FOREST INFORMATION
A PUBLICATION OF THE U.S. FOREST SERVICE
Welcome to the 36th edition of the Cascade Lookout, a publication of the Okanogan-Wenatchee National Forest. Over the past 16 years the format of this paper has changed quite a bit but the content remains the same—user friendly, full of great information and a little bit of something for everyone!

You will notice there isn’t a date on the front of the paper. The goal is to make this paper “timeless,” meaning the information inside can carry over from year to year with minor updates and some story changes each year. We will see how this works. If you’d like to comment on this new format please send your comments to: rdemario@fs.fed.us.

For those unfamiliar with the Okanogan-Wenatchee National Forest, it encompasses more than 4-million acres in Washington state and stretches north to south from the Canadian border to the Groat Rocks Wilderness, a distance of about 180 miles. The forest lies east of the Cascade Crest, which defines its western boundary. The eastern edge of the forest extends into the Okanogan highlands, then south along the Okanogan and Columbia Rivers, and then to the Yakima River valley.

Because of this wide geographic range, the forest is very diverse—from the high, glaciated alpine peaks along the Cascade Crest and the numerous mountain ranges extending eastward from the crest, through deep, lush valleys of old growth forest to the dry and rugged shrub-steppe country at its eastern edge. Elevations range from below 1,000 feet to over 9,000 feet. Precipitation varies widely—from more than 70 inches along the crest to less than 10 inches at its eastern edge.

The Okanogan-Wenatchee National Forest is most noted for a wide range of recreation opportunities and many are listed in this paper. Check out the beautiful photos, maps, lists of campgrounds and trails, and other outdoor recreation information. There truly is “something for everyone” who likes to have fun in the outdoors.

Many areas of the Okanogan-Wenatchee National Forest have burned over the years. Historically, past wildfires burned through most dry areas every seven to 15 years. Fire has always played an important role in shaping these forested landscapes, but more recently uncharacteristically severe wildfires have occurred over vast areas of the forest.

Dangers exist during and long after a wildfire occurs. Large wildfires in 2010, 2012 and again in 2014 left hazards that forest recreationists need to be aware of when recreating in the Okanogan-Wenatchee National Forest.

Following are a variety of hazards to watch out for when traveling through areas where wildfires occurred.

Snags are not only obviously dead trees, but can also be blackened killed trees or green trees burned through at the bottom.

Snags can fall at any time. Besides the potential for striking people or property, they can block trails or roads, including your exit even though travel was unimpeded when you entered the area. Snags can make travel difficult if a lot of trees have fallen across the landscape.

Stump holes and root channels can still be burning and are hidden from sight until stepped upon.

Steep slopes and loss of vegetation may cause rolling rocks and mudslides or debris flows off hillsides at any time but the likelihood increases with rain and freeze-thaw events.

Loss of vegetation increases the potential for erosion to occur with any rain event. Water runoff may cause flooding that impacts or clogs road culverts and storm drains; sediment may move downstream affecting lands a long distance from the burned areas.

Even with minor precipitation, roads can have plugged culverts which cause debris flows onto roads.

Recently opened areas may still have areas with smoke and fire. Fire can smolder below ground in root channels and stump holes and pop up above ground as these sources of organic matter reach the surface. If smoke is discovered, report a fire to 911.

**SOME THINGS TO DO TO BE PREPARED:**

- Limit your use to just travelling through burned areas to reach your favorite recreation sites outside of the burns, don’t loiter in the burned areas.
- Carrying a saw or axe with you is a good idea when traveling on forest roads
- Stay current on weather forecasts and avoid areas that have been severely burned
- Do not try to cross an active mud or debris flow
- Please learn about and comply with area closure restrictions; these are in place for public safety
- Let someone know where you are going and when you plan to return home
Please follow these recommendations when recreating in the Okanogan-Wenatchee National Forest.

**CHOOSE AN EXISTING CAMP SITE**
Creating new campites kills vegetation and leads to soil erosion. Use only designated sites when possible.

**DISPERSED CAMPING**
Many people enjoy the solitude and primitive experience of camping away from developed campgrounds. Dispersed camping means there are no toilets, tables or drinking water. Follow these guidelines to ensure that these areas can be enjoyed by future generations.

- Choose sites that are already established.
- Protect water quality and aquatic habitat by camping at least 200 feet away from water sources.
- Don’t dig ditches around tents or trailers.
- Pack out all garbage.
- Do not carve or chop into tree trunks—this can eventually kill the tree.
- Soap degrades water quality and harms aquatic life, wash at least 200 feet from water sources and use biodegradable soap.

**PARK AWAY FROM THE WATER**
Parking near water eventually kills vegetation, leading to erosion and water pollution that makes it hard for fish and other aquatic wildlife to breathe. In addition, vehicles driven onto tree roots seriously jeopardize the health of the tree. Please park at least 200 feet back from the water.

**HUMAN WASTE**
Bacteria and viruses found in human feces are known to cause hepatitis, salmonella, giardia and other gastro-intestinal diseases. Please follow these steps when nature calls:

- Find a spot at least 200 feet from any water source.
- Dig a hole 6-8 inches deep and bury human waste.

