

# Wayne National Forest

Plan Revision Monthly  
Update  
September 2, 2020

# Ground Rules

- Purpose of monthly update is for the Revision Team to provide information and for the public to ask questions.
- Phones will be placed in listen-only mode until the Q&A portion of the call to reduce background interference.
- Time will be available at the end of the call to ask questions.
- Please contact us after the call if you have further questions.

# Planning Process Updates

- The Wayne National Forest is shifting focus to dive deeper into the Need to Change before moving forward in the planning process.
- This decision was impacted by:
  - COVID-19
  - Forest Supervisor direction

# Planning Process Updates

- Had planned to release preliminary need to change in late August → Now planning to use next few months to more fully develop this document.
- Still planning public engagement opportunities
  - Focus will shift from plan development to looking closely at the assessment, the current plan and what we've heard so far to find out what really needs to change in the current plan

# Planning Process Updates – Recap

- Shift in focus this fall from developing a draft plan to focusing on the Need to Change
- Use the next few months to dig deeper into *all* of the information we've heard throughout this process to date and how it contributes to the need to change the current plan
- Still planning on engagement opportunities that focus on this need to change the plan and are designed with public health and safety in mind
- We plan to keep you informed along the way

A photograph of a dirt path winding through a dense forest. The path is light brown and leads from the foreground into the distance. The forest is filled with tall, thin trees and lush green foliage. The ground is covered in fallen leaves and some green plants. A green rectangular box with a white border is overlaid on the lower-left side of the image, containing the word "Questions?" in white text.

Questions?
