

Bridger-Teton National Forest

2021 SUMMER SEASONAL FIRE POSITION OUTREACH NOTICE

Apply at USAjobs.gov

October 16-October 26

Fire Positions

The Bridger-Teton National Forest will be hiring seasonal positions for the 2021 summer season starting **October 16 through October 26, 2020**. Applicants must apply to the module vacancy by selecting the specific Duty Station in USAjobs. You must have your completed application submitted by midnight EST(Eastern Standard Time) of the closing date of the vacancy. The Forest may fill up to 19 wildland fire positions, including: helitack, engines, fire module and fire cache. Housing may be available at some duty stations. More information on these positions may be found at www.tetonfires.com.

More than one position may be filled for each job announcement listed below. These positions will be temporary, not to exceed 1039 hours. All positions will be advertised on USAJOBS, www.usajobs.gov.

Successfully passing the work capacity test (WCT) at the arduous level is a condition of employment for all wildland fire positions except the fire cache laborer. The Arduous fitness (Pack) test requires completing a 3 mile hike within 45 minutes while carrying a 45 pound pack.

About the positions:

Laborer (fire cache):

The selected individual will serve primarily as an Assistant to the Teton Interagency Fire Warehouse Manager in Jackson, WY. The warehouse supports wildland fires on the Bridger-Teton National Forest and in Grand Teton National Park, and mutual aid is provided to Teton County lands as needed. Total land mass is about 1.5 million acres. The Fire Warehouse Manager works directly for the Bridger-Teton National Forest AFMO (Assistant Fire Management Officer).

Duties of the Fire Warehouse Assistant will include assembling and loading supply orders and filling out waybills, and other documentation; loading and delivering supplies to fires; organizing, stocking, and maintaining an inventory of supplies; supply ordering and tracking; unloading supplies returning from fires; forklift operation; large truck operation, and trailer pulling. The warehouse will often support multiple fires at one time and deliver supplies long distances over rough unpaved roads to remote locations. During busy periods with heavy fire loads additional personnel will assist with loading and delivery of supplies. The Fire Warehouse Assistant will manage the fire warehouse in the absence of the Fire Warehouse Manager.

On the B-T one can expect to work within a diverse fire management organization which places high expectations on individual and crew performance, and provides some unique Fire Management experience opportunities.

Title	Number of positions	Duty stations	Contact	Grade levels	Announcement number
Laborer TH2536	1	Jackson	Heidi Zardus 307.739.5079 heidi.zardus@usda.gov	WG-3	21-TEMP3-R4-2536-3DT-HC
Materials Handler TH2539	1	Jackson	Heidi Zardus 307.739.5079 heidi.zardus@usda.gov	WG-4	21-TEMP3-R4-2539-4DT-SB

Available on USAjobs.gov: October 16, 2020 through October 26, 2020, midnight, Eastern Standard Time (EST)

Helitack:

The Teton-Interagency Fire Management Program is planning to fill up to 5 Seasonal Helitack Crewmember positions in 2021. These positions are Forestry Technician GS-0462-04/05. The Vacancy Announcement and application portal can be found at www.usajobs.gov. These are seasonal positions located in Jackson, Wyoming at the Teton Interagency Helibase. They will be hired through the US Forest Service and tour of duty will be approximately early May to mid-October. Housing may be available. We are a 24 person Helitack crew based in Jackson Hole, Wyoming. We conduct our missions in support of fire and resource management for the Bridger-Teton National Forest and Grand Teton National Park. We are an Interagency crew comprised of Forest Service and Park Service personnel.

Available on USAjobs.gov: October 16, 2020 through October 26, 2020, midnight, Eastern Standard Time (EST)

Engine Modules: Fire Suppression

These Engine Modules are part of the Teton Interagency Fire Management organization. The Bridger-Teton Fire organization is made up of three zones. In addition to Type 4 and/or Type 6 engines, each zone is comprised of one Fire Prevention Technician, a Fuels AFMO, an Operations AFMO and a Zone FMO. A good working relationship exists with County VFD's. The engine modules consist of 4 permanent staff (Captain, Engineer, Assistant and Senior FF) and 1-3 seasonal crewmembers. Seasonal employees may be provided government housing.

A normal fire season for the area is late July thru September. Fires on the Bridger-Teton National Forest have been reported as early as May and as late as December. Seasonal crewmembers can expect to start in mid-May to early June and work into October. These engine crews are highly motivated, with individuals who desire to work long, hard hours to complete any assignment. Expectations for the entire crew are high. Fire assignments include local Initial Attack to off-Forest, Extended Attack large fires. Assignments can be with the Engine or with the Teton Interagency Type 21A hand crew. If not assigned to a fire, engine fire crews can be found out in the Forest prepping prescribed burn units, carrying out fuel reduction treatments or completing various other projects for the Districts.

