

RANGELAND PROJECT DECISION PRIORITIES

To meet Forest Plan goals in range, riparian, wilderness, soils, watershed, and sensitive plants, site-specific conditions must be analyzed. Analyses can then be used to implement strategies based on management direction. Date of completion is listed below, but will be dependent upon the level of funding and support. The following table lists the order of priority for allotments, separated by District. Range allotment maps for Lower Trinity and Mad River Ranger Districts are shown in Figures F-1 and F-2 on the following pages.
