Management Area Map

Management Area Legend

- | | | | |
|-----|--|-----|--|
| 1 | Mixed even-aged forest with a large aspen component; wildlife species emphasis on grouse as well as other early successional species; roaded recreation environment, roads generally open except for seasonal closures. | 6.2 | Even-aged hardwoods, logging activities limited to one decade every 40 years; associated wildlife species, particularly big-game; semi-primitive non-motorized recreation emphasis between harvesting decades. All roads closed. |
| 2 | Uneven-aged hardwood forest; wildlife associated with shade tolerant vegetation, particularly non-game species; roaded recreation environment with roads generally open except for seasonal closures. | 6.3 | Strong wildlife emphasis with interspersed wildlife openings, ponds, potholes, conifer stands, and hardwood stands; emphasize riparian wildlife species such as, waterfowl and warm-water fish; semi-primitive motorized recreation environment with roads closed. |
| 3 | Even-aged hardwood forest; associated wildlife species, particularly big-game; roaded recreation environment with most roads closed except for seasonal openings. | 6.4 | Area designated and managed as the Allegheny National Recreation Area. |
| 5 | Area designated Wilderness and managed to protect wilderness values. | 7 | Large-scale developed recreation areas or resorts. |
| 6.1 | Forest area managed primarily for semi-primitive motorized dispersed recreation opportunities and wildlife species such as turkey, bear, cavity-nesting birds and mammals. Most roads closed except for seasonal openings. | 8 | Protection and management of unique scenic, research, or natural areas having National significance. |
| | | 9.1 | Forest area managed with minimal investments only to protect the environment and the incidental forest user. |
-  Recreation Facility Construction/Expansion. The number within the symbol is keyed to a brief facility description in Table 4-3 on page 4-6 of the Final EIS.
