NOTES :

Col. A: FS costs incurred as part of proposal implementation. Coordinate with FS to identify any FS cost for items in Col. A.

Col. B: Title II funding requested to implement the proposal.

Col. C: Matching funds being contributed by proponent or third parties. Proposals funded with a Participating Agreement will require a minimum 20% match.

Col. D: Sum of columns A, B, and C for each individual row.

Row A: Costs associated with project planning, not project implementation, such as assessment of miles of trail needing maintenance. Assessments and planning needed to develop a specific proposal. For Col. B: proponents must request permission in advance to request Title II funds to complete NEPA/CEQA analyses, as this is expected to be completed prior to proposal submission.

Rows B, C, D, and E: cost associated with environmental compliance and project design. Proponents must request permission in advance to request Title II funds to complete NEPA/CEQA analyses, as this is expected to be completed prior to proposal submission.

Row G: Costs associated with preparation of contract or agreement instruments used to implement the proposal. Contracts used to complete projects have special provisions; contact the FS to identify these early in the process.

Row G: Costs associated with administration of contract or agreement instruments used to implement the proposal.

Row H: Estimated value of any contracts/agreements used to implement proposal. Contracts/agreements used to complete projects have special provisions; contact the FS to identify these early in the process.

Row I: Cost of salaries to implement project

Row L: Examples include overhead charges from other partners, vehicles, equipment rentals, travel, etc.

Row K: Costs associated with performing monitoring described in Items 24a, 24b, and 24c. Amounts should be similar between Item 24 and Row K.

Row N: Forest Service indirect costs, including contracting/grant officer costs if needed.

8. Project Location:	
a. National Forest(s): Helena-Lewis and Clark	b. Forest Service District: Judith Musselshell
c. Location (Township-Range-Section) See map	

9. Project Goals and Objectives:
Reduce concentrations of Leafy Spurge and limit spread on 1000 to 1500 acres of Forest land.

10. Project Description:

a. Brief: Utilize biological control (goat grazing) to reduce levels of leafy spurge to allow other biological (bugs) and chemical treatments to be more effective.

b. Detailed: The project area has large infestations of leafy spurge. Goats have been used for the several years on approximately 1500 acres to reduce infestations. Transects in the project area shown a reduction in canopy cover of spurge. Flee beetles and moths introduced to control leafy spurge are present in most sites in the project area. It is hoped that by decreasing the stand density of the infestation that the insects will have a greater impact on the weed population.

<p>10. Project Description:</p> <p>a. Brief: Control noxious weeds along approximately 118 miles of Forest roads by use of herbicide.</p> <p>b. Detailed: The project would involve herbicide application to control weeds 35 feet either side of approximately 118 miles of Forest roads. Roads are one of the main vectors for the spread of noxious weeds due to vehicle travel. Controlling weeds in these corridors helps to prevent weeds from being spread to more remote locations. These roads are regularly treated by Forest weed crews or hired contractors. This project would use a contractor already under contract with the Forest to conduct the work. This will free up District weed crews to focus their efforts on more remote infestations within the District.</p>
