

# Fall Colors on the Allegheny National Forest

## **This week's fall color report:**

**On the ANF**, the leaves are turning very slowly this year, with most areas on the forest at about 10% change. The road to the Hearts Content Scenic area is just beginning to show some lovely golden color along the edges. The peak of color is still seems to be at least a week away.

## **To see other color reports:**

- [Northeastern United States](#) (Forest Service Region 9)
- [National Fall Colors Website](#) (Forest Service Washington Office)

**We will also add slides from the ANF as we receive them. The photos in this slide show are from previous years. We anticipate this year's fall colors to be just as beautiful!**