**USE ESTABLISHED FIRE RINGS WISELY**
When building a campfire, please follow these simple steps:

- Keep your fires small and use wood collected or purchased locally. If collecting firewood near your camp, use only dead and down wood.
- Contact the local Ranger Station for current fire restrictions. Remember they can change on a daily basis.
- Use existing fire rings. Scrape away litter and any other burnable material within a 10-foot-diameter circle surrounding the fire ring.
- Have a shovel, axe and bucket of water available before lighting your campfire.
- Make sure all wood fits inside the fire ring. Don’t feed a large log into the fire ring.
- To put out a campfire, slowly pour water onto the fire and stir with a shovel. Continue adding and stirring until all material is cool to the touch.
- Do not bury your fire. The coals can smolder and re-ignite.
- NEVER leave a fire unattended, even if there are no flames present. Make sure it is out cold by running your hands through the ashes to make sure there is no heat left. Many wildfires have been caused by abandoned campfires.

**WILDLIFE VIEWING ETHICS**
- Give wildlife their space—use binoculars.
- If you find what you believe to be an orphaned or sick animal, leave it alone. Often the parents are close by and are waiting for you to leave.
- Pets must be restrained at all times.
- Do not feed wildlife.
- Leave the area if an animal shows signs of alarm. Watch for raised ears, skittish movements and listen for alarm calls.

**RECREATING RESPONSIBLY**

**SUGGESTIONS FOR SAFE HIKING**

**DAY HIKE REMINDER CHECKLIST**

- Food
- Water
- First Aid Kit
- Pocket knife
- Extra clothing
- Map & Compass
- Camera
- Sunglasses & Hat
- Whistle
- Insect repellent & sunscreen
- Check weather conditions
- Check if any restrictions are in effect
- Trip Itinerary left with responsible person
- Hiking buddy

For those contemplating a short day hike or a long trek into the backcountry, forest visitors need to keep a few safety guidelines in mind before heading to the woods.

People generally get in trouble hiking because they are not prepared, don’t have the necessary equipment, experience or ability. Here are a few safety guidelines to ensure that your trip is a safe one.

**Essentials you should take with you:**

- Water
- Healthy food to snack on during your hike
- First Aid kit
- Layers of clothing. As weather conditions change, add or remove clothing as needed.

You need to have a basic knowledge of the area where you’re going before you go. Know how to read a map and carry it with you. Also, carry a compass.

Allow your physical ability and plan your trek for trails that meet that ability. It is a good idea to start out with shorter hikes and then work up to more advanced levels of hiking.

If you get lost, stay put. Searchers will be looking for you in the area that you said you’d be in.

Take the advice that is given to children who may become lost—just hug a tree and wait for someone to find you.

Don’t disturb animals, and try not to surprise them. Make noise as you go. Whistling or talking will alert animals to your presence. This is especially good advice during berry season when bears are busy fattening up on these delicious treats.

Always hike with a buddy, never hike alone. Also, let others know where you are going, when you will leave, when you will return and contact them when you’re back safely.
AVOIDING UNPLEASANT ENCOUNTERS WITH WILDLIFE

Glimping wildlife—a bear lumbering through the woods or a majestic elk grazing in a meadow—is one of the greatest recreation attractions in the Okanagan-Wenatchee National Forest.

If a person is lucky enough to view wildlife, dangerous encounters are very rare. Wild animals are normally not aggressive or predatory towards people, but it is best to know what to do if these circumstances occur.

Usually, people see more deer and elk along the roads they drive to the woods than they see when recreating in the woods. If you see one of these animals on the road, others may be nearby, so slow down and pass carefully as they may suddenly bolt onto the road. If possible, avoid driving during dusk or dawn when most wildlife collisions occur.

Stop if you do encounter deer or elk while hiking; they will run away if given a chance. Move quickly out of the way and find cover (punch, kick and yell as last resort) if attacked.

**Mountain Goats** sometimes approach and follow people or enter campsites in search of salt. Goats have sharp, lethal horns and have been known to become aggressive.

If a goat approaches you, slowly move away. If the goat follows, be prepared to chase it off by yelling, waving arms and clothing or throwing rocks. Goats crave salt. Use the toilets where available. Otherwise, urinate on bare rocks, between rocks or locations inaccessible to goats, at least 100 feet away from trails or campsites.

**Snakes** are usually non-confrontational. They will quietly slither away if left alone. When surprised, most snakes will raise their heads and look at you. This is their way of saying, “leave me alone.” Rattlesnakes announce their irritation with a menacing rattle.

Be alert around rocks or boulder fields, grassy areas, deadfall and wooded areas near water. Avoid stepping where you can see where you’ll be placing your feet. Wear high-topped, leather boots, carry a walking stick and make noise as you tap the ground, brush and grass in front of you.

If you encounter a snake, stop, walk around it or just back off and allow the snake to escape.

Keep your campsite clean to ward off Bears, and do not leave food, garbage, coolers or cooking equipment out in the open.

Remember, bears are potentially dangerous and unpredictable—never feed or approach them. When hiking in bear country, stay on trails and make noise. If you see a bear in the distance, give it adequate space.

If you encounter a bear, stop, talk quietly in a calm, clear voice and back away slowly. Do not turn your back. If a bear charges, it is most likely a “bluff charge.” Do not run, just keep talking and backing away. If a bear huffs, pops its jaw, or stamps its paws on the ground it wants you to back away and give it space.

Bear encounters fall into two categories: a defensive encounter, where the bear has been surprised or is trying to defend something such as its young or food, and predatory encounters, where the bear wants something you have.

If a bear approaches in a defensive encounter, use bear spray to deter the bear. If the bear continues to approach, drop to the ground, lie on your stomach and “play dead” until the bear leaves.

