## BOULDER CREEKS GEOGRAPHIC AREA

### Setting

The area is located between the Town of Eldora, Rollins Pass, and 4th of July Campground. It contains a mix of upper montane, subalpine, and alpine plant communities consisting of aspen, Douglas-fir, limber pine, lodgepole pine, Engelmann spruce, subalpine fir, krummholz, grass, tundra, and rock outcrops. Elevations range from 8,400 to 11,987 feet. Rollins Pass, the Town of Eldora, Eldora Ski Area, the Moffat Road, Yankee Doodle and Jenny Lakes, East Portal, the Historic Hessie Townsite, and the 4th of July and Hessie trailheads are key geographic features in the area.

A significant portion of the land in this area (7,074 acres) is privately owned. Landownership patterns in the geographic area are extremely fragmented.

Access into the area is provided via the Eldora, Fourth of July, East Portal, and Moffat Roads. All are county roads suitable for passenger car travel. An extensive network of secondary roads and numerous trails provide access to other portions of the geographic area.

### Goals and Desired Conditions

Emphasize motorized and nonmotorized recreational opportunities, downhill skiing, and the protection of areas recommended for addition to the Indian Peaks Wilderness.

Restore, enhance, or maintain mountain grassland and aspen communities. Emphasize old-growth recruitment and retention. Manage vegetation to achieve desired flora and fauna goals in the area. The fire suppression strategy varies from direct control to perimeter control (see the *wildland fire management strategy map*).

Manage the area for year-round recreational use. Minimize recreational impacts to riparian areas and visual corridors by considering the implementation of designated dispersed campsites at Lost Lake and along the Rollins Pass Road. Improve the quality of recreational opportunities and reduce impacts to riparian areas by reconstructing and relocating the western portion of the Jenny Creek trail.

Reduce impacts to known historic sites, restore meadow and wetland habitats, and eliminate congested roadside parking by developing a trailhead with safe parking between Eldora and Hessie for the Devils Thumb trail. This could include actions like working with Boulder County to address current parking issues along the main road, addressing sanitation concerns, and perhaps developing a trail for people to use to get from the parking area to the Devils Thumb trail. Other actions that might be considered could be to designate dispersed campsites along the South Fork of Middle Boulder Creek and to develop interpretive signing for the Hessie Townsite.

Consider actions that limit use at established wilderness trailheads (Hessie and Fourth of July) to established capacities. This could include controlling use levels by limiting the number of parking spaces. Other possible actions here and at the East Portal trailhead include improved signing and the installation of toilets.

Pursue rights-of-way for the Devils Thumb Trail, the Guinn Mountain and Jenny Creek Ski Trails, and the Jenny Creek Road. Resolve access issues associated with the Caribou Flats Road network and the East Portal Trail System. Provide safe public access at East Portal by considering appropriate trailhead and parking facilities that address the current safety concern relating to visitors crossing the railroad tracks to access the South Boulder Creek trail (FDT 900).

The travel management strategy for the area will be to allow passenger car travel to key access points on a network of county roads suited primarily for passenger car travel. Motorized travel will be allowed on some of the 4WD routes that currently exist, and most of the trails in the area will be retained. Some road and trail closures and obliterations can be expected. Routes in the area that may be considered for possible closure include the western portion of the Jenny Creek Road between its intersection with FDR 502.2 and Yankee Doodle Lake and the Chittenden Mountain Trail. Most decisions on these and other specific roads and trails to keep or to close will be made during travel management implementation.

Consolidate landownership patterns by disposing of isolated tracts of National Forest System land in and adjacent to the town of Eldora. Also consider acquiring isolated, undeveloped patented mining claims west of Eldora, in the 4th of July Valley, and adjacent to the Indian Peaks Wilderness.

Manage recreational uses and road and trail networks to reduce erosion or deterioration of riparian areas and watershed conditions. Evaluate road and trail impacts to aquatic and riparian ecosystems during travel-management planning. Cooperate with other agencies to determine the presence or absence, status, and genetic purity of greenback cutthroat trout in area streams.

#### *Management Area 8.22 (Eldora Ski Area)*

Continue authorization of downhill skiing at Eldora Ski Area under their special-use permit and master development plan. Further improvements of the base facilities, infrastructure, and ski runs within the current boundary are expected. There will be no expansion of the area outside the boundaries currently specified in the Master Development Plan. It is anticipated that actual use levels will increase. There will, however, be no increase in the established maximum daily capacity.

Work and cooperate with the Eldora Mountain Resort to develop a sustainable vegetation management plan for the Eldora Ski Area and to formalize access through the ski area for the Jenny Creek crosscountry ski trail.
