

Watergauge Woodland Thinning Proposal - 508 Acres Watergauge Road Prescribed Burn Unit - 1,000 Acres

Note: Primary Project Activities Include: Upland Woodland Thinning and Rotational Prescribed Burning. Thinning units are located along ridgetops and southerly aspects. There will be no riparian treatments associated with this project with exception of potential bog restoration activities. Other potential restoration project activities include: soil and water rehab, invasive species eradication and hemlock wooly adelgid treatments (in vicinity of bog).
