

File Code: 2230/2210

Date: May 19, 2015

Richard Schowengerdt
Salmon River Ranches
2794 Hwy. 93
Salmon, ID 83467

Dear Richard,

This letter serves as your 2015 Annual Operating Instructions (AOI) for the Lime Creek C&H Allotment, and should be considered an extension of your Term Grazing Permit #20072. Prior approval by the District Ranger is required to amend or change these instructions.

You received a Notice of Non-Compliance on April 15, 2015. The following actions are required of you throughout the 2015 and 2016 grazing seasons to remedy the 2014 non-compliance:

- Cattle found in the wrong units or allotments will be returned immediately to the correct pasture, or within 24 hours when notification by phone is given.
- All livestock must be removed from the Lime Gulch Allotment by the date authorized in your AOI, or in time to avoid exceeding any use standard as per the AOI instructions.
- All annual maintenance on assigned improvements must be completed per your Term Grazing Permit. Range improvements must be kept to a standard of repair which prevents livestock from entering the wrong pasture or allotment. The range improvements must be functional, safe, and acceptable to the Forest Service. It is your responsibility to assure that all gates are closed within the unit in which livestock are authorized to graze.
- Units scheduled for rest must not be grazed; trailing through rested units will be supervised and be completed in one day.

Permitted Use

Permittee	No. and Class	Permit Type	Season of Use	Head Months
Richard Schowengerdt	267 Cow/Calf	Term	05/25- 10/10	1264

Authorized Use for 2015

Permittee	No. and Class	Permit Type	Season of Use	Head Months
Richard Schowengerdt	250 Cow/Calf	Term	05/25 – 09/21	986

Pasture Rotation

The on-dates listed above are only a guide. Actual turn out will be when range readiness occurs. Moving off the allotment must occur before forage utilization standards have been met, and no later than the scheduled off-date.

Unit	Number	On-Date	Off-Date
Gooseberry BLM	250 Cow/Calf	05/20	06/04
Gooseberry FS	250 Cow/Calf	05/25	06/04
Seven	250 Cow/Calf	06/05	07/10
Lime Creek	250 Cow/Calf	07/11	08/15
Crane Basin	250 Cow/Calf	08/16	09/21
Hole in the Rock	Rest	Rest	Rest

Utilization Standards

Unit	Indicator	Standard
All	Riparian Greenline	>4"
	Woody Browse	Multi-stemmed Species (e.g. willows): <50% Single Stemmed Species (e.g. aspen): <30%
	Stream Bank Alteration	<20%

Permittee's Management Responsibilities

1. Three days prior to initial cattle turn-out, please inform the authorized officer in charge.
2. It is your responsibility to insure livestock are moved before utilization levels are exceeded. You must notify the Rangeland Management Specialist of this move.
3. Riding and herding are necessary to properly distribute livestock. You must provide a rider throughout the grazing season to maintain proper distribution of cattle, reduce use in riparian areas, and prevent concentrated use by livestock that could result in portions of the pasture becoming over-utilized.
4. *Use of riparian areas needs to be carefully monitored by you to know when it is time to move livestock to the next unit and to avoid exceeding standards. Do not rely on range personnel to monitor use.*
5. Salt should be placed on accessible range at least ¼ to ½ mile from permanently located watering places, riparian zones, meadows, and other areas where cattle naturally congregate. Placement should be in upland areas where additional forage utilization is desired. Salting areas should be moved annually to avoid permanent damage around

salting grounds. Do not use the same salting grounds year after year.

6. With multiple-uses on the forest, gates are often left open and cattle stray into the wrong pasture. We realize this is a problem and an inconvenience. However, it is still your responsibility to keep your animals in the proper unit. Cattle found in the wrong units or allotments should be returned immediately to the correct pasture. Routine checks need to be made by you and/or your rider. Notification to your Range Management Specialist of the issues must be made immediately
7. Any carcass or animals remains will be moved at least 100 yards from water, trails, and roads within 24 hours of notification by the Rangeland Management Specialist.
8. Under Special Order # 04-00-097 all hay, straw, or mulch brought onto the forest for the feeding of horses must be Certified Weed Free.
9. I am requesting that you be a pro-active partner in the prevention and inventory of noxious weeds on your allotment and adjacent National Forest System lands. All equipment which is used off of open roads on federal lands (for range improvement maintenance, or other management activities) should be cleaned and free of noxious weeds and their seeds prior to coming onto National Forest System lands. Please share your knowledge of known noxious weed infestations with your Range Management Specialist.
10. Any motorized travel on routes not designated in the Salmon-Challis National Forest Travel Plan must have District Ranger written authorization in advance. Please see enclosed Vehicle Use Permit.
11. *The move-off date is the date you must have all cattle off the allotment, not the day to start moving cattle off the allotment.*

Range Improvements

The Upper and Lower Red Hill unit boundary fences # 220470 and #22471 need replacement of some H-braces and rotting wooden posts; the wire is there but needs to be strung. This work is your responsibility and must be completed before livestock are on National Forest in the Gooseberry Unit. This is needed to assure that the Hole in the Rock Unit (HRU) is rested in 2015, in addition to meeting the standards for fence maintenance in Part 3 of your term grazing permit.

No ground disturbing activities or new construction should be conducted on the Forest by you, or any of your personnel, without approval from the District Ranger. Materials for replacement and heavy maintenance may be provided by the Forest Service as funding allows. Provision of

materials for normal yearly maintenance is your responsibility.

All annual maintenance on assigned improvements must be completed per your Term Grazing Permit. They should be kept to a standard of repair which is functional, safe, and acceptable to the Forest Service. Improvements are listed in your Term Grazing Permit and are shown on the allotment map. Failure to complete necessary maintenance may result in the initiation of permit suspension or cancellation procedures in whole or in part.

Other Considerations

Range inspections may occur several times during the grazing season to check maintenance of range improvements, forage utilization, and compliance with this year's grazing rotation. You are invited to participate in inspections conducted on the allotment. We will try to contact you a few days in advance to let you know when we will be looking at your allotment.

Enclosed is a Year-End Grazing Report for you to record Actual Use Data for 2015 and range improvement needs for future grazing seasons. Please record the date and number of livestock turned onto the allotment, the dates livestock are moved to and from each pasture, and the date livestock are removed off the allotment. Accurate records of these dates, maintenance work completed, and future range improvement needs must be returned to our office by December 1, 2015. Please note on the second page our request for your priority reconstruction needs. The Forest Service will use this record to help allocate range betterment funds, which are used to purchase materials for improvement reconstruction. These reports are also requested annually by United States Fish and Wildlife Service and the National Marines Fisheries Service, so your diligence in accurately completing the forms is appreciated.

If you have any questions regarding this AOI, please contact Barry Dopp, Range Management Specialist, at (208) 879-4100. We look forward to working with you this grazing season.

Sincerely,

/S/ KATHERINE L WOOD
