**USDA FOREST SERVICE
INTERMOUNTAIN REGION, R4
ASHLEY NATIONAL FOREST
DUCHESNE/ROOSEVELT RANGER DISTRICT
GS-0455-05/06/07
Range Technician**

The Duchesne/Roosevelt Ranger District of the Ashley National Forest will soon be advertising to fill a permanent Range Technician position. Please respond by **October 31, 2014**.

Position Description: Range Technician

This position will provide technical support to the District's range management program. Primary duties will include:

- Grazing allotment monitoring to assess permittee compliance with Allotment Management Plans, Annual Operating Instructions and utilization standards.
- Inspection and documentation of range improvements. Will coordinate with permittees to locate and properly identify improvements. Work with forest GIS specialist to update and maintain range improvement GIS layer.
- Assist in managing the District noxious weed program. Provides technical direction to seasonal weed crew employees and assist in treating noxious weeds. Must obtain a pesticide applicator's license.
- Assist with collecting long-term vegetation monitoring data such as repeat photo plots.
- Assisting in summarizing and compiling annual reporting efforts and data entry. Filing data sheets, organization and maintenance of range improvement and weed inventory files.
- Responsible for care of the four district horses including farrier services, health needs, transporting to and from pastures.
- Maintenance of administrative pastures and exclosures.

This position will be physically strenuous and will require working in the field in all types of terrain and weather conditions during the field season (generally April through October). Work during the winter months (November through March) will primarily be within an office environment.

This position may be filled at the GS-5, GS-06 or GS-07 level.

Ashley National Forest:

Ashley National Forest - With headquarters in Vernal, Utah, it comprises 1.3 million acres located in the northeastern portion of Utah and southwestern portion of Wyoming. National Forest System lands are located in three major areas: the northern and southern slopes of the Uinta Mountains, the Wyoming Basin, and the Tavaputs Plateau.

The Ashley National Forest is bordered by the Uintah and Ouray Ute Indian Reservation, the Uinta and Wasatch-Cache National Forests, private property, and lands administered by the Bureau of Land Management and State of Utah. Dinosaur National Monument is located approximately 10 miles east of the Forest.

The Ashley National Forest was established by President Theodore Roosevelt in 1908. Its forest and range lands are protected and managed to ensure timber, grazing, minerals, water, and outdoor recreation for the American people. The vast Uinta Mountains watershed within the Forest boundary provides vital water supplies for power, industry, farm, and city use in Utah, Nevada, Wyoming, and California. Sheep, cattle, and horses graze under permit on over a half million acres of the Forest each season. Timber is managed with other resources to ensure supply, a quality environment and safety to the visiting public. Oil and gas drilling and extraction is occurring south of Duchesne. This activity is a forest priority and is therefore requiring emphasis by specialists and managers in both time and expertise to manage broad landscapes in a manner which protects and mitigates for development impacts. Over 2.5 million visitors come to the Forest each year to participate in outstanding outdoor recreation activities, such as boating, fishing, camping, hiking, backpacking, horseback riding, cross-country skiing, ATV use and snowmobiling.

Forest landscapes range from high desert country to high mountain areas. The elevation varies from a low of 6,000 feet to a high of 13,528 feet above sea level at the summit of Kings Peak. Topographical diversity and land management has served to protect the visual quality on the Forest. The existing vegetation patterns and the geological formations further add to the aesthetic value. The Forest boundaries include places such as the Sheep Creek Geological Area, the High Uinta Wilderness area, the Green River, and the Flaming Gorge National Recreation Area. Duchesne/Roosevelt Ranger District:

The Duchesne/Roosevelt Ranger District has 27 permanent employees and up to 32 seasonal employees and covers approximately 690,000 acres of National Forest land. The Ranger District is a district of two distinct vegetative types: Located 30 miles north of Duchesne are the deep canyons of lodge pole pine, douglas fir and ponderosa pine containing the majority of the districts developed 22 developed recreation sites and over 100 dispersed sites in 5 north to south trending canyons. Higher in elevation, the forest transitions into spruce, subalpine fir and aspen. Most of the upper elevation (9-12,000 feet) including over 100 alpine lakes and meadows are within the 456,000 acre High Uintas Wilderness. The Ashley is the lead management forest for maintaining the wildernesses character, 350 miles of hiking trails, 6 trailheads, as well as enforcement responsibilities. Located 20 miles south of Duchesne is the rolling upper desert country of the 150,000 acre south unit consisting of juniper and pinion which transitions to Douglas fir and aspen. The forest peaks along an east/west trending ridge with 70 mile stunning distant vistas. This unit has a majority of the forests oil and gas drilling and production activity and accounts for an upward trending work load for staff. This unit's recreation includes dispersed activities consisting of camping, fishing and hunting of big game including deer and elk and designated ATV and hiking trails.

About Duchesne, Utah

Duchesne (pop. approximately 1700) is a fast growing community with a high quality of life located within the Uintah Basin. Duchesne is located about two hours East of Salt Lake City, Utah, a half hour west of Roosevelt, UT and an hour west of Vernal, UT. The Vernal airport is a commuter link to Denver and Moab

(Great Lakes Airlines). The main street in Duchesne is U.S. Highway 40, which is one of the main routes between Denver, Colorado and Salt Lake City, Utah. Main Street was renovated to include, brick sidewalks, unique gas lamp style lighting, park benches and shrubbery. Starvation State Park/Reservoir is located just west of the city limits and incorporates the 2740 acre Starvation Reservoir and is known for its summer and ice fishing opportunities for: walleye, rainbow and brown trout as well as small mouth bass and perch. At the park are sandy day use areas, concrete boat ramps, ice fishing, newly renovated campgrounds with electricity and pavilions as well as year round primitive cabins.

Schools

Elementary School – Kindergarten through 6th Grade.

High School – Grades 7 through 12.
