

Reds Meadow Pack Station

Operating Plan

Appendix BB

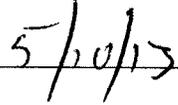

2013 ANNUAL OPERATING PLAN

When signed by both the Special Use Permit Holder and the Forest Service authorized officer, this operating plan becomes part of the permit (Clause III. B.). Refusal to sign this operating plan does not relieve Holder of adhering to all provisions. The Holder is responsible for those portions of the operating plan that describe the actual business operation, Part V, Operations. The Forest Service is responsible for the remaining sections and exhibits. The authorized officer must approve in advance of operations any proposed changes to this operating plan. The authorized officer will make the final determination on issues involving resource protection and public health and safety.

I. PERMIT HOLDER and FOREST SERVICE REPRESENTATIVE(S)

The Representative(s) of: **Red's Meadow Resort, Inc.**
is: **Robert H. Tanner**
Authorization ID: **MLD070007R**
Address: **PO Box 395**
Mammoth Lakes, CA 93546
Phone: **760-934-2345 (office and FAX)**
760-937-1224 (cell)
Email: **rmeps395@aol.com**
Web address: **www.redsmeadow.com**

The Forest Service representative with responsibility for this special use permit is/are:

AUTHORIZED OFFICER:

Ed Armenta, Forest Supervisor, Inyo National Forest

DELEGATED AUTHORIZED OFFICERS:

District Ranger, Inyo National Forest: **Jon C. Regelbrugge**, Mammoth and Mono Ranger Districts

District Ranger, Sierra National Forest: **Ray Porter, High Sierra Ranger District**

Permit Administrator: **Michael Morse**, Mammoth and Mono Ranger Districts

II. GENERAL OPERATION REQUIREMENTS

A. This operating plan includes the season and level of use for all pack stock outfitter guide activities, guidelines and limits for incidental grazing, approved use of National Forest system and non-system trails, roads and routes, and assigned use allocations.

B. The Holder shall carry out the provisions of this operating plan including Exhibits 1-11, and shall require his employees, and agents to do likewise.

III. COURT ORDERED REQUIREMENTS

The following requirements are set forth in the May 8, 2008 Order for Injunctive Relief.

A. Injunctive Relief, Item 3

1. 3a and 3b. *The Forest Service will be solely responsible for authorizing pack stock services and will issue uniquely numbered permits in the name of the client who is the group leader. The permit will include the group leader's address.*
2. 3b. *The permit will specify the group's entry and exit dates, entry and exit trail heads, destination, party size and type of trip. Continue to use the Wilderness Permit Reservation Form to reserve entry quota. All information requested on the form must be provided for the reservation or permit to be issued. Incomplete information will delay the reservation or permit issuance.*
3. 3c. *No permits will be issued directly to commercial permittees, pack stations, or pack station employees, except in the case of full-service trips where pack station personnell accompany the trip for its duration.*
4. 3d. *Commercial pack stock permittees shall record all services on tally sheets, including, for each overnight trip, permit number, service start and end dates, entry and exit trail heads, number of clients, number of overnight employees, number of riding stock, pack stock, type of trip (including whether one- or two-way, campsite or drop-off/pick-up spot used, number of service days used, location of any grazing (including the number of stock grazing), and the number of days in a National Park (if applicable). Actual*

use shall be reported on the provided tally sheets (Appendix DD). Report all use on this sheet, including wilderness overnight and day use, stock drives, mustang viewing trips, non-wilderness overnight and days use.

5. 3e. *Each pack station shall verify that its client has a valid wilderness permit before providing any service.*

6. 3f. *By the 15th of each month, each permittee shall submit to the Forest Service records of all services provided during the prior month.*

B. Injunctive Relief, Item 4.

1. 4a and 4b. *Overnight use will not exceed 95% of the average use for the time period 2002-2004 and that wilderness day use will not exceed 3,690 service days. Use allocations are displayed in Section III of this operating plan.*

2. 4c. *None of the temporary pool of service days authorized in the 2001 Plan may be allocated to providers of commercial pack stock services for the purpose of providing such services.*

3. 4d. *Camp set-up and take-down, and resupply trips shall be debited against service days by multiplying the number of stock needed to provide the service for such trip by the number of days needed to accomplish the service.*

4. 4e. *Day rides, including rides from overnight camps during full-service trips, may occur only on approved system trails as identified on Table 2.26 of the Final Environmental Impact Statement for the 2005 Plan.*

C. Injunctive Relief, Item 5

1. 5a. *The commercial trailhead quotas in the 2001 Plan shall be implemented at the beginning of the 2008 operating season, and complied with.*

2. 5b. *Case-by-case itineraries may be approved in accordance with the criteria set forth in the 2001 Plan. Submit requests at least two weeks prior to date of entry. Indicate the trail requested, name and number in the party, number of pack and riding stock, entry and exit dates, type of trip.*

3. 5c. *In addition to implementing the trail head quotas referenced in Paragraph 5.a., the Forest Service shall limit each pack station's use of destinations in areas designated as "red" on the Forest Service's "Use-Overlap-Impact Analysis", to 80% of historic use. See Section VI of this operating plan for your specific allocation and Exhibit 7 for all red areas and their use allocations.*

D. Injunctive Relief, Item 6.

1. *For all types of trips authorized under the Order, pack stock shall be limited by a 1:1.5 Stock-to-person ratio. Accordingly, for every multiple of 3 persons (including pack station personnel accompanying or otherwise servicing such a trip), 2 pack animals shall be allowed in addition to 3 riding stock. Pack station employees are included in the total party size with respect to the stock to person ratio.*

