

Firewood Permits

Firewood permits may be purchased from your local ranger district office.

Personal Use

Firewood which will be used by the permittee and not sold to someone else may be purchased for \$20. This entitles the permittee to 4 CCF (approximately 4 cords) of wood.

Commercial Use

These permits are for those who sell firewood to other users. Prices for these permits are \$50 and up depending on estimated volume.

Generally permits will be valid for six months or less and will end on March 30, June 30, September 30, or December 31. Usually firewood areas are located within closed timber sale units or other areas with down timber. Occasionally some areas of standing trees are marked for firewood removal. Please contact your local district office for more information on permit requirements and where firewood is currently available.
