

Working for the Forest Service

What is the Forest Service?

The U.S. Department of Agriculture Forest Service is a Federal agency that manages public lands in national forests and grasslands. The Forest Service is also the largest forestry research organization in the world, and provides technical and financial assistance to state and private forestry agencies. Gifford Pinchot, the first Chief of the Forest Service, summed up the purpose of the Forest Service—"to provide the greatest amount of good for the greatest amount of people in the long run."

The Forest Service has 155 national forests and 20 grasslands across the United States, Puerto Rico and the Virgin Islands.