If the bear approaches in a predatory encounter, stand your ground and be aggressive—yell, stand tall, wave your arms and throw objects, blow a whistle, use pepper spray or anything else to threaten or distract the bear. If a black bear makes contact, FIGHT BACK.

**Cougar** attacks on humans are extremely rare. Cougars are secretive and shy, and usually avoid contact with people. Running may trigger a cougars’ predatory response to attack, so it is best to never run or jog alone in cougar territory.

Never approach a cougar, especially if it is near a kill or young, and never offer it food. Make noise and go in groups. If you do encounter a cougar, stop, pick up small children and keep pets close. Face it and make yourself look as big and menacing as possible. Shout and yell while looking it directly in the eye, and slowly back away. If the animal does not flee, be more assertive by waving your arms and throwing anything available. If the animal attacks, fight back and DO NOT RUN!

**Wolves** are also shy. They generally fear and avoid humans, but encounters sometimes occur when humans and wolves use the same habitat. If you encounter a wolf, stay calm, don’t run, stand tall to make yourself look larger, slowly back away and maintain eye contact.

Wolves that approach people, buildings, livestock or domestic dogs are either habituated to humans, unhealthy, wolf-dog hybrids or former captive animals. Wolf-dog hybrids can be especially dangerous because they lack the shyness of wild wolves.

In most cases, wolf viewing is a safe pastime when people follow these general precautions:

**DO NOT FEED WILDLIFE!** Animals that get food from people may become aggressive and expect food from all humans they encounter. They can become a nuisance and may need to be destroyed to protect people.

**Do not approach wildlife.** View and photograph them from a distance as this minimizes stress to animals and provides a safe distance between you and them. If an animal approaches, it is best to move away and maintain a safe distance.

**Leave pets at home.** Pets may attract bears and cougars. If your pet accompanies you, be sure to keep it on a leash.

**Always keep children within your sight:** you don’t know what critter might be around the next bend in the trail.

**Watch for baby animals and leave them alone.** Cute babies mean protective parents.

**Report unusual wildlife encounters to National Forest or State Department of Fish & Wildlife offices.**

Whenever encountering wild animals it is always best to just walk back away and view them from a distance. Follow these guidelines to avoid dangerous situations and enjoy the wildlife that make the Okanagan-Wenatchee National Forest their home.
Those interested in temporary employment with the Okanogan-Wenatchee National Forest are encouraged to view job opportunities and apply online for seasonal jobs available during the spring, summer and fall.

Each year a wide variety of summer jobs are available, including those in firefighting, campground maintenance, trail construction, fisheries and wildlife survey work, engineering, road maintenance and more.

The easiest way to find out more and submit an application is to use the internet system set up specifically for this purpose. These websites provide tools for job seekers to get the information they need and to provide their application for summer jobs.

- www.fs.fed.us/fsjobs - provides basic information on Forest Service employment
- usa.jobs.gov - provides a listing of all government jobs, including temporary positions on the Okanogan-Wenatchee National Forest
- www.opm.gov/qualifications - for position qualifications
- www.fs.usda.gov/goto/okawen/jobs - for information about jobs on the Okanogan-Wenatchee National Forest

FLY SAFELY
- Take lessons and learn to fly safely.
- Do not fly near manned aircraft.
- Do not fly beyond line of sight of the operator.
- Do not fly over or near populated and noise-sensitive areas, such as campgrounds, trail heads and visitor centers.
- When flying within five miles of an airport or backcountry runway, contact the airport or control tower.
- Do not fly over or near wildfires without prior permission from fire managers. Unauthorized UAS flights could cause serious injury or death to firefighters on the ground and could have midair collisions with aircraft engaged in wildfire suppression missions.

RESPECT THE RIGHTS OF OTHERS
- Do not fly over Congressionally designated Wilderness Areas or Primitive Areas as many people seek these places for the opportunities for solitude and quiet that they provide.
- Obey all privacy laws.

PROTECT WILDLIFE
- Do not fly over or near wildlife as this can create stress that may cause significant harm, and even death.

The FAA provides guidance on “Flights Over Chatered U.S. Wildlife Refuges, Parks, and Forest Service Areas” at http://go.usa.gov/3qszv. Federal laws prohibit certain types of flight activity and/or provide altitude restrictions over “designated Forest Service Areas.”

Go to http://go.usa.gov/3qswj for additional information about responsible use of UAS on National Forests and for more information watch the “Know Before You Fly” video on YouTube (https://youtu.be/KFSQdRkBlhs) and visit the Know Before You Fly website at: www.knowbeforeyoufly.org

Drones, or unmanned aircraft systems (UAS) as the Federal Aviation Administration calls them, are becoming more and more popular. These little aircraft are fun to fly and allow hobbyists the ability to see incredible sights. They also can pose a flight hazard, so hobbyists need to know and follow FAA rules when operating these little flying machines.

Following are some tips to remember when flying UAS over national forests.

KNOW WHAT KINDS OF UAS FLIGHTS ARE PERMITTED
- The Federal Aviation Administration (FAA) has authority over all airspace. Ensure that you comply with all FAA regulations and guidance for flying UAS, available online at www.faa.gov/ufas
- UAS may not be flown for commercial or business purposes without FAA approval.
- UAS may be flown for recreation or hobby purposes in compliance with the Special Rule for Model Aircraft (Section 336 of Public Law 112-95).
- Model aircraft may not be flown for payment or commercial purposes.
- UAS may be flown by public entities (i.e. federal, state, and local government agencies and public universities) that obtain a Certificate of Waiver or Authorization from the FAA.

