

**Lower Kootenai GA Workgroup Meeting Notes**  
**Bonnors Ferry, ID**  
**11/25/03**

Attendees: Public - Patty Perry, Bob Blanford, John O'Conner, Sandy Ashworth.  
Forest Service - Gary Ford and Mike Herrin

Gary Ford gave an overview of the AMS & how we got to this point with Revision & the 7 major Revision Topics

The group discussed how the Revision Topics can be influenced by some other management criteria such as grizzly bear management, caribou management, lynx management, IRA's, Properly Functioning Conditions, road densities. The workgroup would like to have more detail about management of these criteria for future meetings (most likely 2 meetings away when they deal with Veg, Fire Risk & Timber Production as a lumped group), the work group also requested a base map of open & closed roads in the GA with section lines, streams & Forest boundary. The detail of the management criteria would just be more finer details than what was provided in the GA Map Packets that have been given out at previous meetings. Mike will work on the map & getting more detail of management of the listed subjects above.

Patty Perry offered to help with notification of meetings to the workgroup and Mike and Patty will work on this.

Next meeting is Dec 8, 2003 at 6:30 pm at the Library. The FS will give an overview of Desired Condition and an update of progress on the management detail that was requested. We will also talk about how we want to work the upcoming meetings on the Revision Topics and how we get to Desired Conditions, we will also talk about setting fixed meeting dates (ie what day or days of the month do we want to meet).
