## **B. INVESTMENT PRIORITIES TO REDUCE DEFERRED MAINTENANCE**

The following table lists sites with priority deferred maintenance needs that are currently unfunded. Cost estimates were developed in 2004 as part of the Forest's submittal package for Regional Capital Investment Program (CIP) consideration. Cost estimates will need to be updated as funding becomes available. Listed projects received the highest niche compliance score (20 pts.). Once deferred maintenance needs are eliminated, the sites total rank score is in the top 20% of the Forest's sites.

<b>PROJECT NAME</b>	<b>SCOPE OF PROJECT</b>	<b>COST</b>	<b>Current Score</b>	<b>Post Project Score</b>
White Pine Trailhead	The proposal addresses the health and safety of parking lot intersection by redesigning the entrance road to improve visibility for entering the highway. Reference the 2004 CIP submittal for additional details. Engineering review determined that the FS would need to move the intersection 300 ft. down canyon to provide proper access. Deferred maintenance toilet was replaced w/ variance from the Salt Lake County. FS installed a vault toilet.	<b>\$68,000</b>	<b>81</b>	<b>85</b>
Guinavah-Malibu Campground	The proposal includes addressing deferred maintenance on the water system, toilets, site furniture, fencing, signing, gates, amphitheater, hazard tree removal, trails, roads, spurs, and bridge replacement. Reference the 2004 CIP submittal for additional details.	<b>\$ 2,500,000</b>	<b>67</b>	<b>82</b>
Trail Lake Campground	This proposal would replace existing signing and bring all facilities up to standard. Reference the 2004 CIP submittal for additional details.	<b>\$ 1,300,000</b>	<b>70</b>	<b>82</b>
Mirror Lake Highway priority toilet replacements	This proposal includes toilet replacements at the following sites: Butterfly CG, Cobblersrest CG, Pine Valley CG, Soapstone CG, and Moosehorn CG. Reference the 2004 CIP submittal for additional details.	<b>\$ 300,000</b>	<b>75 -79</b>	<b>80 -82</b>
Anderson Cove Beach	This proposal would bring all facilities including: toilets, water, site furniture, signing, and spurs up to standard. Reference the 2004 CIP submittal for additional details	<b>\$ 620,000</b>	<b>77</b>	<b>81</b>

### **C. PROGRAMMATIC ACTIONS**

This table identifies actions and strategies that are either Forest-wide or pertain to one or more districts. As with site-specific actions, these proposals will assist the Forest in best achieving their recreation niche, improve visitor satisfaction, reduce deferred maintenance, and move toward a quality, sustainable developed recreation program.

<b>ACTION</b>	<b>LEAD</b>	<b>TIME FRAME</b>
Conduct an engineering assessment of all water systems	Forest Facilities Engineer	2006-2007
Continue investigating alternative water delivery strategies.	Forest Recreation staff	On-going
Continue to pursue mass transit opportunities in the tri-canyon corridors. Proposed actions shall be recommended through the corridor management plan currently being developed.	Salt Lake District	On-going
Negotiate w/ concessionaires to expand current responsibilities. Items to consider include: hazard tree removal, water system testing, more aggressive marketing strategies, and others.	Kamas and Logan Districts	2008
Develop strategies to increase campground occupancy and reduce resource impacts in adjacent areas caused by dispersed camping.	Kamas and Evanston Districts	2007
Proposed fee changes shall be coordinated with the established RRAC.	Forest Recreation Staff	Annually
Develop new and multiple delivery strategies of key management messages to users.	Forest LA with public affairs staff	2009
Continue to correct and up-date the infra data base. Focus efforts on revising deferred maintenance data of buildings and water system O&M costs. In addition, enter all condition survey information at the end of each field season.	District Recreation Staff and Engineering	Annually-post field season

## 5. MONITORING

**Questions** the Forest would like to answer tie directly back to the primary objectives of RFMP: Increasing visitor satisfaction, supporting communities, being financially sustainable and environmental protection. Specific questions include:

- **Are recreation sites and opportunities more consistent with demand, niche, use levels, and user expectations?**
- **Are recreation sites meeting quality standards?**
- **Are annual operation and maintenance costs within the Forest's available revenue stream?**
- **Is deferred maintenance being reduced at projected rates?**
- **Are environmental conditions improving as actions are implemented?**

### **Monitoring methods will include:**

- Annually review RS-FMP Plan of Proposed Actions to determine if any triggers for change require a change in course.
  - Potential triggers for a change.** Some of the original assumptions and projections from which actions were developed may change. In some cases, the changes may warrant a change in either the objective(s) being pursued or the actions by which the objectives can be achieved. Examples of some triggers that may warrant a re-evaluation of the Plan of Proposed Actions include:
    - Decreases in budgets
    - Changes in standards (i.e. EPA water system standards)
    - Changes in local, regional, or national conditions (i.e. the price of gas, fires, etc.)
    - Increased use levels
    - Increased use conflicts
    - Changes in technology that alter use patterns or time frames.
    - Changes in concessionaire operations
    - Partnership opportunities
    - Results of additional analysis and NEPA procedures.
    - Recommendations of the RRAC.
- Review and document the actions completed during the fiscal year. Where planned actions were not completed, document why.
- Annually review deferred maintenance values to assure that adequate progress is being made to reduce deferred maintenance by 24% within 5 years. In order to comply with existing direction and to allow deferred maintenance values to be monitored, the Wasatch-Cache National Forest will annually conduct, document, and enter into Infra, facility condition surveys for 20% of the all recreation sites, including linked constructed features.
- Review results of Region's Recreation Site Monitoring ("Secret Shopper") program. Acceptable performance is an average score of 4.0 or better when compared to meeting Regional required quality standards.
- Review National Visitor Use Monitoring data, provided at five-year intervals, to assure that customer satisfaction levels relevant to the Forest's developed recreation site program are maintained or increased.
