**Prescribed Fires Continue to Restore the Landscape**

Williams, AZ – With the primary objective of protecting the Williams, AZ watershed, fire managers will continue prescribed burning operations south of Bill Williams Mountain in the Twin project areas, during the week of October 26, 2014. This on-going effort to remove accumulated hazardous fuels is part of the multi-dimensional process of accelerated forest restoration taking place over time.

The Twin project areas are located on the southern base of Bill Williams Mountain immediately north of FR 122, also known as the Twin Springs Road. The planned project area is approximately 620 acres and smoke impacts are expected to be light to moderate. Smoke may be visible from Williams, AZ and surrounding communities, Interstate 40, State Route 89 and County Road 73.

All prescribed fire activity is dependent on regional Forest Service approval, personnel availability, weather – including winds and ventilation, and approval from the ADEQ [www.azdeq.gov](http://www.azdeq.gov).

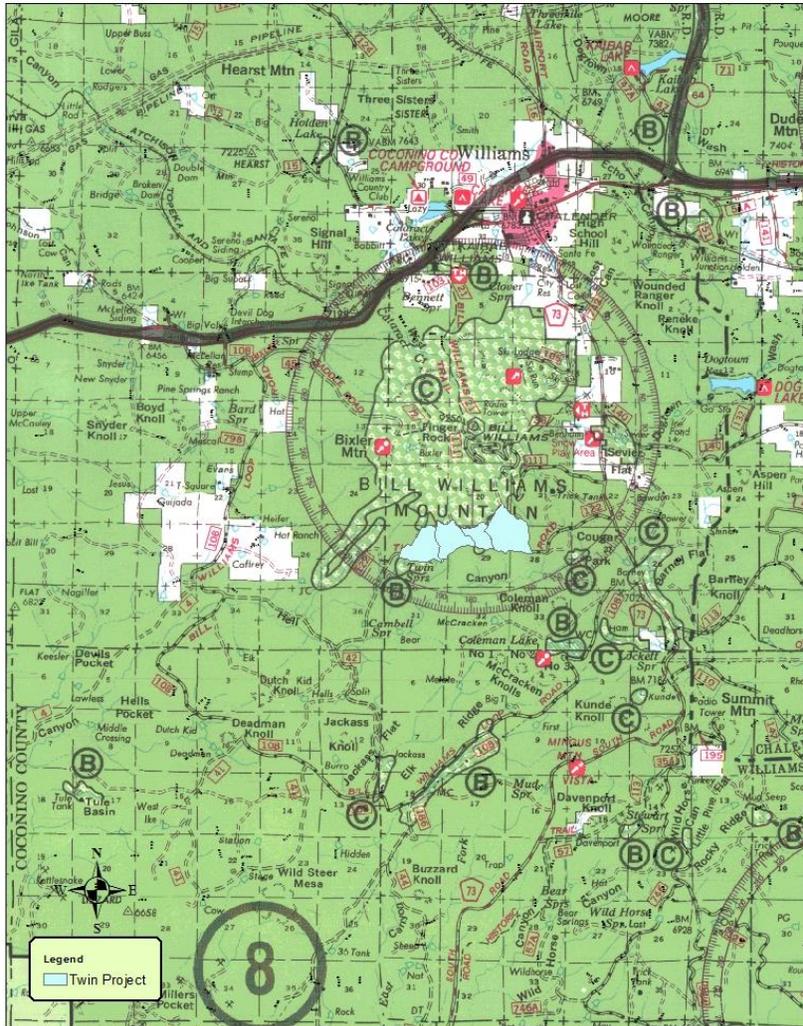

Additional resources regarding smoke and air quality are available at <http://wildfire.az.gov> .
