Date: February 19, 2014

Dear Prospective Offeror:

This is to notify you that the following corrections have been made to the JO STEW Stewardship Project Advertisement. The corrections have been made and the affected documents are now updated on our website. Additionally, one clarification was discussed at the pre-bid conference as detailed below.

- The Description Pursuant to K-C.3.5.5# - Designation by Prescription contained in Contract Part 3 had the following corrections:
 - Page 44b, line 1 – deleted “or equal to”.
 - Page 44c near the bottom under heading “Aspen Patch JO Stew Unit #16” – deleted “or high quality trees of desirable species” at the end of the sentence. Additionally changed “larger than” to greater than or equal to”.
- Contract Area Map
 - Added the location of the Aspen Patch that is referenced on page 44c of The Description Pursuant to K-C.3.5.5# - Designation by Prescription.
 - Edited the Other Requirements text box which specified “scarify all landings, temporary roads, and skid trails”. This has been changed to say “scarify all landings and temporary roads”. It is not required to scarify skid trails.
- Specifications Pursuant to K-G.9# - Stewardship Projects:
 - Project 001, page 65a, under definition for spacing – edited text so that spacing is measured from face to face, rather than center to center.
 - Project 001, page 65b, line 1 – changed “superior tree” to “reserve tree”.
- Prospective Offeror Letter – In the text of the third paragraph it states there are three Mandatory and One Optional Stewardship Projects. This is incorrect. The table below and the sample contract are correct in stating that there are two Mandatory and two Optional Stewardship Projects.

If you have any questions you may contact me at 541-947-6249.

Sincerely,

Judd Lehman
Contracting Officer
