Job Announcement
Utah Conservation Corps & USFS Ashley National Forest
Recreation Technician Crewmember

Apply by: April 19, 2021 (or until filled up to May 1, 2021)

Position Location: 85 W. Main Street, Duchesne, Utah

The Utah Conservation Corps (UCC) in partnership with the Ashley National Forest is advertising a Forestry Technician (Recreation) Crewmember. This is a 4 month (up to 16 weeks) full-time work experience from approximately mid-late May through mid-August 2021. The Utah Conservation Corps (UCC) is Utah's award-winning, and nationally recognized statewide Conservation Corps headquartered in Logan, Utah at Utah State University's main campus. The UCC has been Utah's largest environmental AmeriCorps program since 2001, completing service work on public lands, in communities, and with various organizations throughout the state. UCC will recruit and hire the selected RA candidate providing personnel and Human Resources (HR) needs during the placement. https://ucc.usu.edu/

If you have questions about this Forestry Technician (Recreation) Crewmember opportunity, please contact:

- Regular and reliable attendance and dependability.
- Strongly prefer experience in working outdoors
- Excellent written and oral communication skills.
- Excellent organizational and computer skills.
- Ability to commit to the full term of service.

**The Ashley National Forest**

The Ashley National Forest encompasses about a million and a half acres in northeastern Utah and southwestern Wyoming. The Forest lies in three geographical areas: the east-west range of the Uinta Mountains, the Green River Basin, and the Tavaputs Plateau. Elevations range from 6,000 feet to 13,528 feet.

Steep canyons, high mountain peaks, glaciated basins, large open meadows, and desert badlands produce a rich diversity of vegetation and wildlife. The grasses and shrubs of the high mountain desert are replaced by pinyon and juniper as the elevation rises. In mid-elevation areas, aspen dominates and becomes mixed with conifer. Higher up, the vegetation changes to conifer forest composed of ponderosa pine, lodgepole pine, fir, and spruce. Wildlife is abundant. Larger species include black bear, mountain lion, moose, elk, mule deer, pronghorn, mountain goats, and bighorn sheep.

Neighboring lands include the Uinta and Ouray Indian Reservation to the south, the Uinta-Wasatch-Cache National Forest to the west and north, and a mixture of Bureau of Land Management, State of Utah, and private lands to the east and southeast. Compared with other National Forests, relatively few small tracts of private land lie within the Ashley's boundary.

The High Uintas Wilderness, established by Congress in 1984, comprises nearly one-half million acres in the Uinta-Wasatch-Cache and Ashley National Forests. Within the wilderness, elevations range from 8,000 feet to 13,582 feet at the top of Kings Peak, the highest mountain in Utah. The Uinta Mountain range runs east to west, from the Wasatch Mountains into Colorado. Pre-Cambrian rock formed from sediments laid down 600 million years ago makes up the core of the range. Glacial activity carved deep canyons and left a spectacular
landscape of rolling, treeless peaks and stratified ridges interspersed with broad meadows and numerous lakes.

The Flaming Gorge National Recreation Area lies in the northeast part of the Forest. Flaming Gorge Reservoir extends almost 90 miles into Wyoming and offers outstanding fishing and boating opportunities. Record-breaking German brown trout and large lake and rainbow trout have been taken from its waters. The Flaming Gorge National Recreation Area has three marinas and many campgrounds, some of which are open year-round.

The Green River below Flaming Gorge Dam is a world-famous blue-ribbon trout stream. The Little Hole National Recreation Trail parallels the river 7.3 miles from the Dam to the Little Hole Recreation Complex.