IF YOU FLY, WE CAN’T!

FLYING DRONES WITHIN OR NEAR WILDFIRES without permission could cause injury or death to firefighters and hamper their ability to protect lives, property and natural cultural resources.

Fire managers may suspend aerial firefighting until unauthorized unmanned aerial systems leave the area, allowing a wildfire to grow larger.

Contact your nearest land management agency office to learn more about unmanned aerial systems and public lands.
A mantle of white settles over the landscape. Trees covered with thick snow add to the enchantment of this winter wonderland. Known throughout Washington State as a premiere winter playground, the Okanogan-Wenatchee National Forest offers a wide range of winter recreation opportunities.

**Naches Ranger District**

Four cross-country ski and snowshoe groomed trail systems have skate lanes, forested trails with set tracks, and endless opportunities for backcountry exploration and are dog friendly.

The North Fork Sno-Park accesses 17.5 miles (28 km) of trails including loops near Clear Lake and a skate lane that goes all the way to the Wilderness boundary. A sledding hill is located next to the parking lot.

Bumping Lake trail system has approximately 8 miles (12 km) of groomed routes and is a great spot for beginners.

Goose Egg Sno-Park has a fun 2.7 mile (4 km) trail along the Tieton River.

Pleasant Valley Trail system offers the most variety with four separate sno-parks located at Pleasant Valley, Hells Crossing, Crow Lake Way and Union Creek. Over 10 miles (16 km) of trails undulate through the woods and across streams from Hells Crossing to Pleasant Valley.

**Wenatchee River Ranger District**

Thirty miles (48 km) of marked cross-country ski trails, 140 miles (225 km) of groomed snowmobile trails, two downhill ski resorts—Mission Ridge and Stevens Pass (including a Nordic Center), and Leavenworth Ski Hill all offer fantastic winter recreation opportunities to those visiting the Wenatchee River Ranger District. Parking at designated sno-parks requires a sno-park permit which can be purchased at Forest Service Ranger Stations, local businesses or online at: [http://www.fws.gov/33660](http://www.fws.gov/33660)

When venturing into the winter backcountry always remember to check the avalanche and weather forecasts at the Northwest Avalanche Center at [www.nwac.us](http://www.nwac.us)
It can be confusing trying to figure out what passes are needed when recreating in the Okanogan-Wenatchee National Forest. Basically, there are two types of passes that can be used at fee sites on the forest.

**Northwest Forest Pass**
**America the Beautiful National Parks and Federal Recreational Lands Pass**

The Northwest Forest Pass is valid at all Forest Service operated recreation sites in Washington and Oregon where a day use fee is required. The annual pass is $30 and day passes are $5. This pass allows the holder and any accompanying passengers in a private vehicle use of the recreation facilities.

Those choosing to use the America the Beautiful National Parks and Federal Recreational Lands Pass have five options—an $80 annual pass, a $10 senior pass for those 62 or older, a free access pass for those with medical documentation of permanent disability, a free military pass for active military personnel and their dependents, and a volunteer pass for those who contribute 500 hours or more. This pass combines the benefits of existing recreation passes from five federal agencies into one comprehensive interagency pass.

The added benefit of the America the Beautiful pass is that it can be used on public lands across the nation managed by the US Forest Service, National Park Service, US Fish and Wildlife Service, Bureau of Land Management, and Bureau of Reclamation.

For a complete list of recreation sites where a day use fee is required visit [www.fs.usda.gov/goto/okawen/passes](http://www.fs.usda.gov/goto/okawen/passes) or call your local ranger station.

By the way, don’t get these two passes confused with the Washington State Department of Natural Resources Discover Pass. Discover Passes are not valid on national forest lands. Also, Washington State’s Sno-Park permits are required for everyone parking at a sno-park from about November 1 through April 30.

Day use fees are generally waived on National Forests in Washington and Oregon on:
- Martin Luther King Jr. Day
- Presidents Day
- National Trails Day
- National Get Outdoors Day
- National Public Lands Day
- Veterans Day

(Note: Concessionaire fees may still apply)

**Interagency Passes**

**Northwest Forest Passes**

**RECREATION OPPORTUNITIES ABOUND**

To aid forest visitors, the following pages contain general maps and information about favorite trails and campgrounds on each of the seven ranger districts in the national forest. We hope these maps and trail and campground lists help you when deciding where to recreate in the national forest. The material included on these pages is general in nature, so be sure to contact the local ranger district office for more detailed camping and trail information, seasonal restrictions, and more.

Note that some of the trails highlighted here can be long, rugged and challenging. Be prepared for any kind of weather in this mountain environment.

The red and blue icons below, and on the following pages, indicate the type of activities and services allowed or available at each site.

**AMPHITHEATER**

[Map of Cascade Loopout]
FOLLOWING ARE SOME OF THE MORE POPULAR TRAILS ON THE CHELAN RANGER DISTRICT

**“Drive To” Trails**

**DEMONS BACKBONE** N° 1448
13 miles from Stormy Mt. Road to Handy Springs. Elevation: 6,121′−6,520′

**ECHO RIDGE** N° 1230-3259
Multiple loops (approximately 30 miles) Elevation: 3,400′−4,324′. In winter, passes cost $70/season or $10/day.

