

ANNUAL OPERATING INSTRUCTIONS

2015 Grazing Season
(3/01/2015-2/28/2016)

Williams Ranger District
Kaibab National Forest

Davenport Lake / Homestead / Sitgreaves Allotments

Agreed To By: Frank W. McNelly
Frank McNelly, McNelly Ranches, L.L.C.,
Permittee

Date: 4/16/2015

Approved By: Lisa Jones for
Danelle D. Harrison, District Ranger

Date: 4/17/2015

2015 Annual Operating Instructions (AOI)

Allotment: Davenport Lake / Homestead / Sitgreaves Allotments

Permittee: McNelly Ranches, L.L.C.

Permit Number: 07896 & 07894

Permitted Use:

Allotment	Permittee	Numbers	Type	Season
Davenport Lake	McNelly Ranches, L.L.C.	145 Cow/Calf	Term	05/16-10/31
Homestead	McNelly Ranches, L.L.C.	125 Cow/Calf	Term	05/01-10/31
Sitgreaves	McNelly Ranches, L.L.C.	1,531 AUM's Cow/Calf	Term	05/15-10/31

1. **Authorization:** Authorized to graze the following in 2015:

Allotment	Permittee	Numbers	Type	Season
Davenport Lake	McNelly Ranches, L.L.C.	500 Cow/Calf	Term	07/14-09/01
Homestead	McNelly Ranches, L.L.C.	500 Cow/Calf	Term	10/08-10/31
Sitgreaves	McNelly Ranches, L.L.C.	500 Cow/Calf	Term	05/01-07/13 09/02-10/07

** As agreed upon by the Williams District Ranger and Williams District Range Staff, a shorter period of use with additional livestock not to exceed allotted Animal Unit Months (AUM's) in a grazing season for the Davenport Lake, Homestead, and Sitgreaves Allotments has been authorized for the 2015 grazing season.*

Counting Livestock: The standard for counting livestock on an allotment is as follows:

- a. All cattle six (6) months of age or older **at the time of entering** the National Forest **and all weaned** animals regardless of age will be counted against the permitted numbers on the allotment and charged for at the current rate.

Nonuse: Application for credit or refund must be made in “**writing**” and “**in advance**” by the permittee to the District Ranger using Form FS-2200-1 (Refund, Credit, or Transfer Application). When it is not possible to be timely in getting to the Ranger District Office, the permittee may phone in a request for refund or credit. The permittee will then complete Form FS-2200-1 (Refund, Credit, or Transfer Application) at the next visit to the Williams Ranger District Office. **Note:** Credit or refund applications will not be processed unless value is \$100.00 or more and District Range personnel have been notified either in advance or at the time livestock are removed from NFS Lands.

2. **Management:** Davenport Lake / Homestead / Sitgreaves 2015 Pasture Rotation:

Allotment	Pasture	Time Frame
Sitgreaves	Fues	5/1-6/1 (500 cow/calf)
Sitgreaves	Wade	6/02-7/2 (500 cow/calf)
Sitgreaves	Buggy Wheel	7/3-7/13 (500 cow/calf)
Davenport Lake	Fix	7/14-7/24 (500 cow/calf)
Davenport Lake	Depot / Chalender	7/25-8/25 (500 cow/calf)
Davenport Lake	Butler	8/26-9/1 (500 cow/calf)
Sitgreaves	El Paso	9/2-10/7 (500 cow/calf)
Homestead	Hardy / White House	10/8-10/18 (500 cow/calf)
Homestead	Clark / Indian	10/19-10/31 (500 cow/calf)

Please notify us of cattle movements onto and off of the allotments, as well as refinements that may be needed to enhance the management system. If you identify the need to differ from this management system by more than 14 days, please contact District Range personnel at least two weeks in advance so that we have time to conduct monitoring and assess your request.

3. **Utilization Standards and Monitoring:**

In accordance with the Decision Notice signed on September 28, 2004, the allowable use level set for the Davenport Lake Allotment will be light use of 30% and Homestead Allotment will be conservative use of 40%. In accordance with the Decision Notice signed on September 15, 2005, the allowable use level set for the Sitgreaves Allotment will be conservative use of 35%. Key areas will be visited to determine actual grazing use / seasonal use by livestock and wildlife. Monitoring will be conducted within two weeks before or after livestock leave a scheduled pasture. If utilization levels within portions of a scheduled pasture approach allowable use, you are required to move livestock into areas not approaching allowable use. If cattle cannot be effectively managed away from areas within the pasture that have met allowable use or if utilization objectives are met throughout the pasture prior to scheduled rotation, contact District Range personnel. Cattle will be moved into the next available pasture within the annual rotation. In the event that forage utilization objectives are met in all available pastures, livestock will be removed from the allotment. Management adjustments will be made to the following years Annual Operating Instructions to avoid recurring situations.

The following dates have been tentatively scheduled for monitoring on the allotments. You are highly encouraged and invited to participate in monitoring with District Range personnel and/or on your own.

