

EAST NATURITA C&H 2015 ANNUAL OPERATING INSTRUCTIONS

These are your annual operating instructions and are part of your term grazing permit, as specified in part 2, item 8(a), and Part 3, (management practices) item 2.

Permitted Number and season of use:

Lyman D Campbell Trust 06/16 – 10/07 181 c/c

Authorized use:

Lyman D Campbell Trust 06/16 – 10/07 181 c/c

ALLOTMENT MANAGEMENT		
Deferred Rotation Grazing System		
Grazing Rotation	Move Dates	Special Instructions
Unit 3	06/16 – 07/07	Cleanly move livestock through all pastures
Unit 2	07/08 – 07/30	
Unit 1	07/31 – 08/19	
Unit 4	08/20 – 09/09	
Unit 5	09/10 – 10/07	

RUNNING GRI SCORES		
Grazing Rotation	2013 GRI Score	2014 GRI Score
Unit 1	-1	+1
Unit 2	0	0
Unit 3	0	+2
Unit 4	+3	+1
Unit 5	+3	+1

Do not allow livestock to stay later than dates scheduled or change pasture rotations within this instruction at any time, unless authorized through amendment of this document. If forage conditions show greater than 50% utilization, you will move your livestock prior to the dates listed. If you feel that you need to stay in a pasture longer, or you feel there is a need to change the pasture rotations, you will need to make a request to your Rangeland Management Specialist. Any request to stay must be made prior to your exit date. No extension will be approved unless documentation shows that overall rangeland management objectives can be met with extended use in that pasture or use area.

Livestock management in 2015 will focus on the following:

- Continue using the GRI.

EAST NATURITA C&H 2015 ANNUAL OPERATING INSTRUCTIONS

- Range conditions, livestock distribution, compliance with annual operating instructions, forage utilization, etc. may be inspected during the summer field season. Cattle counts may also be conducted at any time as provided for in Part 2, Section 8(f) of your permit.

Monitoring and Administration: All permittees are required to keep Actual Use and Fence Maintenance records. In addition, you are required to utilize the Grazing Response Index for this allotment. An informational instruction sheet is included with this Annual Operating Instruction. If you require training on how to use the Grazing Response Index, please contact your Rangeland Management Specialist Brian Hoefling at 970-327-4261. These records will be requested by the administering office at the end of the grazing season.

For reference the target is a neutral GRI score averaged over three years by pasture where conditions are “Fair” or greater. The target is a positive GRI score averaged over three years by pasture where conditions are “Poor”.

Special Livestock Trailing Instruction: Trailing through National Forest Service controlled lands is allowed for one day on both ends of the grazing season via the Hamilton Road.

Range Improvements: Maintenance of allotment boundary fences will be completed prior to turning out on the allotment. Maintenance of all other assigned range improvements must be completed prior to turning out in that unit. Maintenance will be completed according to the specifications outlined in part 3 of the term grazing permit. Reconstruction or construction of range improvements will not occur without a signed and approved permit modification, and cultural resource survey, where needed.

Salting: Salt will be placed no closer than 1/4 mile to all water sources, roads, trails, timber regeneration areas, meadows, or other key areas where forage utilization is of concern.

Grazing Fee: \$1.69/HM.

This figure is calculated according to a formula established by Congress in the 1978 Public Rangelands Improvement Act, and has continued under a Presidential Executive Order issued in 1986. Under that order, the grazing fee cannot fall below \$1.35 per head month and any increase or decrease cannot exceed 25 percent of the previous year’s level. The formula considers three main factors – the average annual change in beef prices, leasing rates for the grazing on private land in 11 western states, and the cost of livestock production.

Other: On November 12, 2014 Gunnison Sage grouse and its Critical Habitat was federally listed as a threatened species, under the Endangered Species Act of 1973. Some of this Critical Habitat is contained in your grazing allotment. Be aware that additional standards and instructions may be forthcoming regarding your grazing management.