E. Injunctive Relief, Item 7

1. *The Forest Service shall prohibit all pack stock grazing and entry in occupied Yosemite Toad breeding and rearing habitat throughout the breeding cycle (through metamorphosis). In addition, during the breeding and rearing cycle, the Forest Service shall prohibit any pack stock entry or grazing within 100 yards of any permanent water source within occupied Toad habitat.*

2. *The Forest Service will notify Holders of the period of closure after the California Department of Water Resources Bulletin 120 is issued May 1.*

F. Injunctive Relief, Item 8

1. 8a. *The Forest Service shall implement the 10,000/10,400 ft. elevational campfire restrictions set forth in the 2001 Plan and prohibit exceptions to those elevational restrictions. Where a destination straddles the closure line, the collection of wood below the line for use above the line is prohibited.*

2. 8b. *The Forest Service shall prohibit the packing in or use of wood or any other solid fuel in areas closed to campfires.*

3. 8c. The Forests did complete an analyze campsite inventory data for all campsites within the wildernesses. Where firewood availability reaches the Court ordered thresholds, campfires will be prohibited. This did result in campfire restrictions in areas below the 2001 Wilderness Plan identified elevational closures .

The Forest Service did notify holders of changes affecting 2013 operations.

G. Injunctive Relief, Item 9

1. *All designated campsites, stock holding areas and spot and dunnage loading and unloading areas shall be allowed no closer than 100 feet from water.*

H. Injunctive Relief, Item 10

1. The Forest Service shall prohibit grazing in meadows containing streams that are rated as Functional-at-Risk (FAR) with downward or unknown trends.

IV. GENERAL PROVISIONS and FOREST SERVICE REQUIREMENTS

A. Permit Administration

1. The Forest Service will issue all uniquely numbered wilderness permits in the name of the client who is the group leader.
2. The permit will specify the group's entry and exit dates, entry and exit trailheads, destination, party size, type of trip and the address of the group leader.
3. For spot or dunnage services, the permit shall be issued to the client group leader.
4. For all expense trips, including, but not limited to, full service, traveling, basecamp and hiking with pack stock, where pack station personnel accompany the trip for it's duration, the permit shall be issued the pack station.
5. For all expense trips where the pack station employees are camping in a different location than the clients, both the guests and the employees shall have a copy of the wilderness permit.
6. It is the pack station's responsibility to verify that its client has a valid wilderness permit before service is provided.
7. Tally sheets, **due by the 15th of each month**, shall record the permit number, name of party, service start and end dates, entry and exit trailheads, number of clients, number of overnight employees, number of riding stock, number of pack stock, type of trip (including whether one- or two-way) campsite or drop-off/pick-up spot used, number of service days used, location of any grazing, number of stock grazed and the number of entire days spent in a National Park. (Exhibit DD of the Resort Supplement)
8. By January 21st of each year, the Forest Service will make available to the public an accurate annual compilation that includes all tally sheets and permit records from the previous calendar year.
9. Itineraries approved on trails requiring case by case approval under the 2001 Wilderness Management Plan shall be documented contemporaneously and made publically available.

B. Resource Protection

1. It is the Holder's responsibility to inform all employees of the rules and regulations pertaining to the authorized activities specified in the special use permit and annual operating plan. The Holder is also responsible for all activities conducted under the authorization.
2. The Holder shall notify their permit administrator or District Ranger as soon as possible if the holder is aware that Holder's employees, contractors, or any person acting under the permit has violated any

term or condition of the permit or any applicable law or regulation. Holder shall also make this same notification if they are aware that any employee, contractor, or any other person acting under the permit intends to violate any permit term or condition or applicable law or regulation.

3. Whenever it becomes necessary to restrict or limit the use of native forage by pack and saddle stock, in the interest of resource protection, the permit holder may be required to pack in and supply all necessary feed.
4. Livestock may be excluded from areas for resource protection or areas reserved for administrative use, as requested by the Authorized Officer.
5. Grazing, when authorized under the terms of the permit, applies only to pack and saddle stock that are actively engaged in commercial outfitting operations by the holder and is allowed only when incidental to and necessary to support a specific commercial trip. Grazing is not allowed between trips, or before or after the guiding season, except under the terms of a separately approved grazing allotment. Where grazing is permitted the outfitter has the responsibility to not adversely impact the range resource and complying with applicable resource protection requirements, including, but not limited to the direction for Resource Protection, Pack Stock Management and Utilization Standards contained in this Operating Plan. See Utilization Standards in Section XI. A.9.
6. No permanent summer-long camps are authorized. Base camp limitation is 14 consecutive days, unless otherwise agreed in advance.
7. The Forest Service will issue wilderness permits for **all** National Forest wilderness areas. Wilderness permits must be in the party's possession while in the wilderness. The pack station is responsible for ensuring that the party has a valid wilderness permit prior to entering the wilderness. For spot and dunnage trips, the clients shall possess the permit. For traveling trips, basecamp or other all expense type trips, the pack station wrangler or other staff will have the wilderness permit in their possession for the entire trip. For all expense trips where the employees are not camped directly with the clients, both the guests and the employees shall have a copy of the wilderness permit. The pack station is responsible for ensuring each client/party receives the required wilderness regulation sheet and handouts provided by the Forest Service. Case by case authorizations require a wilderness permit.
8. Bear proofing of human or pet food, garbage and stock feed at the base facilities and during all stages of the operation is required. Guarding food is not an appropriate method of food storage. The counter-balance method (hanging items from a tree branch) or panniers/containers approved by the District Ranger are the only authorized method of food storage. The pack station is responsible to direct spot and dunnage clients to store food and garbage properly.
9. Manure accumulations shall be removed from all corrals and disposed of properly off NFS lands at season's end. If temporary storage occurs during the season, manure will be stored 100 feet away from water or in a non-leaking container.
10. Noxious Weeds:
 - a) The Holder and the Forest Service will develop a weed management plan for pack station facilities during the 2013 operating season to be included in future operating plans. See Exhibit 3 for the Working Draft Annual Weed Checklist. The weed plan for the authorized permit area would detail the measures for preventing, reporting, controlling and monitoring weeds [non-native plants as listed in the Jepson Manual (Hickman, 1993)] that would be taken by the permittee, its employees, contractors, and subcontractors. These measures may include the following:
 - (1) The permittee is encouraged to use weed-free hay and straw. When state weed certification programs are developed, the permittee will use only certified weed-free hay or feed for all activities occurring on Forest lands. Permittees who have infestations of high risk weeds on their private land or on other land they use for trailing or pasture will be asked to hold their livestock in a weed-free pasture for three days immediately before entering the Forest. All ground disturbing activities will address weed management measures as a part of prior approval.