Teton Wildland Fire Module:

The Teton Wildland Fire Module (WFM) is a mobile, self-sufficient and tactically skilled resource that is used in a variety of wildland fire and fuels related work. The primary mission of the module is to provide a skilled, efficient workforce to accomplish the full range of wildland fire management tasks including prescribed fire preparation and implementation, managing fire for resource benefit, fuels reduction projects, hazard tree removal, and wildland fire suppression. The module consists of one GS-8 Module Supervisor, one GS-7 13/13 Assistant Supervisor, two GS-6 13/13 Squad Leaders, one GS-5 13/13 Senior Firefighter and five to seven crew members.

While working on Forest and Park projects, crewmembers routinely work long days that include hiking, heavy lifting, and extensive use of hand tools, chainsaws, and other equipment. Some projects are away from the duty station requiring the crew to camp at the project site. The Module is also available for wildfire assignments using a wide range of tools and skills to complete a variety of fire management objectives. Assignments may include ignition, suppression, monitoring, and data collection utilizing everything from chainsaws and drip torches to computers, weather stations, and motion-sensing cameras. Fire assignments last up to 18 days, prior to a day off, and are generally spent camping near the fire with few amenities. The crew participates on the Teton Crew, a 20-person Type 2 Initial Attack crew that is assembled for local and national assignments throughout the season. Safety and training are priorities for the crew. The Teton Fire Module is stationed at the Blackrock Ranger Station compound on the Buffalo Ranger District, approximately 9 miles east of Moran Junction, Wyoming.

Physical Training

Whether on project work or wildfires, crewmembers routinely are hiking on steep mountain terrain carrying approximately 45 lbs of gear. Due to the physical nature of this position it is imperative that crewmembers are in excellent physical shape to prevent injuries. A physical evaluation will be conducted the first week of work which consists of the pack test (required for position), sit ups, push-ups, pull-ups, 1 ½ mile run and hiking Rosie's Ridge (800' elevation gain in 0.5 miles). The goal of the Teton Fire Module physical fitness training program is to prepare firefighters for the rigorous duties of wildland fire work and crew safety. Each member of the Teton Fire Module should arrive on the first day of work in top physical condition. Blackrock Ranger Station elevation is at 6890 feet, PT runs and hikes involving vertical climbs up to 1000 feet are common. Applicants are encouraged to maintain a rigorous physical training program before the season starts to prepare for the daily physical fitness training with the crew. Our workouts include stretching, strength training, power hikes, and 3 to 5 mile runs over varied terrain. More information [here](#).

About the Forest:

The 3.4 million acre Bridger-Teton National Forest is the second largest National Forest in the United States outside Alaska. It lies in Western Wyoming, adjoining Yellowstone and Grand Teton National Parks and within the Greater Yellowstone Ecosystem, the largest remaining area of undeveloped land in the 48 conterminous United States. It is noted for its scenery and natural features, large and diverse wildlife populations, and habitat for threatened and endangered species. There are six districts on the Forest: Kemmerer, Afton, Big Piney, Pinedale, Jackson and Blackrock. The Supervisor's Office is in Jackson. See below for description of duty stations.

About the Duty Stations:

Kemmerer:

The town of Kemmerer is a small community located high in the rolling hills of Western Wyoming in the Green River Basin along the Hams Fork River. The elevation is 6,927 feet with a population of approximately 3,126. The Kemmerer area offers an abundance of fishing, hunting, hiking, wildlife watching, and snowmobiling. Golfers also enjoy a challenging nine-hole golf course set near the Hams Fork River. Several benefit tournaments are conducted throughout the summer. Kemmerer offers four private quarries where you can dig your own fossils, and is the home of Fossil Butte National Monument, an 8,198 acre natural area that was established in 1972 and many historic cut-off trails of the Oregon, Mormon and California Trails. Housing may be available.

Afton:

The Greys River Ranger Station is located in Afton, which is the largest town in Star Valley. Afton has a population of about 2,000. Star Valley is 60 miles long by 5 miles wide, located between the Idaho-Wyoming border to the west and the Salt River Range on the east; town elevation is 6,134 feet. The town boasts the largest Elkhorn Arch in the world spanning 75 feet and containing over 3000 antlers donated by the Wyoming Game and Fish Department. Nearby Periodic Spring, which is an extremely rare cyclic stream or cold-water 'geyser', is a national forest visitor attraction, and forest access begins just east of town. Groceries and entertainment options are within walking or biking distance. Housing may be available, and a district bike makes getting around handy.

