

## How to find the White Pine Mining District

This area is best accessed south from US Highway 50, following the signs for the Belmont Mill and Hamilton. Access via Cathedral Canyon is not recommended. The roads in the area can become muddy and impassable any day of the year. Watch the weather, and bring emergency supplies, especially water. A four-wheel-drive vehicle and a good map are required to navigate these rough roads. We suggest you take the advice of the editor of the Hamilton newspaper (1870) who had this to say about stagecoach travel in the area: *“Those wearing wigs are advised to take seats on the inside.”* It is a bumpy ride, so take it slow, and let people know where you are going.