- (2) Any equipment used on Forest lands will be washed or steam cleaned prior to entering the Forest.
- (3) Gravel, sand and soil brought on to the Forest will be free from noxious or invasive weed seeds or other propagative parts.

11. It is implied in this operating plan that a partnership is developed between the USDA Forest Service and the Holder to implement a policy of heritage stewardship. The Holder should actively promote a sense of conservation and teach their clients minimum impact skills and ethics. The following minimum impact practices apply to all operations.

- a) The campfire, in areas where permitted, is a social aspect of an outfitted trip; however, the lasting impacts of a campfire will be reduced in the following ways: Use of rock campfire rings should be eliminated and pit/plug fires utilized where appropriate. The use of fire pans or fire blankets is suggested as an effort to decrease fire scars. Always use existing campfire rings, if not using a fire pan. Campfires will be kept free of trash such as tin foil, unburnable materials and melted plastic. There shall be only one minimal sized fire ring remaining in a campsite each time a group leaves a campsite.
- b) Elevational campfire restrictions are set forth in the 2001 Wilderness Management Plan. Exceptions to those elevational restrictions are prohibited. Where a destination straddles the closure line, the collection of wood below the line for use above the line is prohibited.
- c) Packing in wood or any other solid fuel above the elevational fire closure is prohibited.
- d) All refuse resulting from operations under this permit shall be packed out or otherwise removed from National Forest System lands and waters. Camp areas will be kept clean and free of litter at all times, i.e., pull-tabs, cigarette butts, baling twine, foil, etc.
- e) Concentrate use on durable surfaces. In heavy use areas, concentrate use in existing heavily used campsites. Travel on constructed trails, which have been designed to accommodate heavy use. All campsites shall be at least 100 feet from water and trails.
- f) No waste or by-product shall be discharged into water if it contains any substance in concentrations, which will result in harm to fish and wildlife, or to human water supplies. Soapy water will be dumped at least 100 feet from any water sources. A sump hole for gray water disposal (after food particles have been strained) will be at least one foot deep and naturalized as the camp is moved.
- g) Nailing or wiring to live trees or snags, or cutting green trees is prohibited. Rope or shims are recommended to promote resource protection and easy dismantling of structures. Padding between live trees and poles or rails is encouraged. Wire is not acceptable.
- h) Stock will not be tied to trees except for short periods of time, for example; conducting trail maintenance, or saddling and packing of livestock. Proper use of a highline is recommended along with the use of tree saver straps or the equivalent. Highline should be used in a durable area well away from campsites. If supplemental feed is used, feed well away from campsite. If electric fences are used, they will be moved frequently and removed when leaving.
- i) Manure will be scattered to speed decomposition before breaking camp. Holes pawed by stock will be refilled.
- j) Operators are encouraged to use latrines for parties over 8 and when latrines are utilized, operators are encouraged to pack out the waste. Latrines will be located 200 feet from water. When latrines are not needed, the cat hole method is recommended for human waste disposal.

C. Health and Safety

1. Incident Notification. The holder shall be required to contact the authorized officer as soon as practicable after the following incidents that occur on National Forest System (NFS) lands within the

authorized area:

- a. Any incident resulting in death, permanent disability, or personal injuries that are life-threatening or that are likely to cause permanent disability;
- b. Any failure of a structural, mechanical, electrical component and its primary connection, or operator error, which impairs the operation or function of a passenger ropeway in a way that could affect public safety, or any ropeway incident that requires reporting to State authorities;
- c. A search and rescue operation to locate a person; or
- d. Any incident that had or has high potential for serious personal injury, significant property damage, or significant environmental or other natural resource damage, including but not limited to avalanches, landslides, flooding, fire, structural failures or release of hazardous substances.

Method of Notification. The authorized officer shall determine protocol for how the notification must be made. Notification may be tailored to the unique characteristics of the permitted operation. Report incidents to the assigned permit administrator.

Contents of Notification. When notifying the authorized officer of an incident, the holder shall be required to specify when, where, and how it occurred, and who was present or affected by the event.

2. Any property owned or controlled by the Holder and left unattended on National Forest lands for more than 24 hours will be subject to impoundment under Secretary of Agriculture's Regulation 36 CFR 262, Subpart B.
3. When authorized horse or cattle drives utilize or cross roads that have vehicle traffic, necessary arrangements must be made for appropriate traffic control.
4. Holders are encouraged to provide first aid training to their employees.
5. Fire Control Plan –The Holder shall prepare a fire plan for approval by the authorized officer, (in accordance with Permit section XIV, clause U) that shall become part of the permit upon approval. The plan shall be completed by April 1, 2013.