Big Piney:

Big Piney is a small community of about 800 people and is located on Highway 189, 45 miles south west of Pinedale and 90 miles south of Jackson, Wyoming. Big Piney is a rural community with an economic focus on ranching and oil and gas production. Although small, the community offers a multitude of benefits with a great library, fitness center, bowling alley and movie theater. Located just 30 minutes east of the Wyoming Range and 10 minutes from the Green River the fishing, hiking, hunting and all other outdoor opportunities are abundant. Government housing is available.

Pinedale:

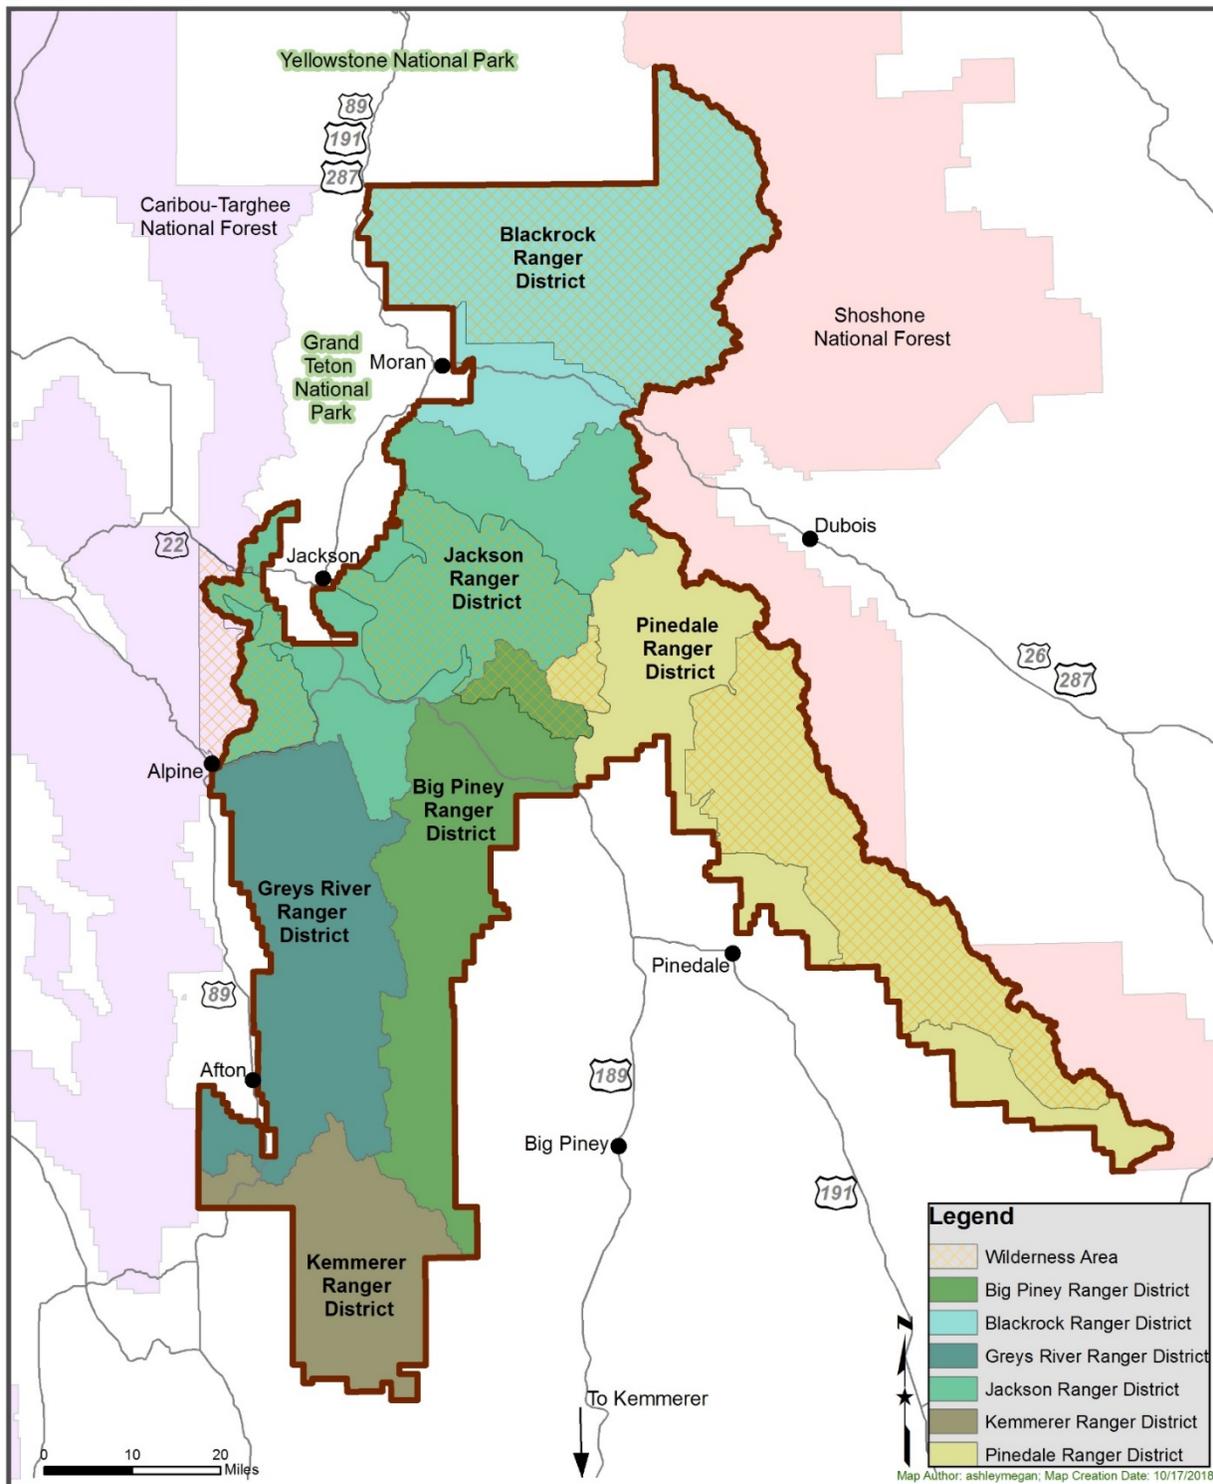

The Town of Pinedale sits at an elevation of 7,200 feet at the base of the Wind River Range, providing amazing views of the Continental Divide. The Pinedale Ranger District, located in Pinedale WY, is 80 miles southeast of Jackson, WY and 100 miles North of Rock Springs WY. At 830,000 acres in size, the Pinedale Ranger District offers a wide range of recreation settings and opportunities for both locals and visitors, including the entire 428,169-acre Bridger Wilderness. With over 2,300 lakes, 48 peaks above 12,500 feet (including Gannet Peak, the highest peak in Wyoming), and 500 miles of trails, the Bridger Wilderness offers internationally-recognized backpacking, fishing, climbing, hunting, and horseback riding opportunities. Outside of the Wilderness you can find glacial-carved lakes providing excellent opportunities for developed and dispersed camping, fishing, boating, hunting, horseback riding, and motorized recreation. Housing may be available.

Jackson:

