2015 Annual Operating Instructions
Stanley Basin LLC #4587
Stanley Basin C&H Allotment # 46000

1: INTRODUCTION:

Permitted Use:

Permittee	Allotment	Numbers	Season	Head Months
Stanley Basin Cattle LLC	Stanley Basin C&H	177 c/c	06/11-10/30	826

Authorized Use: Upon payment of fees, you are authorized to graze as follows:

Allotment	Numbers & Kind	Season*	Head Months
Stanley Basin C&H	177 c/c	06/11-08/30	471

*Actual on-dates, off-dates, and grazing rotations will be determined on the basis of range readiness, utilization, or other resource considerations as deemed necessary by the authorized Forest Officer. Such changes will typically be made in consultation with the permittee(s).

Permitted Livestock Brands:

Robert Piva

LRC

Julian Piva

LRC

Joe Piva

RRC

2: COMPLIANCE:

This AOI is made part of your Term Grazing Permit consistent with Part 1, Item 3 and Part 2 Item 8(a) of the General Provisions and Requirements. Your compliance with these instructions is essential for the proper management of National Forest System lands. Failure to comply with the terms and conditions of your permit and these instructions may result in issuance of a notice of non-compliance with the terms of your grazing permit.

Permittees with livestock in rested units, grazing units outside the season of use, and grazing areas not authorized, will be held non-compliant with the terms and conditions of their Term Grazing Permit. Such non-compliance may result in billing for excess use, permit modification / cancellation, or other actions as provided in FSH 2209.13.

Situations may develop during the grazing season which require modifications to these instructions. If this becomes necessary, or if you cannot comply with some part of these instructions, contact the District Ranger and obtain approval before initiating changes or deviating from these instructions.

All livestock feed or straw brought on to the forest is required to be certified weed free.

3: BILLING:

The 2015 cost per Head Month for cattle is $1.69 per head month/cattle. A Bill for Collection will be mailed to you. Grazing fees must be paid by the date specified on the Bill for Collection to:

USDA Forest Service c/o Citibank
PO Box 301550
Los Angeles, CA 90030-1550

Confirmation of payment through the "lock box" process must be received before livestock can enter NFS lands.

4: LIVESTOCK MANAGEMENT:

2015 Rotation:

Unit	Numbers	Approximate Season*
Anderson	177 c/c	06/11-06/25
Job/Crooked	177 c/c	06/25-07/08
South Basin	177 c/c	07/08-08/30

*When utilization is met in each pasture, cattle are to be moved on to the next scheduled pasture or removed from the allotment.

You will be responsible for monitoring livestock move thresholds or "triggers" during the grazing season. These "triggers" will assist you in ensuring that end of season utilization standards are not exceeded. The Sawtooth NRA range staff will conduct spot checks as necessary. Typically, "triggers" will be the standard(s) listed below in section 6, "Standards and Guidelines". **It is strongly suggested that livestock be moved before utilization standards are reached.** This will help to prevent forage utilization in excess of standards, allowing for time to clean the unit of stragglers.

Please realize that it is in your best interest to keep cattle distributed throughout useable areas in the currently authorized pasture. **Use of riparian areas needs to be carefully monitored by you.** If cattle are allowed to concentrate in riparian areas and around water developments, utilization standards will likely be reached prior to the scheduled pasture move or "off-date". This may result in directed early pasture moves or early removal of livestock from the allotment.

5: STANDARDS AND GUIDES:

The following timing restrictions apply to this allotment:

- ***Job/Crooked Unit*** *– Livestock will be removed prior to 08/15 for bull trout spawning.*
- ***Lower Stanley Lake Creek Unit and Lower Stanley Creek*** *– May be used for livestock trailing only.*
- ***Lower Valley Creek*** *– Livestock must be removed by August 1 for Chinook salmon spawning. Use is limited to 15% livestock grazing, and only by livestock that drift out of the South Basin Unit. Cattle will be moved out of the Lower Valley Unit whenever 10 or more cow/calf pairs are present.*

You are responsible for tracking forage use levels and complying with utilization standards. For your convenience, the Stanley Basin C&H maximum allowable forage utilization levels under the Sawtooth FLRMP are listed below.

Riparian Areas: all units – all creeks – 4" utilization standard
Water sedge (Carex aquatilis) or Nebraska sedge (Carex nebraskensis) will be the key species measured to determine riparian (greenline) utilization.

- When riparian goals and objectives are not being met, the following standard applies.
    - Forage Utilization standards for riparian areas shall not exceed 30% use of most palatable forage species, or must retain a minimum 6-inch stubble height of hydric greenline species, whichever occurs first, (Standard 03109).

Upland Vegetative Cover Types: all units – Sagebrush/Fescue – 40% utilization
Bluebunch wheatgrass (Agropryon spicatum) and Idaho fescue (Festuca idahoensis) will typically be the key species measured to determine upland utilization, though other species may be measured to estimate utilization at the discretion of the Forest Officer.

- **Early season grazing** (ie: through early July): **40% use** or retain a minimum of 3-inch stubble height for Kentucky bluegrass, a 6-inch stubble height for Bluebunch wheatgrass, and a 2-inch stubble height for Idaho fescue, (Standard RAST01).
- **Late season grazing**, after seed ripe conditions: will not exceed **50% use**, (Standard RAST01).

6: IMPROVEMENTS:

All improvements for which you have maintenance responsibility are listed in Part 3 of your Term Grazing Permit.

Improvements will be maintained to Forest Service standards before livestock enter the pasture/allotment.