D. Trails and Day Rides

1. Obstacles blocking the system trail, other than snow, such as downed logs, rocks, or brush, shall be removed prior to or during the first commercial trip and meet Forest Service trail standards. In designated wilderness, primitive methods shall be used to remove such obstacles. This authorization for removal of obstacles is intended to address isolated occurrences of obstacles such as downed trees or rocks following winter, or a specific event such as a storm. In the case of a trail with numerous obstacles over considerable portions of its length, such as a trail overgrown with brush due to sustained lack of maintenance, or following a fire, holder shall request and obtain specific authorization prior to commencing removing such obstacles.
2. The permit holder must obtain prior approval for the performance of any trail maintenance (other than removing obstacles) on National Forest System lands.
3. User created trails approved for commercial pack stock use are listed in Exhibit 4.
4. Ansel Adams and John Muir Wilderness system trails approved for commercial pack stock use are listed in Exhibit 5. Prior approval is required for any trips outside the normal area of operations. Trails identified as "Not Suitable for Commercial Stock" will remain closed to stock use.

5. Wilderness day rides, including rides from overnight camps during full-service trips, may occur only on approved system trails as identified on Table 2.26 of the Final Environmental Impact Statement for the 2005 Plan. (See Exhibit 5).
6. All non-wilderness trails, routes and roads available for commercial pack stock use are identified in Table 2.3 in the 2006 Permit Issuance FEIS. Trails, routes and roads specific to Red's Meadow Pack Stations' use are listed in Section 3(c) of Appendix FF.
7. Cross country travel is allowed in all areas outside the the AA/JM Wildernesses and outside of identified high density recreation areas, except where resource impacts are identified (HDRAs mapped in 2006 FEIS, Appendix J).

E. Base Facilities and Site Maintenance

1. Facilities listed in Schedule C of the special use permit.
2. Base facility maintenance is part of this operating plan and includes routine maintenance of fences, corrals and repair and upkeep of existing facilities. Any maintenance or construction beyond routine work is subject to an approved site or development plan.
3. The resort will maintain its driveways and parking lots to prevent soil erosion, especially erosion that causes sedimentation into Agnew Meadows.

V. DESCRIPTION OF OPERATION

Red's Meadow Pack Station's base facility is located along Red's Meadow Road in Red's Meadow Valley. The permittee provides outfitting and guiding services in the Ansel Adams (AA) and John Muir (JM) Wildernesses including spot, dunnage, resupply, full service pack trips, stock drives and day use services to the public. Pack stock outfitting and guiding is also provided in non-wilderness areas of the Inyo National Forest.

The normal operating area for Red's Meadow Pack Station includes northern portions of the John Muir Wilderness, primarily from Silver Pass to the northern boundary of the John Muir Wilderness as well as the Ansel Adams Wilderness. The permittee operates two satellite operations: Agnew Pack Station and Mt. Whitney Pack Trains. The Agnew Meadows Pack Station services the Ansel Adams Wilderness.

All trips originate on the Inyo National Forest and access the Sierra National Forest, except those trips approved by Yosemite National Park to book back. Operators are not allowed to truck stock through the park. If trips are booked back from Yosemite, the trips in the John Muir Wilderness and Ansel Adams Wilderness must be reported on the tally sheets.

There are no base facilities associated with Mt. Whitney Pack Trains. The normal operating area includes the Golden Trout and South Sierra Wilderness areas, and southern trails entering the John Muir Wilderness. The Pack Train operates in Sequoia Kings National Park under permit issued by the Park. Trailheads include Sage Flat, Haiwee, Shepherd Pass, Kearsarge Pass, Taboose Pass and Sawmill Pass.

Trips over Kearsarge Pass will be coordinated with Sequoia Kings Pack Trains in order to minimize conflicts. Additional trips will require case by case approval and be in agreement with Cottonwood Pack Station.

Use of corrals at various Southern Inyo trailheads will be coordinated by the permittee, including the use of Forest Service administrative facilities at Horseshoe Meadow. Unless otherwise agreed in writing, no grazing is allowed at the Forest Service administrative site. Use of the Horseshoe Meadow Equestrian Camp facilities is prohibited, unless otherwise agreed in writing.

The normal operating season for Red's Meadow Pack Station is controlled by the snow pack in the backcountry, with a typical season running from Memorial Day weekend through September.

VI. AUTHORIZED USE

A. AA/JM Wilderness

1. Priority Use is identified on the face page of the Resort Supplement.
2. Reds Meadow Resort's allocation in areas designated as "red" on the Forest Service's "Use-Overlap-Impact Analysis" is assigned as listed:

Wilderness Area	"Red Area" Locations	Service Day allocation*
Ansel Adams	Garnet Lake	152
Ansel Adams	Shadow Creek Corridor	76
Ansel Adams	Ediza Lake	102
Ansel Adams	Sadler Lake	0
John Muir	Iva Belle	27
John Muir	Genevieve Lake	0
John Muir	Purple Lake	0
John Muir	Round Lake	0
John Muir	Davis Lake (Hilton)	0
John Muir	Second Lake (Hilton)	0
John Muir	Long Lake (Bishop Pass)	0
John Muir	Long Lake (Little Lakes Valley)	0
John Muir	Gem Lake (Little Lakes Valley)	0
John Muir	Honeymoon Lake (Pine Creek)	0
John Muir	Elba, Moon and "L" Lakes	0
John Muir	Hutchinson Meadow	0
John Muir	Golden Trout Lakes (Humphreys Basin)	0
John Muir	Rae Lake	0
John Muir	Guest Lake	0

*Exhibit 7 displays entire allocation for each area; Exhibit 8 provides maps of the areas.