**POT PEAK TRAIL** N° 1266
0.5 miles to Devils Backbone. Elevation: 1,880′−6,640′

**SUMMER BLOSSOM** N° 1258
6 miles. Elevation: 6,400′−7,400′. High vehicle clearance and 4-wheel drive necessary to access trailhead on Forest Road 8020.

**SUMMIT MULTIPLE USE TRAIL** N° 1258.3
8 miles from junction with Safety Harbor Creek Trail to Prince Creek Trail. Elevation: 7,000′−8,000′

**“Boat In / Hike To” Trails**

**AGNES GORGE** N° 1281
3 miles. Elevation: 1,600′−2,000′. A great day hike for Stohokin visitors. Begins at High Bridge Campground (in North Cascades National Park).

**DEVORE CREEK** N° 1244
13 miles. Trail starts from the Stohokin River Trail in the Lake Chelan National Recreation Area and ends at junction with 10 Mile Creek Trail. Elevation: 1200′−6,000′

**DONKE LAKE** N° 1280
3 miles. Elevation: 1,100′−2,192′

**EMERALD PARK** N° 1230
7 miles. Trail starts 1.5 miles up the Dornke Lake Trail. Elevation: 2150′−6,000′

**HART AND LYMAN LAKES** N° 1256
10.5 miles. Elevation: 3,209′−5,983′

**HOLDEN LAKE** N° 1251
4 miles. Trailhead starts at Hart and Lyman Lakes Trail 1256 and ends at Holden Lake.

**LAKE SHORE** N° 1247
17 miles. Elevation: 1,100′−1,600′

**PACIFIC CREST TRAIL** N° 1200
20 miles from High Bridge Campground (in North Cascades National Park) to Suicide Pass. Elevation: 1,700′−5,883′

**POT PEAK TRAIL** N° 1236
9.5 miles to Devils Backbone. Elevation: 1,880′−6,640′

**PRINCE CREEK** N° 1255
10.7 miles to North Fork Prince Creek. Elevation: 1,100′−5,500′

**SUMMIT WILDERNESS TRAILS** N° 1258.1 − 1258.2
18 miles from Prince Creek Motorized Trail junction to Lake Chelan Recreation Area boundary. Elevation: 5,000′−7,200′

**TEN MILE FALLS TRAIL** N° 1270
1 mile, fully accessible trail at Holden Village.

---

**LAKE CHELAN (LEFT) AND DONKE LAKE**
No campgrounds on Chelan Ranger District are reserved.

**“Drive To” Campgrounds**

**Antilon Lake**
14 miles from Chelan at the north end of Antilon Lake. Primitive campground. Trailers not advised. No fee. Vault toilets, no campfire rings or picnic tables. Bring drinking water and pack out all garbage.

**Grouse Mountain**
11 miles from 25-Mile Creek State Park on FS Road 5900. 4 tent sites. Trailers not advised. No fee. Spring water is available; no potable water. One table, one fire ring, one toilet.

**Handy Springs**
16 miles from 25-Mile Creek State Park on FS Road 5900. Primitive campground. 1 tent site. Trailers not advised. No fee. No water. Pit toilets, campfire rings and picnic tables. Heavily used during hunting season.

**Junior Point**
16 miles from 25-Mile Creek State Park on FS Road 5900. Primitive campground. 5 tent sites. Trailers not advised. No fee. No water. Viewpoint, pit toilets, campfire rings, and picnic tables.

**Snowberry Bowl**
3.5 miles from 25-Mile Creek State Park on FS Road 8410. 7 single sites. 2 double sites. Accessible to all but the largest RV’s. $10/night (extra vehicle $8). Water, picnic tables, campfire rings and vault toilets.

**South Navarre**
35 miles from Chelan. Primitive campground. 3-4 sites. Trailers not advised. High vehicle clearance & 4WD necessary to access. No fee. No potable water. Picnic tables, fire rings and pit toilets. No stock water.

**Windy Camp**
15 miles SW of Snowberry Bowl on FS Road 8410. Primitive campground. 2 sites. Trailers not advised. No fee. Picnic tables, fire rings and one toilet.

**“Boat In” Campgrounds**

**Corral Creek**
8.9 miles from 25-Mile Creek State Park. Floating dock, 6 boat capacity. 5 tent sites. Dock permit required. Two picnic tables, three fire rings and one toilet.

**Deep Point**
3.6 miles from 25-Mile Creek State Park. Floating dock, 6 boat capacity. 5 tent sites. Dock permit required. Picnic tables, fire rings and two toilets. Good shelter from down-lake winds but no protection from up-lake winds.

**Domke Falls**
17.9 miles from 25-Mile Creek State Park. Floating dock, 6 boat capacity. 4 tent sites. Dock permit required. Fire rings, picnic tables and one toilet.

**Graham Harbor**
12.4 miles from 25-Mile Creek State Park. Floating dock, 10 boat capacity. 5 tent sites. Dock permit required. Picnic tables, shelter, fire rings and two toilets. Good shelter from down-lake winds but no protection from up-lake winds.

**Hike In Campgrounds**

**Cascade Creek**
Located off of the Lakeshore Trail. 5 miles north of Prince Creek. 2 tent sites. No fee. One picnic table, one fire ring and Wallowa toilet.

**Domke Lake**
3 miles from Lucerne Landing. No fee. Five tent sites, five picnic tables, five fire rings, one pit toilet.

**Holden**
Located near Holden Village. 0.1 mile past Hart/Lyman Lake trailhead.

**Mitchell Creek**
3.7 miles from 25-Mile Creek State Park. Dock and boat basin, 11 boat capacity. 3 tent sites. Dock permit required. Picnic tables, fire rings and two toilets. Adjacent to Forest Service Guard Station.

