About This Atlas

This Atlas was designed by the Salmon-Challis National Forest Resource Information Group. We have made a reasonable effort to validate the information used in this atlas. However, we cannot guarantee that no errors exist in the data. If you notice any discrepancies in the data please contact the SCNF at (208)- 756- 5100.

The projection used in the production of this map is the Universal Transverse Mercator (UTM) in zone 11, North American Datum 1983 (NAD83), meters. The grid on the margins of the map is in UTM units. The scale of the maps are 1:100,000 or 1" = 1.58 miles.

Enjoy Your National Forests
Have Fun & Keep Safe
The Salmon-Challis National Forests cover over 4.3 million acres in east-central Idaho. It was originally established as the Salmon River Forest Reserve in 1906 and has gone through land acquisition and loss and several name changes to what is now referred to as the Salmon-Challis National Forests. You are encouraged to contact the local Forest Service offices in the area you plan to visit for specific and current information. A list of the six Ranger Districts is provided in this Atlas.

The Salmon-Challis National Forests are managed for multiple use benefits. Professional management insures adequate yields of high quality water and continuing soil productivity. The watersheds on the Forest sustain local communities, ranches, farms, and homes, as well as provide millions of acre feet of water for local use and the northwestern United States.

The Salmon-Challis National Forests contain many diverse habitats capable of supporting fish and wildlife populations. There are three migrant species of fish which annually return from the ocean to forest habitats to complete one or more life processes. Wildlife includes mammals, birds, reptiles, and amphibians. Over 337 vertebrate species are found on the Salmon-Challis National Forests at some time of the year.

The Salmon-Challis National Forests offer outstanding opportunities for hunting and fishing. These activities are regulated by the State of Idaho Department of Fish and Game. Please contact their office for information regarding license requirements and other fish and game regulations.

There are unlimited recreational opportunities on the Salmon-Challis National Forests. Existing recreation sites range from primitive to developed. Facilities have been designed and constructed to allow access for differently-disabled visitors. Many existing campgrounds and facilities have been renovated to accommodate wheelchairs and walking aids.

Springtime visitors are rewarded with snowcapped mountains, rushing streams, and meadows carpeted with a multitude of wildflower varieties. Summer recreational opportunities include swimming, boating, mountain climbing, fishing, scenic driving, camping, picnicing, backpacking, photography, horseback riding, hang gliding, and river rafting at all levels of difficulty. All terrain vehicles and two and four wheel drive vehicle opportunities occur in many areas of the Forest. Winter recreation includes cross county skiing, downhill skiing, snowmobiling, snowshoeing, and ice fishing.

Forest Managers ask that you "Pack It In ... Pack It Out" on the Salmon-Challis National Forests. Most areas do not have trash collection and visitors to these areas are asked to collect and pack out their own trash.

The Forest Service has been entrusted with protecting and managing your National Forests for more than 100 years. The Salmon-Challis National Forests’ employees are here to serve you. If there is anything they can do to help make your visit more enjoyable, please do not hesitate to ask.
Rafting The Rivers of the Salmon Challis National Forests Can Be Challenging!

The Salmon-Challis National Forest uses the most current and complete data available. GIS data and product accuracy may vary. They may be developed from sources of differing accuracy, accurate at certain scales, based on modeling or interpretation, incomplete, or sources in revision. Using GIS products for purposes other than which they were intended may yield inaccurate or misleading results. The Forest Service reserves the right to correct, modify, or replace GIS products without notification.