3. Mt. Whitney Pack Trains' has no areas designated as "red" on the Forest Service's "Use-Overlap-Impact Analysis" within its typical area of operations. Refer to **Exhibit 7, which displays the entire allocation for each area, for any approved trip outside the normal area of operations. Exhibit 8 displays maps of the "red" areas.**
4. Camp set-up, camp take-down and resupply trips shall be debited against allocated service days by multiplying the number of stock needed to provide the service for such trip by the number of days needed to accomplish the service.
5. Temporary service days authorized in the 2001 Wilderness Plan are not available for commercial pack stock services.
6. Permittees are not authorized to borrow or purchase service days from another pack outfit.
7. Except for public corrals at trailheads, permission to hold stock at trailheads overnight is required in advance.
8. Use of trails identified as needing Case-by-Case Itinerary Approval in the 2001 Wilderness Management Plan shall be requested not less than 14 days in advance of trail entry. Approval will be based on the following criteria:
 - a) Use must meet a need identified in the needs assessment.

- b) Trips in these areas will not be advertised in brochures or other media.
- c) Service is occasional in nature and not part of a yearly, repeated operation.
- d) Use must fit within the quota system.
- e) In areas where limiting factors have been identified; the appropriate resource specialists must review the proposed use to assure it is consistent with resource objectives..

9. Prior itinerary approval is required for any trip outside the normal area of operations

10. ONE SERVICE DAY POOL has been established for all commercial pack station operators. The amount of use available is shown below. See Exhibit 1 for eligibility criteria for use of pool days.

- a) Day use: 1444 service days
- b) Overnight use: 1368 service days

B. Golden Trout Wilderness (Use established in the 2007 ROD)

1. Priority overnight use is shown on the face page of the Resort Supplement.
2. Day use is limited to 250 service days within the Golden Trout and South Sierra Wilderness areas combined, and requires advanced approval.
3. Itineraries must be approved in advance by the District Ranger.

C. South Sierra Wilderness (Use established in the 2007 ROD)

1. South Sierra Wilderness use will be allocated on a case-by-case basis, with no more than 10 trips authorized.
2. Day use is limited to 250 service days for all operators within the Golden Trout and South Sierra Wilderness areas combined, and requires advanced approval.
3. Prior itinerary approval is required for any trips outside the normal area of operations.

D. Golden Trout/South Sierra Wildernesses Restricted Camping Areas

1. In the Golden Trout and South Sierra Wildernesses, within the following nine areas camping is limited to designated sites. Camping is permitted in any legal existing site outside the area designated on the maps. See Exhibit 9, GT/SS Restricted Camping/Designated Sites. Identified sites are approximate and will be further defined and identified during the season.

- a) Templeton Meadow
- b) Ramshaw Meadows
- c) Strawberry Meadows
- d) Big Dry near Templeton Meadow
- e) Gomez Meadows
- f) McConnel/Tunnel Trail intersection
- g) Old Tunnel Airstrip
- h) Little Whitney Meadow
- i) Summit Meadow (SSW)

E. Non-wilderness Use (Use established in the 2007 ROD)

1. Horse and cattle drives on National Forest System (NFS) lands shall be conducted on approved routes. Itineraries and schedules are to be submitted as part of the annual operating plan along with other advanced and estimated trips
2. Wagon rides on existing roads..

3. Day ride services are regulated by total herd size and are restricted to authorized routes.
4. **Prior approval is required for any trips outside the normal area of operations.**

VII. FEE DETERMINATION

A. Assigned Site Fee

1. This is an annual fee for each assigned site that is approved by the authorized officer. The assigned site fee is in addition to the fee for commercial use. Assigned sites are paid for at the rates specified in the Forest Service Handbook. Rates will be revised every 3 years. Assigned fees will not be prorated. Refunds or credits will not be authorized for assigned site fees. Assigned Site is defined as a site that is designated and authorized for occupancy and use by a holder who is providing a recreation service to the public during the authorized period of occupancy. Examples include but are not limited to base and drop camps, picnic sites, loading facilities, boat launches, and helispots. (FSH 2709.11, 37.05)

2. Assigned Site(s): N/A

B. Grazing Fee

1. This is a fee for grazing authorized livestock during the permitted use and will only be implemented as needed for specific permits. A grazing fee is assessed only when animals are authorized to graze. The fee is based on the head month. Fees are charged in accordance with current Forest Service Handbook direction. Refunds or credits will not be authorized for unused but authorized grazing. Fees for grazing are due prior to use. Fees will be based on submitted and approved grazing requests. Anticipated grazing needs are due November 1 along with advertised trips and advanced bookings. Pasture grazing fees and anticipated wilderness grazing fees will be calculated and billed with the annual minimum fee. Reported use above that which was initially estimated will require a subsequent billing. Fees paid based on estimated use are not refundable.

2. 2013 Estimated Use.

Agnew Meadow East Pasture: 30 animal months X \$1.35 = \$40.50

AA/JM Wilderness use: unestimated for 2013, bill based on actual use.

C. Monitoring Fee

1. A monitoring fee under Cost Recovery regulations shall be assessed annually for the 20 year permit term. If monitoring fees are not paid as assessed annually, the Forest service may suspend or revoke the authorization in whole or in part. Monitoring fees will be collected and used to cover the cost to monitor the following activities:

- a) Construction or reconstruction of permanent or temporary facilities
- b) Rehabilitation of the construction or reconstruction sites.
- c) Specific monitoring activities that are identified under the FEIS and ROD and that are determined to be attributed solely to pack stock use in the wilderness.

VIII. MANAGEMENT OF COMMERCIAL PACK STOCK IN YOSEMITE TOAD BREEDING AND REARING HABITAT

A. Pack stock grazing and entry is prohibited in occupied Yosemite toad breeding and rearing habitat throughout the breeding cycle (through metamorphosis).

B. During the breeding and rearing cycle, pack stock entry or grazing is prohibited within 100 yards of any permanent water source within occupied Toad habitat.

C. The duration of the breeding and rearing cycle shall be based on the "wet" and "dry" predictions based on the California Department of Water Resources Bulletin 120 (issued May 1 of each year).

D. The prohibition on entry into Yosemite Toad habitats shall begin ten days before and extend 80 days after the estimated start of breeding cycle based upon Bulletin 120.