When improvements have been maintained, please call the Stanley Ranger Station and report that maintenance has been completed. If verification is not received from the permittee prior to the allotment "on-date", follow-up inspections may be made. If it is found that maintenance has not been completed, and the responsible permittees livestock are present on the allotment, the permittee may be billed for unauthorized use and / or permit action taken for non-compliance.

Permittee (or authorized agent of permittee) use of ATVs and motorcycles outside designated routes shown on the Sawtooth National Forest/Sawtooth National Recreation Area Motor Vehicle Use Map is limited to that required for allotment management operations such as maintenance and repair of range improvements, and distribution or retrieval of salt during or immediately after the authorized grazing season.

If an allotment is in non-use status, the permittee is still responsible for improvement maintenance.

Improvements used in common with an adjoining permittees, such as allotment boundary fences, must be maintained to standard before either permittee allows livestock to enter the allotments.

No ground disturbing activities may be conducted by the permittee or their personnel on National Forest System lands without prior approval from the authorized Forest Officer.

Any plans to reconstruct or build new improvements on the Forest should be coordinated with the range staff.

7: PERMITTEE OR RIDER INSTRUCTIONS:

Please notify SNRA range staff at 208-774-3000 before allowing your livestock to enter the Stanley Basin C&H Allotment.

Because of increasing public use, gates are often left open and cattle stray into the wrong pasture. We realize this is an inconvenience. However it is still the **permittees responsibility to keep their permitted livestock in the approved pasture/allotment.** Routine checks should be made by you and your rider to assure compliance.

Salt should be used to spread livestock utilization across the pasture being grazed. The permittee is responsible for using water and salt to achieve the best distribution of cattle throughout the pasture.

Livestock salting is prohibited within riparian areas and wetlands. Do not place salt within 100 yards of any watering area or meadow unless you receive prior approval. This includes, but is not limited to, springs, seeps, water troughs, and creeks.

- Salt location on the rise at T11N R13E Section 18, NW corner of the SESE, has been approved for use.

Salt will be removed from areas where the maximum allowable use levels have been reached or at the end of the grazing season, whichever occurs first.

By USDA order #04-00-097, all non-pelletized hay, straw or mulch possessed, stored, or transported on National Forest System Lands, in individual bales or containers, must be tagged or marked as weed free, or must have the original and current evidence of weed free certification documentation present. All markings must meet State and/or County standards for certification as weed free.

8: REQUIRED REPORTING:

Enclosed is an actual use record form for the upcoming season. Please use this form to record the time (dates) livestock spend on an allotment as well as other information such as livestock loss, salting, grazing use, resource concerns, improvement needs etc. The grazing use record should be returned to the district office within 30 days after the grazing season.

Please submit requests for credits or refunds before December 31.

9: INSPECTIONS & MONITORING:

Brands will be checked periodically throughout the grazing season.

Range inspections may be made several times during the grazing season to check maintenance of range improvements, forage utilization, and compliance with the grazing rotation and standard requirements. If you are interested in participating in allotment inspections, please notify the range staff at the beginning of the grazing season.

End-of-season compliance monitoring will be conducted by the SNRA Range Staff. Exceeding end-of-season utilization standards will be regarded as an instance of non-compliance with the terms of your grazing permit. In addition to the potential for permit action, this may further result in the modification of

grazing management (including reductions in Head Months or permitted area) until the risk of adverse impacts to habitat is minimized.

10: COORDINATION & COOPERATION:

Questions about what can or cannot be done in reference to defending livestock, harassing wolves, or shooting wolves should be directed to:

- Craig White, IDFG SW Idaho Regional Wildlife Program Mgr. - Nampa, Idaho (208-465-8565)
- Todd Grimm, State Director USDA APHIS Wildlife Services - Boise, Idaho (208-378-5077)
- Sam Kocherhans, Wildlife Services Technician - Ketchum, Stanley & Fairfield (208-681-8792)
- Jason Husseman, Idaho F&G Regional Wildlife Wolf Biologist – Salmon, Idaho (208-756-2271)

Permittees should continue working with their local Wildlife Services representative on depredation issues.

In order to reduce the potential for depredation, the Forest Service recommends that the following procedures be implemented each grazing season:

- Remove cattle and saddle stock carcasses from the area where they will not serve as an attractant to predators. The intent of this recommendation is not to require removal of carcasses from the allotment, but to remove them out of areas currently being grazed or areas soon to be grazed.

Work with IDF&G and Wildlife Services in implementing other effective preventative actions to reduce the risk of depredation.

11: OTHER:

Currently the Sawtooth NRA Area Ranger position is vacant; I am filling in temporarily as the Sawtooth NRA range and noxious weed Line Officer. If you would like to discuss anything please contact me at 208-622-5371, or Robert Garcia 774-3014, or Beth Bratlie 774-3013.

We look forward to working with you and solicit your cooperation and involvement in bringing about sound range and livestock management practices that will enhance all of the allotment's resources.

13: MAPS, FORMS & ATTACHMENTS:

Permittee actual use form (use, losses, costs, etc.)

Stanley Basin C&H
2015 ACTUAL USE RECORD

Planned use from the AOI:

Allotment	Numbers	Season
Anderson	177 c/c	06/11-06/25
Job/Crooked	177 c/c	06/25-07/08
South Basin	177 c/c	07/08-08/30

Please fill in your actual use by the unit grazed and the number of livestock and dates grazed in each unit. Bulls count as part of your permitted numbers.

Unit	Number of Livestock	Kind of Livestock	Date Entered Unit	Date Left Unit

LOSSES: Indicate number and class of animals lost by cause.

Unit	Class of Lvstk	Predators	Poison	Other

Days spent maintaining allotment improvements: _____
Approximate cost of materials: $_____
Approximate cost to manage livestock on National Forest, including riding, salting etc.: $_____
