District Range Specialist

Approved By: /s/ Erick Stemmerman **Date:** 01/10/2020
District Ranger

Annual Operating Instructions

I. INTRODUCTION

Kendall Brown (Forest Service) met with Marinell Poppie (permittee) on January 10, 2020 to discuss management of the Roberts Park Allotment during the current grazing year and to plan grazing management for the upcoming grazing season. These Annual Operating Instructions are the result of that discussion.

Term Permitted Livestock Numbers:

Permittee	Number & Class of livestock	Dates
Marinell Poppie	396 Cow/Calf*	03/01 – 02/28
Marinell Poppie	10 Horses	03/01 – 02/28

*See MOU for non-use

Authorized Use:

Number & Class of livestock	Dates
200 Cow/Calf	03/01 – 02/28
6 Horses	03/01 – 02/28

Pasture Rotations:

Class of Livestock	Rotation Date	Pasture
Cow/Calf	03/01 – 02-28	Frisco/Cabin/Park/Beaver/Fox
Weaned calves	11/01 – 01/31	River
Horse	03/01 – 02/28	Park (3) & Horse (3)
Cow/Calf	03/01 – 02/28	Hicks/Vigil/ Horse*

* For weaning/holding and bulls use until utilization levels are met.

The above schedule for stocking the allotment depends upon the availability of forage and water. Some flexibility in the above pasture rotation dates will be allowed for justifiable causes such as weather conditions, livestock management needs, and range conditions. If there is a need to deviate from the above pasture rotation schedule by more than 15 days, you must notify the Ranger District of the proposed change in the pasture rotation date and the reason for the change. A deviation from the above schedule of more than 15 days must be approved verbally or in writing. Credit/Refund applications will not be processed unless District personnel have been notified either in advance or at the time of removal of stock.

II. MANAGEMENT OF LIVESTOCK

You are responsible for monitoring water availability and forage utilization. It is your responsibility to move your livestock when sufficient water is no longer available or when proper forage utilization is achieved in a pasture. If water availability or lack of forage requires changes in the scheduled pasture rotation, you must notify the District Office in advance and receive permission to deviate from the schedule. You are responsible for keeping track of and maintaining control of your livestock. In the event your livestock are found to be out of the scheduled pasture, you will be required to find, gather, and return your animals to the proper pasture as soon as possible.

III. IMPROVEMENT MAINTENANCE

All range improvements assigned in the 10-year Term Grazing Permit are to be maintained in a functioning condition. In the event these improvements cannot be maintained in a functioning condition, you should notify the Range Staff at the Glenwood Ranger District to schedule them for reconstruction as funds become available. Failure to maintain your assigned range developments to functional condition is considered non-compliance with the terms and conditions of the Term Grazing Permit.

There are two critical range developments that must be maintained to standard:

- Charlie Moore pipeline must be operable and the Stateline rim tank must be full of water when cattle are present in Fox/Beaver unless earthen tank water is adequate to ensure distribution of cattle.
- Ridge Well pipeline must be operational and supplying water when cattle are in Frisco/River Pasture unless earthen tanks are adequate to ensure distribution of cattle.

No livestock use is authorized in Vigil Spring riparian enclosure.

IV. SPECIAL MANAGEMENT CONCERNS

The enclosure at Vigil Springs is functioning properly. The water lane will remain for your livestock to access water. Keep track of conditions on your allotment and make plans to reduce or remove livestock if vegetative/watershed conditions could be substantially harmed due to continued grazing.

X. MODIFICATIONS

If unforeseen operational conditions require a change in the management specified in this AOI please contact rangeland management personnel at the Glenwood Ranger District. Change requests should be made in advance so that field inspections (if necessary) can be conducted. Approval of changes to this AOI may be verbal or written, depending on the nature of the change requested. Verbal changes will be documented to your file for record keeping purposes. Failure to follow the direction provided in this AOI, or other instructions (verbal or written) of a Forest Officer may lead to adverse action against your Term Grazing Permit (Part 1, Section 3 of your Term Grazing Permit).

Open and positive communications concerning all AOI content is encouraged. Feel free to contact Kendall Brown if you have any questions or concerns.