E. The Forest Service will notify Holders of the period of closure after the California Department of Water Resources Bulletin 120 is issued May 1.

As stated in the Order for Injunctive Relief (No. C-00-01237 EDL, May 8, 2008):

“The Forest Service shall prohibit all pack stock grazing and entry in occupied Yosemite toad breeding and rearing habitat throughout the breeding cycle (through metamorphosis). In addition, during the breeding and rearing cycle, the Forest Service shall prohibit any pack stock entry or grazing within 100 yards of any permanent water source within occupied toad habitat. The duration of the breeding and rearing cycle each year shall be based on the “wet” or “dry” year predictions based on the California Department of Water Resources Bulletin 120 (issued May 1 of each year). The prohibition on entry into Yosemite toad habitats shall begin ten days before and extend for 80 days after the estimated start of breeding based upon Bulletin 120.” (pg. 13-14)

The estimated start of breeding considers snow depth and temperature data collected from the Department of Water Resources Kaiser Point snow survey station. This data contributes to the water yield estimates provided in Bulletin 120 (<http://cdec.water.ca.gov/snow/bulletin120/>). Information collected from a Yosemite toad monitoring site at Kaiser Pass Meadow, located at approximately 9,000 to 9,200 feet in elevation and is proximal to the Kaiser Point snow survey station, was used to confirm the start of breeding.

After review of the Bulletin 120, and based on when breeding was initiated this year at the monitoring site, I have estimated the dates for the completion of metamorphosis for the Yosemite toad. This resulted in the following “on-date” for pack stock grazing listed below, as directed in the Order for Injunctive Relief (No. C-00-01237 EDL) for Yosemite toad occupied meadows:

“On-date”
July 23, 2013

If Yosemite toad tadpoles are observed in a meadow after the “on-dates” listed above, grazing will need to halt from all breeding and rearing habitat and up to 100 yards of any permanent water source in that meadow until after metamorphosis is complete.

IX. PACK STOCK MANAGEMENT DIRECTION

This section incorporates direction from the 2001 Wilderness Plan, 2001 Sierra Nevada Forest Plan Amendment as amended, and the 2006 Commercial Pack Station and Pack Stock Outfitter/Guide Permit Issuance FEIS.

A. AA/JM Wilderness Grazing

1. The permit holder is authorized the use and grazing of pack and saddle stock within the identified wilderness and non-wilderness areas only when such use is incidental to the provision of a service to the public as authorized by permit.
2. Grazing is prohibited in meadows containing streams that are rated as Functional-at-Risk (“FAR”) with downward or unknown trends. See Exhibit 6, Grazing Management for **FAR Meadow Closures**. (INF maps provided with July 14, 2008 correspondence from Jim Upchurch and SNF maps

provided with May 20, 2009 correspondence from Margaret Wood). There have been no changes to the status of any meadows administered by the Sierra National Forest. The status of Trinity Complex Meadows on the Inyo National Forest has changed from open to closed. Mapped changes are being developed and will be provided prior to the operating season. Contact your permit administrator if additional copies are needed.

3. You must actively manage your stock to avoid entry into closed areas.
4. The Forest Service shall monitor meadows containing streams rated as FAR with an upward trend, and in which grazing is permitted. If such monitoring demonstrates degradation of the hydrologic function, grazing will be prohibited.
5. Final anticipated grazing needs based on advanced bookings, advertised trips and typical use must be submitted to the permit administrator for review by April 1 of each year.
6. Forest Orders for the wilderness on-dates will be annually revised to establish annual grazing start dates and grazing closures, as well as other pack stock use regulations for pack stock parties.
7. Permit holder will comply with all grazing start dates established annually by Forest Order. Typical start dates are shown in the table below. When requested by the permit holder, the Authorized Officer may adjust the grazing start dates, case-by-case, on specific sites based on appropriate range readiness information. (2001 Wilderness Plan, Appendix G, pg. 6)

Dry Year	Grazing start dates could begin 15 or more days earlier than normal years
Normal year	Anticipated to begin by July 15 th at 9,000 feet elevation and August 15 th at 10,000 feet elevation
Wet Year	Grazing start dates could be delayed 15 to 30 days

2013 Grazing On-Dates for the Ansel Adams and John Muir Wilderness will be determined as prescribed in #7 above and distributed as they become available.

Forecasted 2013 Range Readiness Dates

The forecasted range readiness dates in this letter are the predicted range readiness dates that will be included in Forest Orders issued before the season begins. Based on the snowpack water content being only about 45% of average, and the predicted weather, 2013 is expected to be a dry year.

Table 3 below reflects the predicted grazing start dates for the Inyo and Sierra National Forests. The Inyo National Forest Orders will apply to areas of the Sierra National Forest administered by the Inyo National Forest.

Table 1. Predicted grazing on-dates by elevational range

Sierra National Forest
(Not including area administered by the INF)

Elevation (feet)	Start Date
7000-7999	June 1
8000-8999	June 15
9000-9999	July 1
>10,000	August 1

Inyo National Forest
(Including SNF area administered by the INF)

Elevation (feet)	Start Date
7000-7999	June 1
8000-8999	June 15
9000-9999	July 1
>10,000	August 1

Summer weather and local conditions may result in local differences in actual range readiness dates. The predicted range readiness on-dates are estimates and may not reflect variations in aspect, slope and groundwater influences in a particular meadow. Stock users will be responsible for evaluating local

range readiness conditions and not allowing their stock to enter areas that are too wet. Commercial stock users are encouraged to work closely with Special Use Permit Administrators and Wilderness Staff to determine the status of grazing areas as summer approaches.

