluice boxes, high bankers, metal detectors,

vacuums, gold pans, and other hand tools will be used to mine and process placer gravels. 4 inch dredges will be utilized by operators who are grandfathered in. Gas, oil, and batteries will be used for motorized equipment. No fuel will be stored or disposed of on National Forest System (NFS) lands. All mining activities are constrained to ground/streambed excavations below the high water marks and not on the banks. Equipment (e.g. dredges) will be used to process sediment for ore recovery. No chemicals or explosives will be used in this operation.

Operators would ensure that water flow is maintained to at least 50% of the current flow rate. To mitigate turbidity created by dredging, settling ponds will be used. Pond sizes will vary. Average size is 6 feet (ft.) diameter x 1 ft. deep. Settling ponds will be constructed using streambed rock and gravel as berm materials. Water would be drawn from the stream through the dredge hose, over the sluice box and then allowed to run into the settling pond. The amount of water used per day will vary depending on size of the dredge and length of operation during the day. Water will not be recycled for reuse. Once the operator has completed activities for the day, the settling ponds would be cleaned after sediment has settled to the bottom, plastic removed, and rocks and gravel dispersed. During dry periods water may be brought in by members in various types of containers to be used with the appropriate type of equipment. No dredging will take place during dry periods. No disturbance to woody vegetation will occur anywhere on the claim. No dams will be constructed within the streams. The operation will comply with all Federal and State Water regulations and all State laws governing water quality, standards for surface waters A.C.R.R., Title 9, Chapter 21. The club currently maintains an US Army Corps of Engineers Section 404 Dredge Permit, which is renewed as required.

Reclamation activities will be concurrent with mining operations. Trash, sewage, and waste will be removed and disposed of at the operator's residence or at a public waste facility on an ongoing basis as each operator leaves the claim. All excavations would be backfilled and contoured prior to the operator moving to another dredge site or leaving the project area. The final reclamation would include these items and revegetation as required.

Jeeps, pickup trucks, passenger vehicles, 4-wheel drive vehicles, and quads would be used to access operating areas on forest system, decommissioned, and user-created roads. The Ray's Right Place (RRP) claim is not accessible by vehicle; therefore, operators will access the claim by foot along Little Wolf Creek. No new roads will be constructed and no maintenance will be done without prior written approval. Each operator would have at least one vehicle to access operating sites. The table below identifies the access roads and trails that would be used. (See Appendix 1).

Purpose and Need

The purpose for the proposed action is to mine valuable mineral deposits in accordance with the Jack's Project Plan of Operations (PoO) submitted by Roadrunners Prospectors Club Inc. in a way that minimizes disturbance to surface resources. The PoO was submitted in accordance with the 36 CFR 228 Subpart A.

The Mining Law of 1872 states that all valuable mineral deposits in Public Domain lands of the United States are to be free and open to exploration and development. The Forest Service is obligated to process, administer, and manage mining operations on NFS lands conducted under

the following laws, regulations, and the Prescott National Forest Land and Resource Management Plan: 1872 General Mining Law (as amended), 1897 Organic Administration Act, 1955 Multiple Use Mining Act, 36 CFR 228 Subpart A – Locatable Minerals, and Chapter 2 (Forestwide Desired Conditions – Minerals page 52-53) and Chapter 4 (Standards and Guidelines – Minerals and Mineral Materials page 90-92) of the June 2015 Land Resource Management Plan for the Prescott National Forest.

Decision To Be Made

The Bradshaw District Ranger of the Prescott National Forest will decide whether to authorize the proposed action as described, or whether to implement a different alternative. Given that the proposed action is subject to the terms of the 1872 General Mining Law, as amended, a no action alternative is not available to the District Ranger. Based on public comments received from responses to this scoping notice, the Forest Service will determine whether significant public issues or concerns exist. The nature of the analysis and development of alternatives are contingent upon that determination.

Implementation

Once any public issues or concerns with the proposed action have been identified, the Forest Service will evaluate the environmental effects of the proposed action and activities, and will publish a legal notice of the availability of that Environmental Assessment for a 30-day public comment period. Following public comment, if anyone has standing for objections, there would be additional notice for a 45-day objection period. Following resolution of any objections, if it is determined that this project will proceed, a decision notice would be signed and the project could be implemented immediately.

Opportunity to Object

Comments submitted during this scoping period or any other official comment period offered by the responsible official will provide the commenter with standing for objections. Objections must comply with the direction in 36 CFR 218 Subparts A and B.

This project implements the Prescott National Forest's Land and Resource Management Plan (2015) and is not authorized under the Healthy Forest Restoration Act (HFRA). Once the Environmental Assessment has been completed, there will be a notification of the opportunity to object.

Request for Comments and Contact Person

We would like to know of any issues, concerns, and suggestions you may have about this proposal. Comments should be as fully formed and specific as possible to assist us in the analysis. Although comments are welcome at any time, they will be most effective if received by May 23, 2019.

In order for a commenter to have standing for objections, comments must be received by May 23, 2019. Please submit your comments in writing to:

Jack's Project Plan of Operations
Prescott National Forest
344 S. Cortez St.
Prescott, AZ 86303
Attn: Zakiya Shivji

Comments may also be submitted via email to comments-southwestern-prescott-bradshaw@fs.fed.us. Electronic attachments to comments should be in .doc, .docx, or .pdf format. Please put "Jack's Project Plan of Operations" in the subject line.

Comments received in response to this scoping letter, including names and addresses of those who comment, will be considered part of the public record on this project and will be available for public inspection. Comments submitted anonymously will be accepted and considered. Pursuant to 7 CFR 1.27(d), any person may request the agency to withhold a submission from the public record by showing how the Freedom of Information Act (FOIA) permits such confidentiality. Persons requesting such confidentiality should be aware that, under the FOIA, confidentiality may be granted in only very limited circumstances, such as to protect trade secrets. The Forest Service will inform the requester of the agency's decision regarding the request for confidentiality, and where the request is denied, the agency will return the submission and notify the requester that the comments may be resubmitted with or without name and address within thirty (30) days.

Sincerely,

SARAH TOMSKY
District Ranger

Enc.: Appendix A

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at http://www.ascr.usda.gov/complaint_filing_cust.html and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer and lender.
