

# Umatilla National Forest: Roads Analysis Comment Form

Please submit your comments to [r6\\_umatilla\\_public\\_inquiries@fs.fed.us](mailto:r6_umatilla_public_inquiries@fs.fed.us)

## Your input is important to us!

**We have been given an assignment from our Washington Office to look at our road system.** This review will make us more aware of safe and efficient travel, tells us what the public wants, and helps us better protect and manage our resources. Your information becomes part of our report that will be reviewed when future projects are proposed in site specific areas.

## What do we need to know?

What's your general opinion of roads on the Umatilla National Forest?

Are there any roads/road segments/culverts/bridges which need repair and if so, what's the problem? (Use the map provided to show road number, problem and specific road location details.)

Based on the forest's limited road maintenance funds, which roads/road segments/culverts/bridges do you feel the Forest Service should focus attention on to provide or improve access for the greatest number of people?

for the greatest good

## Where do you like to go and why?

### When you visit the Umatilla National Forest:

What roads do you use and why? Use the maps provided for a reference.

What kinds of activities do you like to do there (e.g., hiking, hunting, firewood cutting, forest product collection, etc.)?

## Trails and non-motorized road use...

Do you use old roads that are currently closed to wheeled motorized use, and if so, how?

**Pick your top three favorites:** For each road you list, give the road number and use (e.g., hiking, hunting, firewood collecting, snowmobiling, etc.)

Are there roads/ road segments you think would make good trails (either motorized or non-motorized)? Please list them and your suggested use.

Additional comments?