8. Established allowable utilization levels will be applied. This means that all users of a meadow, including the Holder, will be expected to comply. When a meadow reaches allowable utilization levels, all users will be directed away from that meadow. The permittee is responsible for recognizing when allowable utilization levels are being exceeded, and for avoiding areas as necessary to prevent utilization in excess of the allowable levels.

9. On key areas in the wilderness, use the Grazing Response Index method with Key Species utilization method. (2001 Wilderness Plan, Appendix G, pg. 10)

10. Utilization Standards:

- a) In early-seral condition meadows, grazing utilization of grass and grass-like plants will be limited to 30 percent, or a minimum 6-inch stubble height (*SNFP ROD Appendix A-58*).
- b) In late-seral condition meadows, grazing utilization of grass and grass-like plants will be limited to 40 percent, or a minimum 4-inch stubble height (*SNFP ROD Appendix A-58*).
- c) Degraded meadows (such as those in early seral status with greater than 10 percent of the meadow area in bare soil and active erosion) will be rested from grazing until they have moved to mid-seral or late-seral status (*SNFP ROD Appendix A-59*).
- d) Browsing on hardwood and riparian shrub annual leader growth or seedlings and advanced regeneration will be limited to no more than 20 percent of the annual growth (*SNFP ROD Appendix A-59*).
- e) Keep disturbance to stream bank, natural lake and pond shorelines, caused by resource activities, from exceeding 20 percent and 10 percent in essential habitat for Lahonton and Paiute cutthroat trout and Little Kern Golden Trout (*SNFP ROD Appendix A-55*).

B. GT/SS Wilderness Grazing

1. Grazing incidental to trips in the GT/SS Wildernesses is authorized except in locations determined to be unsuitable. Areas currently identified in the Golden Trout Wilderness as unsuitable for grazing are:

- a) Volcano Meadow
- b) South Fork Meadow (headwaters of South Fork of the Kern River)
- c) Bullfrog Meadow
- d) Fat Cow Meadow
- e) the lower end of Big Whitney Meadow (below the confluence of the two main tributaries),
- f) Big Dry Meadow (near Gomez Meadow),
- g) parts of Ramshaw Meadow are closed; Grazing is allowed in Ramshaw Meadow near Kern Peak Stringer
- h) South Fork Meadows (on Cottonwood Creek) and Overholster Meadow (on Little Cottonwood Creek).
- i) No unsuitable areas are currently identified in the SS Wilderness.

2. Range readiness will be determined by standards as identified in the 1988 Inyo National Forest Land and Resource Management Plan (pg. 85).

3. Pack stock streambank trampling associated with grazing in the GTW may not exceed total streambank alteration standards identified in the INF LRMP (1988) (pg. 78-9). The standard in areas outside of state designated wild trout waters is 20%. **In drainages designated as wild trout waters, streambank alteration may not exceed 10%. The majority of the watersheds in the GT/SS Wildernesses managed by the INF are designated as wild trout waters, including all areas that drain to Cottonwood Creek, Golden Trout Creek and to the South Fork of the Kern River.**

4. Pack stock grazing utilization standards would be determined using Inyo LRMP Amendment #6 in the GT/SS Wilderness Areas. These standards were designed to be adaptive and provide for accelerated restoration and improvement of degraded range sites as well as to maintain those sites currently in a fully functional condition. Exhibit 10 contains a listing of key meadow areas and corresponding utilization standards.

C. Pasture Grazing (see Appendix FF)

D. Loose Herding

1. Forest Order 04-96-2 (FEIS Appendix B, Table B.1) prohibits “using saddle, pack, or draft animal on any trail by loose herding or driving, except on portions of trails where it is unsafe to keep animals tied together: 36 CFR 261.55(c).” Loose herding shall be done in such a manner as to minimize impacts to trails and campsites and to other forest visitors.

E. Dead Animals

1. Livestock, owned or controlled by the Holder, that die on National Forest System lands, shall be removed or otherwise disposed of in a manner acceptable to the Authorized Officer. The holder will notify the Forest Service within 48 hours after the death of the animal, the location and approved process used for disposal.

X. TRAVEL MANAGEMENT

A. High Density Recreation Areas

1. Use within the HDRAs is limited to approved routes shown below. No cross country travel is permitted within HDRAs shown in Appendix J of the 2006 Permit Issuance FEIS.

B. Non-wilderness outside HDRAs

1. Cross Country travel is approved outside of identified high density recreation areas shown in Appendix J, 2006 FEIS, except where resource concerns have been identified

2. Day rides, wagon rides and stock drives are restricted to listed and approved trails shown in Section 3(c) of Appendix FF.

3. **Any trip or service outside the normal operating area requires prior itinerary approval.**

C. AA/JM Wilderness

1. Cross country travel within the AA/JM Wildernesses is not authorized. All commercial packstock must stay on designated trails, except where authorized in advance by the Forest Service for alternative routes or to access campsites and grazing areas. See Exhibits 4 and 5 for authorized trails.

2. Wilderness day rides, including rides from overnight camps during full-service trips, may occur only on approved system trails as identified on Table 2.26 of the Final Environmental Impact Statement for the 2005 Plan. (See Exhibit 5)

D. GT/SS Wilderness

1. Cross country travel within the Golden Trout and South Sierra Wildernesses is authorized, except in meadows prior to the range readiness date and where resource concerns have been identified.

XI. ANNUAL PERFORMANCE EVALUATION FOR OUTFITTING AND GUIDING OPERATIONS

A. Basis, Evaluation Criteria and Performance Standards

1. FSM 2721.53h provides for annual permittee outfitting and guiding performance evaluation. Performance evaluations will recognize six different levels: outstanding, fully acceptable, needs improvement, unacceptable, not checked, and not applicable.