The Town of Jackson is the county seat of Teton County and the only incorporated municipality in the county. "Jackson Hole" as it's often called, refers to the whole area which is a 50 mile long valley surrounded by high mountains. Jackson is a popular tourist destination because of its proximity to Yellowstone & Grand Teton National Parks, unmatched scenic beauty, world-class skiing, and western character. For tourism information, including listing of lodging, restaurants, and shopping, please contact the Jackson Hole Chamber of Commerce at 307-733-3316 or on the web at www.jacksonholechamber.com. This spectacular valley in the mountains offers residents and visitors alike an unparalleled array of outdoor activities for year-round enjoyment. From world-class skiing, snowmobiling, backcountry touring and dog sledding in the winter to hiking, rafting, fly fishing, paragliding, mountain biking and rock climbing in the summer. Government housing may be available.

Moran:

The Blackrock Ranger Station, formerly Buffalo, is located 40 miles North of Jackson and 8 miles east of Moran, Wyoming. The District manages approximately 750,000 acres of National Forest System lands, 585,486 acres of which are within the Teton Wilderness. The area is extremely beautiful with the Teton Range in full view from most of the District. There is an abundance of wildlife such as moose, elk, mule deer, grizzly bear, black bear, and trumpeter swan. The closest towns to Blackrock are Jackson and Dubois, each approximately 40 miles away. With a population of approximately 8000, Jackson is a full service community with shopping, hospital, movie theaters and an airport. Dubois is much smaller, with a population of 2,000, and has basic services. The nearest major city is Idaho Falls, (2 hour drive) with a population of 150,000. Government housing is available.

The map shows the six duty stations on the Bridger-Teton National Forest.
