ANNUAL OPERATING INSTRUCTIONS

2019

SCHOOLHOUSE MOUNTAIN ALLOTMENT #715

BULLARD PEAK ALLOTMENT #701

AMENDED

Prepared By: /s/ Naomi M. Gomez Date: 12/12/18
District Range Staff

Approved By: /s/ Beth Hale Date: 12/12/18
District Ranger

Agreed to By: /s/ Permittee Date: 12/12/18
Permittee

functioning condition. In the event these improvements cannot be brought up to a functioning condition, you should notify this office so we can schedule them for reconstruction as funds become available.

The following improvements will be constructed/reconstructed:

You are authorized as the permittee on the Schoolhouse Mountain and Bullard Peak Allotments to cut and utilize juniper fence posts, various species of fence stays, and ponderosa pine, Douglas fir, true fir, spruce or aspen poles to maintain fences, corrals or other improvements on National Forest System lands within the allotment. This authorization allows cutting **100** corner post, and **1000** stays. Line posts are no larger than 6.5 feet in length and have a inch top diameter. Corner posts are no larger than 8 feet in length and have a 7-inch top diameter. Poles are limited to trees less than 9 inches in diameter at breast height (DBH). Stays may be cut from limbs from trees cut for posts or poles, sapling-size trees, down snags, or snags that have been designated by a Forest officer to be cut. You are authorized to use this material under 36 CFR 223.2(a), Free Administrative Use. This authorization is valid for the current calendar year.

The following instructions must be followed when cutting any posts, poles or stays under this authorization:

1. Stumps should be no higher than 12 inches above the ground.
2. Slash should be lopped to within 24 inches of the ground and scattered.
3. Cutting and removal of posts, poles or stays should not be done when the soil moisture conditions would permit ruts to be cut.
4. No posts, poles, stays or by-products from them will be sold or used anywhere but on National Forest land within your allotment to maintain the range improvements assigned in your 10-year Term Permit.
5. All posts, poles or stays will be cut within your allotment unless another specific area is designated for cutting by the District Ranger.

Non-compliance with the instructions set forth in this authorization could lead to adverse actions taken against your Term Grazing Permit.

IV. GENERAL INSTRUCTIONS

1. Fire - branding and warming fires should be used with good judgement - not on windy days or during times when fires are specifically restricted. The Silver City District is planning to allow naturally ignited fires to burn on the district this coming year. We will notify you if we plan to let a fire burn on your allotment.
2. Records - please keep track of materials used, and the days and dollars spent on maintenance of improvements. It is also necessary to keep track of cattle numbers, dates of entering and leaving different pastures, shipping dates, and cattle losses (both grown stock and calves).
3. Heavy Equipment Use - written permission from the District Ranger will be required for any heavy equipment use on the National Forest. Examples of this are cleaning out stock tanks, road maintenance, etc.
4. Credit/Refund - any credit or refund applications for grazing fees must be made as far in advance as possible. Credit/Refund applications are not retroactive and will be approved only if the District Ranger is notified of livestock removal, prior to, or at the time, the livestock are taken off the allotment. You will be required to provide your Social Security number in order for a credit/refund to be processed.

A \$25 administrative fee will be charged for any additional bills for collection that are sent to you due to either late payment or for split billing on seasonal allotments. There is no administrative fee for the normal "split billing" on yearlong allotments. This fee will be collected to pay for the cost associated with issuing an additional bill for collection. **In the future the opportunity for split billing may be discontinued.**

In the future it will be necessary for you to write the bill number on your check prior to submitting it to the lockbox. This has become necessary to insure that your payment is credited to your account.

5. Short Age Calf Policy - any short-aged calves (calves less than 6 months old on December 31) must be removed from the National Forest by April 1, or you will need to apply for and pay grazing fees for these animals from April 1 to the time they are removed from the National Forest. Calves that are 6 months old or older on December 31, need to be paid for starting January 1.
6. Predator Control - The private use of predator control devices or programs on National Forest land must be approved by the District Ranger prior to being carried out.
7. Salting and Supplemental Feeding - the following practices will be adhered to:
 - a. Feeding of energy supplements on National Forest land will not be permitted unless a proven need to use the supplements is shown, and a detailed plan is developed and approved.
 - b. Feeding of vitamin or mineral supplements on National Forest land will be permitted if a detailed plan is approved, or if carried out in conjunction with salting.
 - c. Salting practices will be in agreement with the 10-Year Term Grazing Permit. Salt will be placed in areas of available feed to help draw cattle to them. Salt will not be placed in natural concentrations areas, which receive heavy grazing use.

V. ALLOTMENT STATUS

As we discussed at our annual permittee meeting, the Schoolhouse Mountain Allotment and Bullard Peak Allotment Decision Memos were signed September 4, 2007 and are not named in any of the pending lawsuits. The Allotment Management Plan on these allotments are in process of being updated to meet Forest Plan standards and guidelines. At the present time direction for management on these allotments will be documented in these Annual Operating Provisions.

VI. SPECIAL MANAGEMENT CONCERNS

Continue current conservative grazing intensity guidelines that include wildlife use. The forage utilization guideline will be conservative use, which is defined by Holechek, et al, 1999 as having an average utilization of 31-40 percent as measured at the end of the growing season. In order to meet the resource objectives for the allotment it will be necessary to monitor grazing intensity levels, forage conditions and water availability while livestock are present in each pasture. When there are indications that livestock are concentrating in any part of a pasture or on special sensitive areas, action will be taken to reduce the potential impacts by moving the livestock to other portions of the pasture or to another pasture on the allotment.

VII. MODIFICATIONS

If unforeseen operational conditions require a change in the management specified in this AOI please contact Mike Head or Diane Taliaferro at the Silver City Ranger District. Change requests should be made in advance so that field inspections (if necessary) can be conducted. Approval of changes to this AOI may be verbal or written, depending on the nature of the change requested. Verbal changes will be documented to your file for record keeping purposes. Failure to follow the direction provided in this AOI, or other instructions (verbal or written) of a Forest Officer may lead to adverse action against your Term Grazing Permit (Part 1, Section 3 of your Term Grazing Permit).