2. Performance evaluations will be based upon field inspections and permittee records, and will include: (1) Service to the public, (2) Compliance with permit, (3) Compliance with the operating plan, (4) Equipment/Livestock, (5) Safety, (6) Resource Protection and (7) Major Incidents (if any).
3. In-season evaluations may be conducted at any time. Deficiencies will be noted, and permit holder will have a time frame for correcting the deficiencies.
4. Performance evaluations will be reviewed annually at the end of the operating season, and the Permittee will be advised of the findings. Joint evaluations between the Forest Service and Permittee are encouraged.
5. The operating plan provides guidance, which is used by the Forest Service to monitor permit holder performance to ensure compliance with the terms of the Special Use Permit.
6. Periodic inspection of operations and documentation of both positive and negative findings are the responsibility of the permit administrator. Inspections and an annual performance evaluation will be documented on the enclosed form (Exhibit 1). It will be the responsibility of the permit holder to ensure that all employees are familiar with the terms of the permit and this operating plan.
7. Noncompliance with any item identified in the Order for Injunctive Relief will result in an unacceptable performance rating and subsequent administrative actions set forth in the special use authorization. These actions could include reduction in service days, prohibitions on use in specific areas or trails, or other administrative actions provided under the permit terms.

XII. Inyo National Forest and Sierra National Forest Definitions:

1. **Administrative Trip:** Any trip into the wilderness that is not directly related to providing service to paying customers or does not count against their total service days. Examples include: packing and outfitting/guiding for USFS trail crews, other federal or state agencies, contractors and volunteers who are authorized by the Forest Service to accomplish project or administrative work.
2. **All Expense Trip:** Includes any service where pack station staff accompany clients for the duration of the trip. Can include base camp, traveling, full Service, all inclusive, hiking with pack stock, continuous hire, or any other service where an employee is serving the client for the entire trip.
3. **Assigned Site:** A specific location on Forest land, inside or outside the wilderness, that is authorized for occupancy and use by the authorized officer and for which a fee is paid by the holder for the exclusive use of the site.
4. **Base Camp:** All provisions are provided by the packer. Customers and provisions packed to a designated camp. Cook and riding stock remain at camp. Pack stock returns to Pack Station. Maximum stay 14 days in one location.
5. **Camp Set Up:** Packer hauls in camp provisions the day prior to clients permitted entry. Record type of service, permit number of party being served, stock numbers, destination information, etc. of the service activity on tally sheet.
6. **Camp Take Down:** Packer back hauls camp provisions the day following the client's permitted exit. Record type of service, permit number of party being served, stock numbers, destination information, etc. of the service activity on tally sheet.
7. **Day Ride:** A day or part of a day where a customer rides stock, but does not stay overnight.
8. **Dunnage:** Customer provides all provisions. Packer hauls to designated location and may return on a specified date to remove gear, if trip is for two ways. Customer walks.
9. **Horse and Cattle Drives:** The movement of a herd of stock over non-wilderness lands, typically a working trip for transportation from winter pastures or holding areas to the pack station and return, but also may include recreationists that accompany the trip. Drives may also be performed, however, solely for recreational purposes.
10. **Re-Supply-** Packer hauls in provisions to an agreed location to support a customer's trip that is currently in progress. Re-supply services may not start on the same day as the trip that is being serviced.

Re-supply packer and stock may not subsequently travel with the party that has received the re-supply.

11. Service Day (Client): A day or part of a day for each individual that the packer, outfitter, guide, wrangler, leader, cook or instructor accompanies or provides services for, including transportation on Forest land. Beginning and ending days of a trip or service period will be considered full days. Where a supply or drop service alone is provided, the full or fractional days involved times the number of clients in the party equals service days.

12. Service Day (Stock): Applies to resupply, camp setup and camp take-down service. Service days are calculated by multiplying the number of stock (including packer's riding animal) required to provide the service by the number of days required to provide the service.

13. Spot Trip: Customer is taken by horseback to a designated location with provisions for a specified time. The packer and stock may return at a specified time to pick up the customer, if the trip is for two ways. Customer furnishes all provisions and equipment but rides in.

14. Stock Night: One animal in the backcountry for one night.

15. Traveling Trip: Livestock and crew remain with customer from start to stop. Two types of traveling trips are available. In the all expense travel trip the packer provides everything whereas in others the customer can provide his or her own gear, food, etc.

XIII. ANNUAL CALENDAR OF OPERATIONS

Documents and Fees	Due Date	Date Received
Advance Minimum Fee for the Calendar Year	January 1	
Financial Statements submitted for each reportable period	30 th of the Month	
Fourth Quarter Payment	January 30 th	
Operating plan updates and planned/anticipated grazing needs	April 1	
Financial Balance Sheet Previous Year	April 15	
First Quarter Payment	April 30	
Forest Service provides written notice of grazing "on-dates"	May/June	
Certificate of Insurance	Upon Termination	
Monthly Tally Sheet Use Report	15 th of Each Month	
Second Quarter Payment	July 30	
Third Quarter Payment	October 30	
Final Tally Use report	November 1	
Advertising Submitted to Forest Service for Approval ¹	November 1	
Proposed Schedule for Advanced Advertised Trips ²	November 1	
Forest Service Approve/disapprove or modify schedule of advanced advertised trips	December 1	
Forest Service Approve/disapprove or modify advertising.	December 1	

¹ Draft for brochures, web sites and other advertising must be submitted to the permit by administrator November 1st and will be approved, modified or disapproved by December 1st.

² The permit holder will submit to the Forest Service by November 1st a proposed schedule for advanced advertised trips. These trips will include dates, trailhead of entry/exit (if applicable) and itinerary of trip including grazing areas. Trips will be assessed along with other operations and uses in the area based on resource conditions. The Forest Service will approve, modify or disapprove this schedule by December 1st.

XIV. LIST OF EXHIBITS

Exhibit 1 - Service Day Pool Use Criteria