Allotment	Pasture	Monitoring date
Sitgreaves	Fues	5/21/15
Sitgreaves	Wade	6/22/15
Sitgreaves	Buggy Wheel	7/16/15
Davenport Lake	Fix	7/20/15
Davenport Lake	Box Car Hill / Chalender	8/18/15
Davenport Lake	Butler	9/4/2015
Sitgreaves	El Paso	10/1/15
Homestead	Hardy / White House	10/13/15
Homestead	Clark / Indian	11/2/15

4. Forage Growth and Water Availability:

Per Part 2, clause 8(c) of your Term Grazing Permit, if forage growth and water availability are not adequate during all or portions of the 2015 grazing season, total or partial livestock removal from the allotments may be necessary.

5. Fire

Be careful with campfires and branding fires. Pile burning is not permitted. During periods of critical fire danger, the Forest Supervisor may declare a Red Flag Alert or issue other special restrictions. Under these conditions, the building or use of fires, the use of power saws, heavy equipment, vehicles, ATV's, and other motorized equipment may be prohibited on Forest Service Land.

6. Salt and Supplement Policy

Supplemental feeding of livestock is allowed (to strategically manage livestock distribution and forage use) as follows:

- a) Place supplements on previously disturbed areas (i.e., borrow pits) or natural bedrock outcrops when possible (supplement sites).
- b) Locate supplement sites 0.25 mile or more from waters and key areas except where prior written permission has been obtained from the District Ranger.
- c) Locate supplement sites where forage is abundant and utilized less than average.
- d) Limit supplement types to non energy feeds such as salt, protein, and mineral blocks.
- e) Use products that prevent the spread of noxious weeds, no feeding of hay on National Forest System Lands.

7. Travel Management:

The Travel Management Rule (TMR) has been implemented on the Williams Ranger District of the Kaibab National Forest. Implementation of TMR will require active management of all motorized use, including that related to permitted grazing activities. Motorized travel off the designated road system by grazing permit holders should be based on need related to carrying out required management practices. Legitimate motorized use, including cross-country access, needed for conducting activities required under Term Grazing Permits will be authorized unless compelling natural and/or heritage resource issues are evident.

Any unplanned or emergency type travel not previously contemplated in the Term Grazing Permit will be discussed with appropriate authorization and guidance established in the AOI. If access is required in a motor vehicle restricted area or on a closed road, you must have special authorization in the form of an Off-Road Vehicle Permit or specific authorization through your AOI.

8. Range Improvements:

All assigned range developments identified in your Term Grazing Permit must be maintained to a functional status.

Advance planning is needed for fences when it comes to complete rebuilds and the use of heavy equipment to evaluate the need for any additional surveys. In the event that you are authorized to use heavy equipment, please follow the Heavy Equipment Policy (December 2008) before starting any work that involves soil disturbance. General maintenance/repair, such as replacing several T-posts, braces, and strands of wire is excluded. Advance planning is also needed for authorized stock tank cleaning so surveys can be scheduled accordingly. Please contact the District Range personnel in advance if you are proposing any of this type of work to inquire about the availability of materials, necessary clearances and for a permit modification.

A Forest Products Free Use Permit must be obtained in order to cut juniper fence posts and stays for use only on your Forest Service allotment. No tree cutting is allowed without a forest products permit.

Hazard trees may need to be cut to prevent them from falling on fences. However, no tree cutting may be conducted without specific written permission from the Forest Service.

Please protect natural springs and areas with riparian type vegetation. Drainage bottoms, creeks, springs, and cienegas, where water is available, are most susceptible to livestock concentrations.

The following range improvements were discussed and planned for this grazing season:

Improvements:**Davenport Lake Allotment**

1. Clean the following tank: Davenport Lake South Tank #2125 between Depot and Chalender Pastures. You must contact Archeologist Neil Weintraub (928-635-5647) for required clearances at least two weeks in advance of when you would like to begin work on Davenport Lake South Tank.
2. Normal fence maintenance throughout the allotment.

Homestead Allotment

1. Seal Old Hardy Tank #2465 with bentonite. You must contact Archeologist Neil Weintraub (928-635-5647) for required clearances at least two weeks in advance of when you would like to begin work on Old Hardy Tank.
2. Clean dirt tanks and repair the spillways on the following tanks: Log Tank #2364, Willow Spring Tank #2069, and Pedigo Tank #2363. You must contact Archeologist Neil Weintraub (928-635-5647) for required clearances at least two weeks in advance of when you would like to begin work on Log Tank, Willow Spring Tank, and Pedigo Tank.

Sitgreaves Allotment

1. Reconstruct the following fence: Fence #2090 between Wade and Buggy Wheel Pasture ~1.2 miles.
9. **The Davenport Lake / Homestead / Sitgreaves Allotments Annual Operating Instructions (AOI)** are a part of the Term Grazing Permit as provided for in Part 3, Section 8. The AOI complies with the standards and guidelines found in the September 28, 2004 Homestead and Davenport Lake Allotments Decision Notice for the Homestead and Davenport Lake Allotments, and the January 4, 2006 Homestead and Davenport Lake Allotments Management Plan; the September 15, 2005 Sitgreaves Allotment Decision Notice for the Sitgreaves Allotment, and the December 18, 2014 Sitgreaves Allotment Management Plan. All allotments comply with the Kaibab National Forest Plan. It also complies with the Endangered Species Act on-going grazing consultation for the Davenport Lake, Homestead, and Sitgreaves Allotments. Any additional information collected during the year may be incorporated into the annual operating instructions.
