

View the black and white MVUMs on your GPS unit

(compatible with newer Garmin GPS units only such as Alpha, Astro, Dakota, Oregon, Colorado, Edge 800, Montana, Rino 650, GPSTMap 62 series, GPSTMap 78 series, eTrex 20 and eTrex 30)

Open the file and extract the .kmz files to your PC. Plug in your compatible Garmin GPS unit and copy the .kmz file(s) to the "CustomMaps" folder on the GPS unit. Unplug your GPS and then select "Set Up - Map- Map Info" and change "Disabled Custom Maps" to "Enable."

Note: For GPS Travel maps (in color) that are compatible with older Garmin models, click [here](#).
