

INTRODUCTION	4
BACKGROUND ON THE FIRES	4
I. EFFECT OF FIRES ON FOREST OPERATIONS	6
A. Number and size of fires compared to other years.....	6
B. Impact on Personnel.....	7
C. Impacts on work accomplishments	8
II. EFFECT OF FIRES ON NATURAL RESOURCES	9
A. BEAVERHEAD FOREST PLAN	11
1-1 Elk Population Trend.....	11
1-2 Elk Winter Forage	11
1-3 Big Game Population Trend (moose, deer, bighorn sheep)	11
1-4 Winter Range Condition/Trend (moose, deer, bighorn sheep).....	11
1-5 Wildlife Habitat Improvements.....	11
1-6 Sagegrouse population numbers.....	11
1-7 Trumpeter swan nests	11
1-8 Threatened and Endangered Species	12
1-9 Cavity nesting habitat management.....	14
1-10 Habitat effectiveness - security cover/road closures	15
1-11 Wildlife – Old Growth Habitat.....	17
2-1 Fisheries habitat improvement.....	18
2-2.5 Habitat & population response to improved conditions	21
2-3 Riparian Area Function	21
3-1 Watershed – impacts of management activities on sediment.....	22
3-2 Watershed – impact of harvest on watershed standards.....	26
3-3 Watershed /Soils – effectiveness of Best Management Practices	26
4-1 Soils – effects of activities on soil displacement and organic residue.....	26
5-1 Recreation – levels of dispersed/developed/wilderness use.....	29
5-2 Recreation – Wilderness use compliance with management direction	31
5-3 Roadless character – changes in roadless acres.....	32
5-4 Recreation – facilities for people with disabilities	32
5-5 Heritage Resources – Historic Preservation Act	32
6-1 Range Forage Utilization – number of AUM’s.....	35
6-2 Range Improvement construction.....	36
6-3 Noxious Weed Infestations and Control.....	37
6-4 Allotment Management Plan Updates.....	39
7-1 Timber – Volume of timber offered (actual vs. projected).....	39
7-2 Timber – Volume and area harvest by method and management area.....	39
7-3 Timber – Change in suitable base from ground truthing.....	39
7-4 Timber – Cultural Treatments	39
7-5 Timber - Accomplishment of Regeneration.....	39
7-6 Timber – Assessing Silvicultural assumptions and practices.....	40
8-1 Facilities, Forest Road Construction	42
8-2 Facilities, Road Management	42
8-3 Facilities Trail management	43
8-4 Facilities, Road Maintenance	44
9-1 Protection from Insect and Disease	44
10-1 Economics, predicted cost vs. experienced costs for timber sales.	48
10-2 Economics, predicted values for timber	49

10-3 Economics, program budget vs. actual dollars received	49
11-1 Adjacent Lands, Resources, Communities	49
11-2 Adjacent Lands, effect of other agencies and private on Forest mgt	52
11-3 Emerging issues and changing social values	52
12-1 Allocations, Management Area Changes	52
12-8 Data base, Compartment Exams	52
B. DEERLODGE FOREST PLAN	53
1-1 Use and Condition of Recreation Facilities	53
1-2 Spectrum of dispersed recreation opportunities	54
1-3 ORV Compliance and damage	54
1-4 Hunter Recreation	54
1-5 Condition of significant cultural sites	55
2-1 Change in roadless resources	59
3-1 Wilderness - trail conditions, encounters	59
4-1 Elk, mule deer, moose, mountain goat populations	60
4-2 Elk, mule deer, moose and goat habitat	60
4-3 Land use activities affecting big game	61
4-4 Elk security	61
4-5 Indicator species – Bighorn Sheep habitat	62
4-6 Indicator species – lodgepole pine, mountain grassland, evergreen shrub, riparian ..	62
4-7 Old Growth Habitat	64
5- 1 Pools formed and population numbers – Westslope Cutthroat Trout	64
5-2 Intragravel sediments and fish numbers	68
5-3 Aquatic Invertebrate Populations	68
6-1 Streamside cover for fish	69
6-2 Riparian Rehabilitation	69
7-1a Range- utilization in transitory range	69
7-1b Range – Utilization of available forage by livestock	70
7-2 Range – Allotment Management Planning	70
7-3 Weed Infestations	70
7-4 Range condition and trends	71
7-5 Permit Compliance	72
8-1 Timber – regulated volume prepared for sale	72
8-2 Timber assumptions: volume, condition, etc	72
8-3 Silvicultural assumptions and practices	72
8-4 Size of openings	73
8-5 Regenerated yield projections	73
8-6 Reforestation practices, planting targets	73
8-7 Timber stand improvement thinning program	73
8-8 Lands suitable for timber production	73
9-1 Compliance with Local, State and Federal water quality standards	74
9-2 Riparian rehabilitation projects	76
9-3 Productivity changes in sensitive soils	76
9-4 Water availability, water rights	78
10-1 Mineral activities	78
11-1 Insect and disease infestations	78
11-2 Air quality	82
11-3 Fuel Treatment Outputs	83

11-4 Wildfire Acres	83
12-1 Facilities - Road Construction	83
12-2 Facilities - Road Management.....	83
13-1 Economics – timber sale unit cost	84
14-1 Effect of management on other agencies and communities	84
15-1 Effects of emerging issues and changing social values.....	86
15-2 All Resources – lands not meeting physical or biological characteristics.....	86
16-1 Research.....	86
