NOTICE

The Wayne National Forest, Athens Ranger District, will be replacing eleven trail bridges and repairing one causeway on the Monday Creek Off-Highway Vehicle (OHV) Trail System from August to December of 2014. During this period, sections of Monday Creek OHV Trails in the Dorr Run area will be temporarily closed while bridges are replaced.

Beginning August 4, the section of **Bowl Trail** between Intersection 75 (Company Road/Bowl Trail) and Intersection 53 (Paramount Loop North/Bowl Trail) will be closed to repair the causeway and construct a bridge. This portion of the Bowl Trail is estimated to be closed from **August 4 to August 15, 2014**.

Following completion of the causeway on the Bowl Trail, work will begin on the northern portion of Dorr Run Loop to replace seven trail bridges. During this period, **Dorr Run Loop will be closed** from Intersection 42 (Dorr Run Loop/Timber Road Trail) to Intersection 43 (Dorr Run Loop/Dorr Run Short Connector). Dorr Run Loop is estimated to be closed from **August 18 to September 12, 2014**.

Paramount Loop North is currently closed due to a collapsed trail bridge, and will remain closed until the bridge can be replaced.

All dates are subject to change. Additional closures will be announced as work progresses.

Closure maps will be posted and updated at all Monday Creek OHV Trailheads.
