

STOP AQUATIC HITCHHIKERS!™

Zebra mussel. Photo by Amy Benson, U.S. Geological Survey, Bugwood.org.

Non-native plants and animals are invading our lakes and streams. These aquatic hitchhikers:

- Ruin boat engines and jam equipment;
- Harm game fish and native species;
- Raise operating costs of water and power plants.

CLEAN

Clean plants, animals and mud from all equipment.

DRAIN

Drain water from all equipment before leaving. Do not dump bait or plants into the lake.

DRY

Dry your boat, trailer and all equipment completely.

Stop the Spread: Inspect Everything!