**Moore Point**
5.5 miles south of Stehekin, 12.5 miles north of Prince Creek on Trail No. 1247. 4 main sites. No fee. Four fire rings, a three-sided shelter and bear box. This is a boat-in campground and is busy on weekends. Possible ferry stop.

**Prince Creek**
18 miles south of Stehekin on Trail No. 1247. 6 tent sites. No fee. Six picnic tables and six fire rings. This is a boat-in campground and is busy on weekends. Possible ferry stop.

**Refrigerator Harbor**
21.1 miles from 25-Mile Creek State Park. 4 boat capacity. 1 shelter. 4 tent sites. Dock permit required. Accessible year-round. Four picnic tables, four fire rings, shelter and two toilets. Good down-lake wind protection but no protection from up-lake winds.

SEE INFORMATION ON FACING PAGE ABOUT ROAD, CAMPGROUND / TRAIL CLOSURES, AND TRAIL ACCESS

SEe PAGE 7 FOR ICoN DESCrIPTIONS

SILvER FALLS N°1442 ❌ CLOSED

LAKE CReEk N°1443 ❌ CLOSED
0.6 miles. Northwest Forest Pass required. More difficult. Trail starts at Entiat River Road 5100 and ends at Devils Backbone trail.

MIDDLE TOMMY N°1424 ❌ CLOSED
0.3 miles. Most difficult for motorbikes. Trail ties into Blue Creek Trail No. 1426.

PYRAMID MOUNTAiN N°1433 ❌ CLOSED
Best access into upper Entiat area from Entiat Valley. 10.8 miles. More difficult for pack and saddle users. Trail runs from Big Hill Road 5900 to Emerald Park Trail No. 1290.

NORTH FORK ENTiat RIVER N°1437 ❌ CLOSED
Closed from trailhead to junction with South Pyramid Trail #1450. 8.1 miles. Northwest Forest Pass required. More difficult for pack and saddle users. Trail begins at the end of North Fork Road 5906 and ends at Pyramid Mountain Trail.

ENTiat RIVER N°1400 ❌ CLOSED

MYRTLE LAKE N°1404 ❌ CLOSED
Closed. 4 miles. Easy. Very popular day use trail.

ICe CREEK TRAIL N°1405 ❌ CLOSED
4.1 miles. Easy. Trail extends from Entiat River Trail No. 1400 to Ice Camp.

ICe LAKES N°1405.1 ❌ CLOSED
2 miles. Most difficult. Short trail from Ice Camp to Ice Lakes in the Glacier Peak Wilderness.

MA D RIVER TRAIL N°1408 ❌ CLOSED

LARCH LAKES N°1430 ❌ CLOSED
5.4 miles. More difficult for pack and saddle users. Trail is located in the Wilderness area, offers access to Lynch Lakes, Garland Peak Trail and Pomos Creek Trail.

NORTH TOMMY N°1425 ❌ CLOSED
9 miles. More difficult for motorbikes. Provides access to Blue Creek and Mad River Trails.
ENTIAT RANGER DISTRICT

CAMPGROUNDS

ENTIAT RANGER DISTRICT FIRE AREA CLOSURES

Of the wildfires that occurred on the Entiat Ranger District during 2014, the Mills Canyon and Duncan fires were the largest and most destructive. The after-effects of these fires left mountainsides denuded of ground vegetation resulting in unstable slopes. The risk of entrapment due to the high potential of landslides or debris flows has caused the closure of some roads, trails, trailheads and campgrounds. These closures are possibly temporary and are dependent upon the pace of recovery of the burned areas, and if any landslide or debris flows occur.

Campgrounds Closed
Cottonwood Campground and Cabin
Spruce Grove Campground
North Fork Campground

Roads Closed
Entiat River Road closed just past junction with Forest Road 5605, near milepost 30.
Forest Roads 5210, 5212, and 5606 closed

Trails Closed
Silver Falls National Recreation Trail
North Fork Entiat River Trail No.1437 closed from the trailhead to the junction with Pyramid Creek Trail No.1439
Entiat River Trail No.1400 closed from trailhead to wilderness boundary

NOTE: Most trails on the Entiat Ranger District are open, but cannot be accessed via the Entiat River Road

For the latest information on areas affected by these closures call the Entiat Ranger Station at (509) 784-4700.

WHY THE CLOSURES?

The 2015 Duncan wildfire has created a situation that has been identified as having serious known dangers. Following the 2015 wildfire, the area was surveyed by a team of hydrologists/soil scientists and other resource specialists. They completed a Burned Area Emergency Rehabilitation (BAER) Plan and based on this review, it was determined that a serious geologic condition existed within the Duncan area that was aggravated by the wildfire.

The fire burned off a large portion of the vegetation and trees which traditionally absorbed large amounts of water including snow melt and rain. The lack of vegetation and trees has greatly reduced the absorption of water from the hillside and increased the amount of water, sediment, rocks, and dead vegetation running down the hillside. This situation, combination with the type of soils in this area and geological structure (alluvial fan), has created a serious condition which has significantly increased the potential for landslides, mud flows and other natural events.

This area is also known for rapidly occurring weather events which could quickly cause a dangerous situation, limiting the ability to notify and remove publics located in the area within a safe timeline. Human life and safety would be at a “very high” risk if allowed into this area.

