Fire killed trees – Black Oak Group Campground

Georgetown Recreation Facilities Fire Recovery Project

- Salvage dead and dying hazard trees
- Thinning dense groups of green trees for more space, water and light
- Remove small green trees and shrubs to promote health of the forest
- Repair damage to recreation facilities, water tank, generator shed, and picnic tables
- Barrier replacement
- Fill in burned stump holes

Georgetown Recreation Facilities Fire Recovery Project

- Conduct tractor piling and handpiling of logging debris
- Burn logging slash and small trees and shrubs with prescribed fire
- Grind up small trees and shrubs to provide more space, light and water for healthy forest
- Plant trees in areas where trees were killed by the fire.
