

## **Wasatch-Cache National Forest – Administrative Correction No. 4**

### **21 September 2020**

Administrative Corrections, as defined at 36 CFR 219.31(b), may be made at any time, are not plan amendments or revisions, and do not require public notice or the preparation of an environmental document under Forest Service National Environmental Policy Act (NEPA) procedures. Administrative Corrections include the following:

- Corrections and updates of data and maps,
- Updates to activity lists and schedules as required by 219.30(d)(1)-(6),
- Corrections of typographical errors or other non-substantive changes, and
- Changes in the monitoring methods other than those required in a monitoring strategy (Sec. 219.11(c)).

This Administrative Correction falls under the categories of “corrections and updates of data and maps” and “non-substantive changes”.

#### **Background Information:**

The Forest Plan for the Wasatch-Cache National Forest was revised in 2003. In May 2019, a project proposal at the Crystal Lake Trailhead highlighted management prescriptions that did not match 2003 existing infrastructure and/or was reflect accurately on the ground. A correction to the management prescription is necessary for Forest Plan consistency. Four developed and/or developed dispersed sites and two lakes occur in the area of the the correction. The four sites and two lakes in the area include the Crystal Lake Trailhead, Washington Lake Campground and access routes, Washington Lake Group Campground and access routes, Trial Lake Campground, Trial Lake, and Crystal Lake.

The attached map illustrates the following corrections to the management prescriptions.

#### Management Prescriptions Corrections

Crystal Lake – 4.4

Washington Lake – 4.4

Trial Lake – 4.4

Crystal Lake Trailhead and access route – 4.5

Washington Lake Campground and access route -- 4.5

Washington Lake Group Campground and access route – 4.5

Trial Lake Campground – 4.5
