

ANNUAL OPERATING INSTRUCTIONS

2019 Grazing Season
(3/01/2019-2/28/2020)

Reserve Ranger District
Gila National Forest

Cross V Allotment

Agreed To By: Scott Landrum
Scott Landrum, *Ranch Manager*

Date: 12/11/2018

Approved By: John D. Pierson
John D. Pierson, *District Ranger*

Date: 1/30/2019

2019 Annual Operating Instructions (AOI)

Allotment: Cross V

Permittee: Mark J. Svir

Permit Number: 61337

Permitted Use:

Permittee	Numbers	Type	Season
Mark J. Svir	50 Cow/Calf	Term	3/01-2/28

1. Authorization: Authorized to graze the following in 2019:

Permittee	Numbers	Type	Season
Mark J. Svir	50 Cow/Calf	Term	3/01-2/28
Mark J. Svir	2 Horses	Term	3/01-2/28

Counting Livestock: The standard for counting livestock on an allotment is as follows:

- a. All cattle six (6) months of age or older **at the time of entering** the National Forest **and all weaned** animals regardless of age will be counted against the permitted numbers on the allotment and charged for at the current rate.

Nonuse: Application for credit or refund must be made in “**writing**” and “**in advance**” by the permittee to the District Ranger using Form FS-2200-1 (Refund, Credit, or Transfer Application). When it is not possible to be timely in getting to the Ranger District Office, the permittee may phone in a request for refund or credit. The permittee will then complete Form FS-2200-1 (Refund, Credit, or Transfer Application) at the next visit to the Reserve Ranger District Office. **Note:** Credit or refund applications will not be processed unless value is \$100.00 or more and District personnel have been notified either in advance or at the time livestock are removed from NFS Lands.

Bovine Trichinosis: Virgin bulls not exposed to breeding are exempt from testing if under 12 months of age. As of 2/26/10, bulls 12 months of age and older are required to have a negative trich test within 30 days prior to entry. **A signed affidavit from the owner for the virgin status of bulls 12 TO 24 months of age is no longer applicable.** Non-virgin Breeding age Bulls must be tested negative prior to import into New Mexico. Non-virgin Breeding age Bulls sold within the state of New Mexico must be tested negative within 30 days prior to change of ownership. Please contact the New Mexico Livestock Board for more details.

2. Management: Cross V 2019 Pasture Rotation:

PASTURE	LIVESTOCK NUMBER
Cottonwood/ Outlaw	3/01-5/31 (all cattle)
Devil’s Canyon	6/01-8/31(all cattle)
South	9/01-2/28 (all cattle)
Cottonwood/ Outlaw	3/01-2/28 (horses)

Please notify us of cattle movements onto and off of the allotment, as well as refinements that may be needed to enhance the management system. If you identify the need to differ from this management system by more than 15 days, please contact this office at least two weeks in advance so the District has time to conduct monitoring and assess your request.

3. Utilization Standards and Monitoring:

In accordance with the Decision Notice for the Cross V Allotment dated 9/30/2008, the maximum allowable use level set for the Cross V Allotment is conservative (**31-40%**). Use of riparian browse is not to exceed **25%** of sprouts/seedlings heavily hedged. If utilization of 31-40% is exceeded in thirty percent of the areas frequented by livestock in two consecutive years, water-lots will be installed on Devils Tank and Cross V Tank in the Devils Canyon Pasture.

If utilization levels within portions of a scheduled pasture approach allowable use, you are required to move livestock into areas not approaching allowable use. If cattle cannot be effectively managed away from areas within the pasture that have met allowable use or if utilization objectives are met throughout the pasture prior to scheduled rotation, contact District Personnel. Cattle will be moved into the next available pasture within the annual rotation. In the event that forage utilization objectives are met in all available pastures, livestock will be removed from the allotment. Management adjustments will be made to the following years Annual Operating Instructions to avoid recurring situations. The following dates have been tentatively scheduled for monitoring on the allotment. You are highly encouraged and invited to participate in monitoring with District personnel and/or on your own.

Pasture	Monitoring date
Cottonwood/ Outlaw	6/05/2019
Devil’s Canyon	8/06/2019
South, Cottonwood & Outlaw	12/05/2019

4. Forage Growth and Water Availability:

Per Part 2, clause 8(c) of your Term Grazing Permit, if forage growth and water availability are not adequate during all or portions of the 2019 grazing season, total or partial livestock removal from the allotment may be necessary.

5. Range Improvements:

All assigned range developments identified in your Term Grazing Permit must be maintained to a functional status.

Advance planning is needed for any range improvement reconstruction or replacement, including fences and water systems to evaluate the need for any additional surveys. General maintenance/repair is excluded. Advance planning is also needed for authorized stock tank cleaning so surveys can be scheduled accordingly. Please contact the District in advance if you are proposing any of this type of work.

Please protect natural springs and areas with riparian type vegetation. Drainage bottoms, creeks, springs, and cienegas, where water is available, are most susceptible to livestock concentrations.

The following range improvements were discussed and planned for this grazing season:

1. JTS Tank is breaching on back side and needs repaired.
2. Needles Peak Tank needs repaired.
3. Erosion control structures need to be evaluated on forest adjacent to private land. District Personnel will work with State & Permittee to evaluate and design a functional structure.
4. Evaluate well and water system from private land well and from Outlaw Spring to mitigate wolf/livestock conflict on the allotment.
5. Permittee and District personnel will evaluate current water distribution across the allotment with the goal of creating a long-term plan for water development and distribution across the allotment.

- 6. The Cross V Annual Operating Plan/Instructions (AOI)** are a part of the Term Grazing Permit as provided for in Part 3, Section 8. The AOI complies with the standards and guidelines found in the 9/30/2008 Cross V Decision Notice and in the Gila National Forest Plan. It also complies with the Endangered Species Act on-going grazing consultation for the Cross V allotment. Any additional information collected during the year may be incorporated into the annual operating instructions.
