

WILDFIRE CLOSURE AREA

In order to provide for public and firefighter safety the area and trails within fire perimeters and all shaded areas around fires are **CLOSED TO PUBLIC ENTRY**

EXTREME DANGER

- Areas of wildfire
- Falling snags
- Burned off vegetation creates unstable slopes of rolling logs and rocks.
- Heavy rain may cause debris flows from burned areas.
- Hidden holes containing hot embers
- Helicopter rotor wash and water drops can cause trees to fall and create debris flows