A closure order has been approved based on these recommendations and can be viewed at http://go.usa.gov/3k2em . Although the BAER report says that up to 3-5 years may be required before this area is reasonably safe, we really don’t know how long it will take for nature to correct the current conditions. We do not want to keep this area closed if not warranted, but also want to ensure that public access and use is reasonably safe prior to re-opening. Until specialists can confirm this is the case, we feel closure is necessary to protect forest visitors.

A gate was installed just past the Riverside Recreation Residences on the Entiat River Road; this still allows access to Silver Falls Campground.

There are alternate ways into the Glacier Peak Wilderness area. They include access via the Wenatchee River Ranger District, which is southwest of the Entiat River valley. The Chiwawa River has two developed campgrounds – Rock Creek Crossing and Schaefer Creek. The Rock Creek Trail can be accessed near these two campgrounds and requires approximately 5-6 miles of travel north into the Glacier Peak Wilderness.

Another possible route is from the Shady Pass Road along the ridge top between Entiat and Chelan Ranger Districts (north of the area closure). Pyramid Mtn Trail No.1433 starts off this road and heads west to trail No.1440 which continues into Glacier Peak Wilderness.

Please stop by the Entiat District office or call (509) 784-4700 to discuss possible routes with recreation or front desk staff.

Campgrounds

BIG HILL
11 miles up Shady Pass Road 5900.
6,600’ elevation. 1 site. Trailers not recommended. Really rough access road.

FOX CREEK
27 miles from Hwy 97A.
2,000’ elevation. 16 sites. 26’ max trailer length. $10/night (extra vehicle $8). Not reservable.
Water, pit toilets and garbage service.

HALFWAY SPRINGS
6 miles up Shady Pass Road 5900.
5,000’ elevation. 4 tent sites. Trailers not recommended. No fees. Not reservable. Rustic dispersed camping area. No water.

LAKE CREEK
28 miles from Hwy 97A.
2,200’ elevation. 18 sites. 20’ max trailer length. $10/night (extra vehicle $8). Not reservable.
Water, pit toilets and garbage service.

PINE FLATS
14 Miles from Hwy 97A.
1,600’ elevation. 6 tent sites. 20’ max trailer length. $6/night (extra vehicle $6).
Not reservable. Water and pit toilets.

PINE FLATS GROUP SITE
1,600’ elevation. 1 site. 20’ max trailer length. $60/night plus $9 reservation fee. Reservations required. Maximum 33 people. Maximum 10 vehicles. Water, campfire rings, picnic area, garbage service, and vault toilets. No electricity.

SILVER FALLS
30 miles from Hwy 97A.
2,400’ elevation. 31 sites. 36’ max trailer length. $12/night (extra vehicle $10). Not reservable.
Water, pit toilets and garbage service.

SILVER FALLS GROUP SITE
2,400’ elevation. 1 site. 35’ max trailer length. $60/night plus $9 reservation fee. Reservations required. Maximum 40 people. Water, picnic tables, campfire rings, accessible toilets, garbage service and picnic shelter with a fireplace. No electricity.

GROUP SITE RESERVATIONS must be made through the National Recreation Reservation System 1-877-444-6777 or recreation.gov website. Reservations may be made one year in advance.

Observation Points

BOX CANYON
28 miles up Entiat River Road 5100.
Small parking area with one lookout.
Attraction: Overlook view of the canyon cut through solid rock by the river.
FOLLOWING ARE SOME OF THE MORE POPULAR TRAILS ON THE METHOW VALLEY RANGER DISTRICT

BLUE LAKE #314
2.2 miles. Northwest Forest Pass required.

EAGLE LAKES #431
7 miles. Very scenic.

GOAT PEAK #457
2.5 miles. The last half mile offers good views of North Cascades peaks.

HIDDEN LAKES #477
15 miles. Northwest Forest Pass required. Popular route to a string of fishing lakes. Fine views for the first 7 miles.

LAKE CREEK #500
5 miles. Northwest Forest Pass required. Little elevation gain. Trail is maintained only to Black Lake.

ANDREWS CREEK #504
16 miles to Spanish Camp. Northwest Forest Pass required. Popular route to Spanish Camp/Reniel Lake area. Steady 14-mile climb up to Andrews Pass with few camping spots before reaching the pass.

CHEWUCH #510
17.1 miles to Reniel Lake. Northwest Forest Pass required. Trail follows the Chewuch River.

LAKE ANN / MAPLE PASS LOOP #740
7.5 miles. Northwest Forest Pass required. Excellent views.

NORTH CREEK #413
4.8 miles. Northwest Forest Pass required.

PACIFIC CREST TRAIL #2009
HWY 20 TO HARTS PASS

PACIFIC CREST TRAIL #2009
HARTS PASS TO CANADA
31.3 miles. Popular trail. Little water in late summer.

RAINY LAKE #318
0.9 miles. Northwest Forest Pass required. Accessible paved flat trail to a picnic spot on the north end of Rainy Lake.

TWISP PASS #432
No campground sites on the district are reservable. Maximum of two motor vehicles per site. Second vehicle $5 extra per night.

**DOG LAKE**
- 8 sites. 20-24' limited turning radius. $8/night (extra vehicle $5). $5 day use fee. No reservations. No water. Vault toilets and dumpsters. No horses allowed at the trailhead within camp units. Fee is for all use – fishing, camping, and hiking.

**HAUSE CREEK**
- 42 sites. 1 barrier-free, 30' max RV length. $18/night. $35 Multi-family (extra vehicle $9). Piped water. Comfort stations with flush toilets and dumpsters. Located on Tieton River.

**INDIAN CREEK**
- 39 sites. 32' max RV length. $20/night (extra vehicle $10). Piped water, toilets, dumpsters. On Pinnock Lake near Clear Lake.

**PENINSULA**

**SOUTH FORK GROUP SITE**

**SOUTH FORK TIETON**
- Dispersed sites. RV or tent. $8/vehicle. No reservations. No water. Vault toilets, dumpsters.

**WHITE PASS LAKE (LEECH LAKE)**
- 16 sites. 20' max RV length. $8/night (extra vehicle $2). $5 day use fee. No reservations. No water. Vault toilets, dumpsters, and boat launch. No motors on boats. Fly fishing only. Fee is for all use – fishing, camping, hiking.

**WILLOWS**
- 15 sites. 20' max RV length. $14/night (extra vehicle $7). Hand-pump well. Vault toilets and dumpsters. Located on Tieton River.

**WINDY POINT**
- 15 sites. 22' max RV length. $14/night (extra vehicle $7). Pressurized well. Vault toilets and dumpsters. Located on Tieton River.

---

**Lodge & Cabin Rental**

**American Ridge Lodge**
- The rustic and spacious 43’ x 48’ lodge, although unfurnished, has a kitchen area, counter space, benches, closets, cabinets, and wood stove. Outdoor fire ring and picnic tables, and room on the grounds for dispersed camping, making it ideal for groups. The lodge does not have electricity, so bring lanterns. There is no water on site. $100/night. Maximum 60 people.

**American River Guard Station**
- The rustic cabin has a small kitchen, living/sleeping area, bathroom, and a full sized sleeping loft and is a 4-person unit. The clean and comfortable cabin is furnished with many amenities: small refrigerator, electric range, dining table and chairs, queen size sleeper sofa in living room, full size bed and mattress in bedroom, two twin size beds in upstairs loft, wood stove. There is no water at the cabin. $50/night. Maximum of 8 people. Reservations: 1-877-444-6777 or recreation.gov.

---

**HELLS CROSSING Campgrounds operated by concessionaire under contract with the Forest Service.** Reservations available: 1-877-444-6777 or recreation.gov.

Only 20% of sites in concessionaire operated campgrounds are first come, first served.
ALBERT CAMP
8.5 miles. Elevation: 4,665’–7,226’

FEEZEOUT RIDGE
3.7 miles. Elevation: 6,558’–7,595’
More Difficult. Magnificent ridge walk through subalpine forest and meadows. Excellent views of the rugged North Cascades peaks and Pasayten Wilderness.

BIG TREE
1 mile. Elevation: 3,778’–3,880’
Easy. Hiking, interpretive site. Connects with a loop trail that highlights two 600-year-old western larch trees.

BONAPARTE MOUNTAIN
4.5 miles. Elevation: 4,472’–7,254’
More difficult. Good views. Lookout on top.

BOUNDARY
70 miles. Elevation: 5,480’–6,978’

CATHEDRAL DRIVEWAY
2 miles. Elevation: 4,291’–5,417’

FOURTH OF JULY RIDGE
7.3 miles. Elevation: 5,070’–5,830’
Most difficult. The trail passes by several old cabins. Many scenic views.

GOLDEN STAIRWAY
0.2 miles. Elevation: 4,190’–5,086’
More difficult. Scenic views and wildlife observation opportunities. Trail ends at a former lookout tower site on top of Starvation Mountain.

STRAWBERRY MOUNTAIN
1.5 miles. Elevation: 3,835’–4,731’
Easy. Trailhead is across from the Lost Lake Campground.

TIFANY LAKE
8.5 miles. Elevation: 4,928’–6,772’
More difficult. It is just over a mile to the lake from Tiffany Springs.

ANGEL PASS
1.5 miles. Elevation: 4,547’–5,184’
More Difficult. This trail is a nice day hike out of Salmon Meadows Campground and has nice scenic views. ATV use on this trail.

WINDY PEAK
11.5 miles. Elevation: 5,430’–7,215’

SMITH LAKE ON THE BOUNDARY TRAIL

CAN I TAKE MY DOG HIKING WITH ME?
In most areas yes, but not in the Enchantments permit area of the Alpine Lakes Wilderness. When recreating with pets in the national forest, they must be under control at all times.

CAN I BRING FIREWORKS TO THE FOREST?
No, it is illegal to use or possess fireworks on state or federally protected lands.

DO I NEED A CAMPFIRE PERMIT?
No.

DO I HAVE TO HAVE A PERMIT TO COLLECT WOOD FOR MY CAMPFIRE?
No, you can gather wood for your campsite but you have to leave any leftover wood in the forest or at the campsite.

CAN I GO TARGET PRACTICING IN THE FOREST?
Yes, but you need to contact the local ranger district office for rules and regulations.

HOW LONG CAN I STAY IN THE NATIONAL FOREST?
There is a 14-day stay limit per site. Camping or occupying a site or area within a 5-mile radius by the same person or group may not occur again for a period of 14 consecutive days thereafter.

CAN I GEOCACHE IN THE FOREST?
Yes, geocaching, or finding hidden items using handheld GPS units, is allowed as long as the activity remains non-ground-resource disturbing and non-commercial (no charges to participants). It is illegal to geocache in wilderness areas.

WHAT PERMITS DO I NEED TO ENTER WILDERNESS AREAS?
